Already 3D printed metal and plastic parts are being fitted into products that range from jet engines to medical devices and personalized shoes. Next generation 3D printing processes are also being developed, while the convergence of 3D printing with other technologies presents significant opportunities for localization and more sustainable production methods. The 3D printing industry is indeed in a state of radical transition as it evolves from selling niche rapid prototyping equipment, to supplying cutting-edge digital manufacturing systems."--Provided by publisher
