When sixteen-year-old Rashad is mistakenly accused of stealing, classmate Quinn witnesses his brutal beating at the hands of a police officer who happens to be the older brother of his best friend. Told through Rashad and Quinn's alternating viewpoints.

We are profoundly social creatures--more than we know. In *Social*, renowned psychologist Matthew Lieberman explores groundbreaking research in social neuroscience revealing that our need to connect with other people is even more fundamental, more basic, than our need for food or shelter. Because of this, our brain uses its spare time to learn about the social world--other people and our relation to them. It is believed that we must commit 10,000 hours to master a skill. According to Lieberman, each of us has spent 10,000 hours learning to make sense of people and groups by the time we are ten. *Social* argues that our need to reach out to and connect with others is a primary driver behind our behavior. We believe that pain and pleasure alone guide our actions. Yet, new research using fMRI--including a great deal of original research conducted by Lieberman and his UCLA lab--shows that our brains react to social pain and

pleasure in much the same way as they do to physical pain and pleasure. Fortunately, the brain has evolved sophisticated mechanisms for securing our place in the social world. We have a unique ability to read other people's minds, to figure out their hopes, fears, and motivations, allowing us to effectively coordinate our lives with one another. And our most private sense of who we are is intimately linked to the important people and groups in our lives. This wiring often leads us to restrain our selfish impulses for the greater good. These mechanisms lead to behavior that might seem irrational, but is really just the result of our deep social wiring and necessary for our success as a species. Based on the latest cutting edge research, the findings in *Social* have important real-world implications. Our schools and businesses, for example, attempt to minimize social distractions. But this is exactly the wrong thing to do to encourage engagement and learning, and literally shuts down the social brain, leaving powerful neuro-cognitive resources untapped. The insights revealed in this pioneering book suggest ways to improve learning in schools, make the workplace more productive, and improve our overall well-being.

"It's a startling and disconcerting read that should make you think twice every time a friend of a friend offers you the opportunity of a lifetime." —Erik Larson, #1 New York Times bestselling author of *Dead Wake* and bestselling author of *Devil in the White City* Think you can't get conned? Think again. The New York Times bestselling author of *Mastermind: How to Think Like Sherlock Holmes* explains how to spot the con before they spot you. “[An] excellent study of Con Artists, stories & the human need to believe” –Neil Gaiman, via Twitter A compelling investigation into the minds, motives, and methods of con artists—and the people who fall for their cons over and over again. While cheats and swindlers may be a dime a dozen, true conmen—the Bernie Madoffs, the Jim Bakkers, the Lance Armstrongs—are elegant, outsized personalities, artists of persuasion and exploiters of trust. How do they do it? Why are they successful? And what keeps us falling for it, over and over again? These are the questions that journalist and psychologist Maria Konnikova tackles in her mesmerizing new book. From multimillion-dollar Ponzi schemes to small-time frauds, Konnikova pulls together a selection of fascinating stories to demonstrate what all cons share in common, drawing on scientific, dramatic, and psychological perspectives. Insightful and gripping, the book brings readers into the world of the con, examining the relationship between artist and victim. *The Confidence Game* asks not only why we believe con artists, but also examines the very act of believing and how our sense of truth can be manipulated by those around us.

In *Scam Me If You Can*, he reveals the latest tricks that today's scammers, hackers, and con artists use to steal your money and personal information--often online and over the phone. Using plain language and vivid examples, Abagnale reveals hundreds of tips, including:

- The best way to protect your phone from being hacked
- The only time you should ever use a debit card
- The one type of photo you should never post on social media
- The only conditions under which you should use WiFi networks at the airport
- The safest way to use an ATM

With his simple but counterintuitive rules, Abagnale also makes use of his insider intel to paint a picture of cybercrimes that haven't become widespread yet.

This book has everything: elaborate scams, corporate intrigue, magazine cover stories, ruined family relationships, and the demise of a company once valued at nearly \$10 billion.” —Bill Gates

The classic 1940 study of con men and con games that Luc Sante in *Salon* called “a bonanza of wild but credible stories, told concisely with deadpan humor, as sly and rich in atmosphere as anything this side of Mark Twain.” “Of all the grifters, the confidence man is the aristocrat,” wrote David Maurer, a proposition he definitely proved in *The Big Con*, one of the most colorful, well-researched, and entertaining works of criminology ever written. A professor of linguistics who specialized in underworld argot, Maurer won the trust of hundreds of swindlers, who let him in on not simply their language but their folkways and the astonishingly complex and elaborate schemes whereby unsuspecting marks, hooked by their own greed and dishonesty, were “taken off” – i.e. cheated—of thousands upon thousands of dollars. *The Big Con* is a treasure trove of American lingo (the write, the rag, the payoff, ropers, shills, the cold poke, the

The belief that cholesterol and saturated fat cause heart disease is one of the most fundamental tenets of modern medicine. It is also completely false. In "The Great Cholesterol Con" you will learn that: * Heart disease is not caused by saturated fat nor elevated blood cholesterol; * People with low cholesterol levels live shorter lives; * Populations consuming high saturated fat diets often enjoy very low rates of heart disease; * Many dietary recommendations made by 'experts' to reduce heart disease have actually been shown in animal and human studies to increase heart disease, cancer, diabetes and obesity; * The primary force behind the anti-cholesterol paradigm is not public health, but profit! This meticulously researched book mercilessly demolishes what may well be the biggest and most successful scam in the history of medicine. Most importantly, you'll discover what really promotes heart disease and what you can do to prevent it! Updated and extended 2012 version.
