Here's a thoughtful, probing exploration of why Christians get stuck in the place of complacency, dryness, and tedium -- and how to move on to new levels of spiritual passion! Buchanan shows how the majority of Christians begin their spiritual journey with excitement and enthusiasm -- only to get bogged down in a "borderland" -- an in-between space beyond the "old life" but short of the abundant, adventurous existence promised by Jesus. Citing Jonah, he examines the problem of "borderland living" -- where doubt, disappointment, guilt, and wonderlessness keep people in a quagmire of mediocrity -- then offers solutions ... effective ways to get unstuck and move into a bold, unpredictable, exhilarating walk with Christ. Inspired writing!

Heat transfer is a sub-field of thermal engineering, which deals with the generation, conversion, use and exchange of thermal energy between physical systems. The fundamental mechanisms of heat transfer are conduction, convection, advection and radiation. It is crucial for phase transition in a thermodynamic system from one state of matter to the other. Heat transfer has wide applications in insulation, thermal management of electronic devices and systems, materials processing, etc. Mass transfer refers to the net movement of mass from one location to another. It may occur due to the processes of precipitation, absorption, evaporation, distillation, etc. Mass transfer is used widely in separations engineering, reaction engineering, heat transfer engineering, etc. This book is a valuable compilation of topics, ranging from the basic to the most complex theories and principles in the field of heat and mass transfer.
