The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.

A photo, an idea, and simple crafting skills are all you need to transform your pictures into useful, fun, giftable art. With clear DIY instructions, Photojojo! by Amit Gupta and Kelly Jensen shows you how to turn your forgotten photos into ingenious photo projects. Do you have lots of pics of friends and family you want to show off? Make a sleek, stylish photo display rail so you can change them up at a moment's notice. Need something to play with? Make photo slider puzzles, Rubik's cubes, and temporary tattoos. Or spruce up your pad with a photo chandelier or a giant wall mural you can print at home! All the projects use basic materials and are easy enough to whip up in an afternoon. Once you're armed with what you can do with all your images, check out Photojojo's inspiring ideas to get you shooting photographs more creatively. Investigate the world from a

canine perspective with the amazing doggie cam, or grab your friends and head out on a photo safari. Make a sneaky hidden jacket camera and turn string, a washer, and a screw into a monopod that fits in your pocket, MacGyver-style. Learn how to motivate yourself to take a photo every day with project 365, or get the little ones involved with Photojojo's head-spinning photography method: because you + kid + centrifugal force = awesome. Yep, photography just became a whole lot more fun.

BBC Wildlife 'A comprehensive and brilliantly illustrated guide to the pleasures and mysteries of digital photography, from choosing equipment to taking pictures, working on them at the computer and selling your work. If you are serious about your hobby, this is for you.' RSPB Birds

The Encyclopedia of Twentieth-Century Photography explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging, interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form, while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

Kayla McHenry's sweet sixteen sucks! Her dad left, her grades dropped, and her BFF is dating the boy Kayla's secretly loved for years. Blowing out her candles, Kayla thinks: I wish my birthday wishes actually came true. Because they never freakin' do. Kayla wakes the next day to a life-sized, bright pink My Little Pony outside her window. Then a year's supply of gumballs arrives. A boy named Ken with a disturbing resemblance to the doll of the same name stalks her. As the ghosts of Kayla's wishes-past appear, they take her on a wild ride . . . but they MUST STOP. Because when she was fifteen? She wished Ben Mackenzie would kiss her. And Ben is her best friend's

boyfriend.

This book includes a selection of reviewed papers presented at the 9th China Academic Conference on Printing and Packaging, which was held in November 2018 in Shandong, China. The conference was jointly organized by the China Academy of Printing Technology and Qilu University of Technology (Shandong Academy of Sciences). With 8 keynote talks and over 200 presented papers on graphic communication and packaging technologies, the conference attracted more than 300 scientists. The proceedings cover the recent findings in color science and technology, image processing technology, digital media technology, mechanical engineering and numerical control, materials and detection, digital process management technology in printing and packaging, and other technologies. As such, the book is of interest to university researchers, R&D engineers and graduate students in the field of graphic arts, packaging, color science, image science, material science, computer science, digital media, and network technology.
