About the book: A meticulous scientific presentation of the unity of being, (one unified being) presented by the contemporary Aref (Sufi Master) and teacher, Molana Salaheddin Ali Nader Shah Angha (Hazrat Pir). This inspired manuscript presents a fresh view of the essence within as well as beyond the frontiers of almost 12 billion light years of cosmic expansion. Expansion and Contraction within Being (DAHM) deals with the foremost, cutting edge problems of science, including biology, immunology, molecular physics, cosmology, and neurology, to name a few. For example, Hazrat Pir unifies the seemingly various forces of Nature by demonstrating that it is the amount of Expansion and Contraction which is the only factor needed for specifying the dynamic variables of a particle or a system. Hazrat Pir's surge of intuitive knowledge and wisdom, especially in this book, is truly an illumination to the pathways of scientists' search for the truth. This book should be studied deeply by anyone interested in a scientific approach toward understanding the truth of the vast and united Existence. The author of numerous works in poetry and prose, the school has grown under his tutelage to include over 400,000 students worldwide.

John Locke's Letter Concerning Toleration (1689) is one of the most widely-read texts in the political theory of toleration, and a key text for the liberal tradition. However, Locke also defended toleration more extensively in three subsequent Letters, which he wrote in response to criticism by an Anglican cleric, Jonas Proast. This edition, which includes a new translation of the original Letter, by Michael Silverthorne, enables readers to assess John Locke's theory of toleration by studying both his classic work and essential extracts from the later Letters. An introduction by Richard Vernon sets Locke's theory in its historical context and examines the key questions for contemporary political theorists which arise from this major work in the history of political thought.
