The Musical Playground is a new and fascinating account of the musical play of school-aged children. Based on fifteen years of ethnomusicological field research in urban and rural school playgrounds around the globe, Kathryn Marsh provides unique insights into children's musical playground activities across a comprehensive scope of social, cultural, and national contexts. With a sophisticated synthesis of ethnomusicological and music education approaches, Marsh examines sung and chanted games, singing and dance routines associated with popular music and sports chants, and more improvised and spontaneous chants, taunts, and rhythmic movements. The book's index of more than 300

game genres is a valuable reference to readers in the field of children's folklore, providing a unique map of game distribution across an array of cultures and geographical locations. On the companion website, readers will be able to view on streamed video, field recordings of children's musical play throughout the wide range of locations and cultures that form the core of Marsh's study, allowing them to better understand the music, movement, and textual characteristics of musical games and interactions. Copious notated musical examples throughout the book and the website demonstrate characteristics of game genres, children's generative practices, and reflections of cultural influences on game practice, and valuable, practical recommendations are made for developing pedagogies which reflect more child-centred and less Eurocentric views of children's play, musical learning, and musical creativity. Marsh brings readers to playgrounds in Australia, Norway, the USA, the United Kingdom, and Korea, offering them an important and innovative study of how children transmit, maintain, and transform the games of the playground. The Musical Playground will appeal to practitioners and researchers in music education, ethnomusicology, and folklore.

"Theatre is not part of our vocabulary": Sipho Sepamla's provocation in 1981, the year of famous anti-apartheid play *Woza Albert!*, prompts the response, yes indeed, it is. *A Century of South African Theatre* demonstrates the impact of theatre and other performances-pageants, concerts, sketches, workshops, and performance art-over the last hundred years. Its coverage includes African responses to pro-British pageants celebrating white Union in 1910, such as the Emancipation Centenary of the abolition of British colonial slavery in 1934 organized by Griffiths Motsieloa and HIE Dhlomo, through anti-apartheid testimonial theatre by Athol Fugard, Maishe Maponya, Gcina Mhlophe, and many others,

right up to the present dramatization of state capture, inequality and state violence in today's unevenly democratic society, where government has promised much but delivered little. Building on Loren Kruger's personal observations of forty years as well as her published research, *A Century of South African Theatre* provides theoretical coordinates from institution to public sphere to syncretism in performance in order to highlight South Africa's changing engagement with the world from the days of Empire, through the apartheid era to the multi-lateral and multi-lingual networks of the 21st century. The final chapters use the Constitution's injunction to improve wellbeing as a prompt to examine the dramaturgy of new problems, especially AIDS and domestic violence, as well as the better known performances in and around the Truth and Reconciliation Commission. Kruger critically evaluates internationally known theatre makers, including the signature collaborations between animator/designer William Kentridge, and Handspring Puppet Company, and highlights the local and transnational impact of major post-apartheid companies such as Magnet Theatre.

The names of the islands are different depending on who you talk to, their very locations seem to twist and shift. Some islands have been sculpted into vast musical instruments, others are home to lethal creatures, others the playground for high society. Hot winds blow across the archipelago and a war fought between two distant continents is played out across its waters. THE ISLANDERS serves both as an untrustworthy but enticing guide to the islands, an intriguing, multi-layered tale of a murder and the suspect legacy of its appealing but definitely untrustworthy narrator.

Music is an expression of feelings of the soul conveyed through the medium of sound. But not all sounds are music. It might be said that only an organised sound or series of sounds can be called music. Thus, music is connected to the eternal and constant flow and order of the universe, to the laws and rhythms of nature. It can also be said that musical order is comparable to the natural order of the universe. There are laws of a certain nature in the natural sciences and likewise in music there are structures and procedures, or even rules, that should be followed to produce beautiful music. The International Conference "Innovations for 21st Century Music Education and Research" provided a timely opportunity to take stock of the latest developments in music education and brought together educators, researchers and members of the broader community in a welcoming forum in which they were able to express theoretical and practical views, concepts, research results and principles to help support the further development of music education.

to direct choirs in schools, synagogues, churches and communities; for experienced children's choir directors who wish to know more about orchestral repertoire for treble voices, conducting an orchestra, and preparing a children's choir to sing a major work with a professional orchestra. The underlying educational philosophy is sound; the author sees development of musicianship through singing as the primary goal of a children's choir program. This philosophy differs dramatically from the traditional concept of the conductor as all-knowing and the singers as receptacles. An outstanding aspect of the book is how the author leads the reader to an understanding of how to teach musicianship. Developing literacy in the choral setting is a mysterious, amorphous process to many conductors, but the author clearly outlines this important process with practical suggestions, well-documented examples, and a clear reading style which will reach readers on many levels. The comprehensive repertoire, skill-building sheets, and programs for all types of children's choirs will provide teachers with immediate and highly valuable resources. Growing out of the collaborative research of an American ethnomusicologist and Zimbabwean musician, Paul F. Berliner's *The Art of Mbira* documents the repertory for a keyboard instrument known generally as mbira. At the heart of this work lies the analysis of the improvisatory processes that propel mbira music's magnificent creativity. In this book, Berliner provides insight into the communities of study, performance, and worship that surround mbira. He chronicles how master player Cosmas Magaya and his associates have developed their repertory and practices over more than four decades, shaped by musical interaction, social and political dynamics in Zimbabwe, and the global economy of the music industry. At once a detailed exposition of the music's forms and practices, it is also an indispensable historical and cultural guide to mbira in a changing world. Together with Berliner and Magaya's compendium of mbira compositions, *Mbira's Restless Dance*, *The Art of Mbira* breaks new ground in the depth and specificity of its exploration of an African musical tradition, and in the entwining of the authors' collaborative voices. It is a testament to the powerful relationship between music and social life—and the rewards of lifelong
