Chile Business Law Handbook - Strategic Information and Basic Laws

First published in 1999, this volume provides an overview of company laws in South East Asia, North East Asia and the Pacific. The chapters adopt a standard format to allow for comparisons to be made as well as highlighting key features of company laws in each jurisdiction. The contributors are experts in their fields and present practical and policy related insights. The book also contains some useful overviews of company law themes in Asia.

This book examines systematically the current systems of secured lending in China and Hong Kong, where companies or individuals offer personal property as security for credit advanced by a lender. Valid and enforceable security reduces the risk to the lender and so lowers the cost of credit to the borrower. However, the Hong Kong system, being largely derived from English law, is highly complex and in need of root-and-branch reform. The forces of inaction have triumphed and valuable opportunities to create a modern, rational and efficient system have been squandered. In China, on the other hand, a completely new system has been created

in the last twenty years which, whilst it has various problems and defects, has some notable advantages over the common law equivalent found in Hong Kong. *Legal Translation and Bilingual Law Drafting in Hong Kong* presents a systematic account from a cross-disciplinary perspective of the activities of legal translation and bilingual law drafting in the bilingual international city of Hong Kong and its interaction with Mainland China and Taiwan in the use of legal terminology. The study mainly examines the challenges posed to English-Chinese translation in the past three decades by elaborate drafting and terminological equivalence, and offers educational and research solutions. Its primary goals are to create legal Chinese that naturally accommodates common law concepts and statutes from the English legal system and to reconcile Chinese legal terms from the different legal systems adopted by Hong Kong, Mainland China and Taiwan. The new directions in legal translation and bilingual law drafting in Hong Kong will have implications for other Chinese regions and for the world. The book is intended for scholars, researchers, teachers and students of legal translation and legal linguistics, legal translators, lawyers and legal practitioners who are engaged in translation, as well as all persons who are interested in legal language and legal translation.

This study provides an in-depth analysis of the Hong Kong Ship Recycling Convention as adopted in May 2009 and a thorough analysis of the overall status quo of ship recycling regulations. It investigates the lack of sufficient ratifications of the Convention from both a legal

and an economic perspective. The first part of the study focuses on the history of the Convention's entry-into-force provision and the rationale behind it. Due to the fact that this provision provides a considerable additional obstacle to the Convention's becoming legally binding, in the second part the focus of the work shifts to unilateral action in this field. An overview of the legal environment of European ship recycling legislation is followed by an analysis and evaluation of a number of proposals by the European Commission attempting to tackle the problems of current ship recycling procedures. With a particular emphasis on (planned) European measures in this regard, the analysis' overall message is one of cautious optimism.

Offers an accessible overview of Hong Kong's legal system and guides first-year law students in legal research and methods.

All states are challenged by the need to protect national security while maintaining the rule of law, but the issue is particularly complex in the China–Hong Kong context. This timely and important book explores how China conceives of its national security and the position of Hong Kong. It considers the risks of introducing national security legislation in Hong Kong, and Hong Kong's sources of resilience against encroachments on its rule of law that may come under the guise of national security. It points to what may be needed to maintain Hong Kong's rule of law once China's 50-year commitment to its autonomy ends in 2047. The contributors to this book include world-renowned scholars in comparative public law and national security

law. The collection covers a variety of disciplines and jurisdictions, and both scholarly and practical perspectives to present a forward-looking analysis on the rule of law in Hong Kong. It illustrates how Hong Kong may succeed in resisting pressure to advance China's security interests through repressive law. Given China's growing international stature, the book's reflections on China's approach to security have much to tell us about its potential impact on the global political, security, and economic order.

Focusing on the Main Board Listing Rules, Hong Kong Listed Companies: Law & Practice explains what the key rules require and how those requirements fit into practice in the context of the underlying policy behind the rules. The step-by-step approach taken by the authors - both experienced corporate finance lawyers in Hong Kong - features case studies, diagrams and flowcharts to illustrate the rules and give examples of their application. The presentation details the ins and outs of the main issues arising from such aspects as the following: the process and documentation required to get a company listed on the Hong Kong Stock Exchange; ongoing obligations of listed companies under the Listing Rules; and ongoing obligations of listed companies and their shareholders under other relevant legislation, primarily the Securities and Futures Ordinance (such as market misconduct and disclosure of interests). As a practical, quick and easy-to-use guide to how the rules and legislation relating to listed companies apply, this is the

ultimate guide. In addition to its usefulness as a standard reference, ready to consult at a moment's notice, it will be of enormous value as a guide to in-house counsel, company secretaries, and other practitioners and students who require an understanding of the legal background and practical application of the rules and legislation that apply to listed companies.

Provides an accessible guide to company law in Hong Kong. The text is based on the latest provisions of the Companies Ordinance and cases decided since the summer of 1998, in both the Hong Kong and English jurisdictions.

The purpose of this book is to introduce the reader to the law of agency and partnership, as well as company law. It assumes that the reader is familiar in outline with the Hong Kong legal system and knows something about the law of contract. It is one of a series published by the Hong Kong University Press under the general editorship of Professor Derek Roebuck to provide accounting students with an introduction to Hong Kong law.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Hong Kong. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation, and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise, and radiation. Then, a section

on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil, and minerals. Further treatment includes the application of zoning and land-use planning, rules on liability, and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Hong Kong. Academics and researchers, as well as business investors and the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative environmental law and policy.

INTERNATIONAL BUSINESS LAW: CASES AND MATERIALS is a timely and useful book. Uncounted millions of “international” transactions occur daily, as goods and services are purchased across the national boundaries of some 200 political units. Capital flows from nation to nation, and so—to a lesser extent—do jobs, as companies seek more favorable locations for their business operations. The “rules” (laws) governing these exchanges quickly become complex, as persons (and governments) from different countries are involved. If problems arise in a cross-border relationship, whose rules apply? What forums are available to resolve disputes? Are there tax implications to the transaction? If so, where? These and similar questions need to be factored into the decision to “go overseas.” Each of the six chapters in this book begins with a brief overview of the subject-matter, followed by short previews of the chosen case examples. The primary content of the chapters consists of some 120 court and arbitration decisions in real disputes, between real parties. The actual text of the decisions in these cases has been edited; some excerpts are quite brief, others are more substantial. Most “background” facts have been summarized by the author, but the edited-decision part of each case is quoted from the actual recorded text of the court or arbitrator who decided it. Clearly, a minute sample from tens of thousands of cases cannot provide comprehensive coverage of what all the world’s legal

rules are. Our objectives here are simply to indicate some of the major potential “flash points” of doing international business, to illustrate some of the significant differences in the applicable legal rules, and to provide an exposure to the language and process by which international business disputes are resolved. “Forewarned is fore-armed.” Being aware of these potential trouble spots, a sensible business manager will presumably consider them in making the decision to engage in cross-border transactions, and take appropriate steps to avoid or minimize potential adverse consequences. Chapter I of this book introduces International Law—its course of development and its two major sources (custom and treaties). Chapter II examines the use of national and international courts and arbitrators to resolve cross-border disputes. Chapter III provides basic coverage of the United Nations Convention on Contracts for the International Sale of Goods: when it applies, how the sale contract is formed, when risk of loss on the goods passes from Seller to Buyer, and what responsibilities the Seller has for the quality of the goods sold. Chapter IV looks at some of the legal questions that might arise in conducting cross-border commercial operations—employment issues, intellectual property issues, and investment issues. Chapter V considers potential questions regarding taxation of international activities, and the regulation of adverse environmental effects. Chapter VI reviews the efforts by national governments to apply their competition regulations to international business transactions, and the difficulties that private parties might

have in attempting to enforce legal claims against governments and their agencies. While these are surely not the only legal issues that might arise in connection with international business, they do constitute a significant set of concerns of which managers need to be aware as they venture into the international “stream of commerce.”

Includes a clear and concise discussion of key topic areas, points of law illustrated by case examples, references to legislation and links to relevant government and statutory body websites.

monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers Hong Kong.

Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.
