Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Housed in the former 16th-century convent of Santo Domingo church, now the Regional Museum of Oaxaca, Mexico, is an important collection of textiles representing the area's indigenous cultures. The collection includes a wealth of exquisitely made traditional weavings, many that are now considered rare. *The Unbroken Thread: Conserving the Textile Traditions of Oaxaca* details a joint project of the Getty Conservation Institute and the National Institute of Anthropology and History (INAH) of Mexico to conserve the collection and to document current use of textile traditions in daily life and ceremony. The book contains 145 color photographs of the valuable textiles in the collection, as well as images of local weavers and project participants at work. Subjects include anthropological research, ancient and present-day weaving techniques, analyses of natural dyestuffs, and discussions of the ethical and practical considerations involved in working in Latin America to conserve the materials and practices of living cultures.

In this radiant new collection, Franz Wright shares his regard for life in all its forms and his belief in the promise of blessing and renewal. As he watches the "Resurrection of the little apple tree outside / my window," he shakes off his fear of mortality, concluding "what death . . . There is only / mine / or yours,-- / but the world / will be filled with the living." In prayerlike poems he invokes the one "who spoke the world / into being" and celebrates a dazzling universe—snowflakes descending at nightfall, the intense yellow petals of the September sunflower, the planet adrift in a blizzard of stars, the simple mystery of loving other people. As Wright overcomes a natural tendency toward loneliness and isolation, he gives voice to his hope for "the only animal that commits suicide," and, to our deep pleasure, he arrives at a place of gratitude that is grounded in the earth and its moods.

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955–1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

From the authors of the bestselling *Hack Proofing Your Network! OPEC, Amazon, Yahoo! and E-bay: If these large, well-established and security-conscious web sites have problems, how can anyone be safe? How can any programmer expect to develop web applications that are secure? Hack Proofing Your Web Applications* is the only book specifically written for application developers and webmasters who write programs that are used on web sites. It covers Java applications, XML, ColdFusion, and other database applications. Most hacking books focus on catching the hackers once they've entered the site; this one shows programmers how to design tight code that will deter hackers from the word go. Comes with up-to-the-minute web based support and a CD-ROM containing source codes and sample testing programs Unique approach: Unlike most hacking books this one is written for the application developer to help them build less vulnerable programs

Leading scholars report on current research that demonstrates the central role of cultural evolution in explaining human behavior. Over the past few decades, a growing body of

research has emerged from a variety of disciplines to highlight the importance of cultural evolution in understanding human behavior. Wider application of these insights, however, has been hampered by traditional disciplinary boundaries. To remedy this, in this volume leading researchers from theoretical biology, developmental and cognitive psychology, linguistics, anthropology, sociology, religious studies, history, and economics come together to explore the central role of cultural evolution in different aspects of human endeavor. The contributors take as their guiding principle the idea that cultural evolution can provide an important integrating function across the various disciplines of the human sciences, as organic evolution does for biology. The benefits of adopting a cultural evolutionary perspective are demonstrated by contributions on social systems, technology, language, and religion. Topics covered include enforcement of norms in human groups, the neuroscience of technology, language diversity, and prosociality and religion. The contributors evaluate current research on cultural evolution and consider its broader theoretical and practical implications, synthesizing past and ongoing work and sketching a roadmap for future cross-disciplinary efforts. Contributors Quentin D. Atkinson, Andrea Baronchelli, Robert Boyd, Briggs Buchanan, Joseph Bulbulia, Morten H. Christiansen, Emma Cohen, William Croft, Michael Cysouw, Dan Dediu, Nicholas Evans, Emma Flynn, Pieter François, Simon Garrod, Armin W. Geertz, Herbert Gintis, Russell D. Gray, Simon J. Collects outrageous philosophies and whimsical rants by the syndicated radio personality and podcaster, detailing personal anecdotes with complaints about such topics as Lady Gaga, public restrooms, and peanut butter and jelly sandwiches.

The focus of this Special Issue is the analysis of the role played by sacrifice in complex secular and modern societies, in which, the concept of 'emotional self-restriction' (Freud, 201; Elias, 2009), as a keystone of civilization, has collapsed. Today, the old idea of sacrifice is superseded by the idea of 'useless sacrifice' (Duvignaud, 1997), not because the logic of excess carried by sacrifice is opposite to the capitalistic idea of efficacy, but mainly because the contemporary actor is far away from any ideas of containment, restraint, or control. At the base of current civilizations, 'instinctive sacrifice' is not yet the rule. We could be closer to a new version of the 'intellectual sacrifice' (Weber, 2004). The weakening of the forces of transcendence (Reckwitz, 2012) in the secular age sets up spaces of 'symbolic exchange' (Baudrillard, 1980), which play the articulator role in our hyperfragmented society. In this context, the idea of compensatory loss remains present in current wars and migratory conflicts, in the economic life of unregulated capitalism, in the new imperative of corporal beauty, in global sports competitions, and so on. All of these are contexts, current contexts, where sacrifice plays a substantive role for understanding our age. In Merlin Donald's terms of "evolutive evolution" (1991) and with the force that drives the dynamics of change through all societies, we understand that sacrifice performs a role in current societies, but a role in which its meaning as well as its function have already changed. The aim of this Special Issue is to analyze and explain what this role is, studying some of the different social faces that it presents. Our hypothesis is radically sociological, because we understand that different dynamics of change have exerted a transformative influence over sacrifice.

I recommend this book in the highest possible terms."—Robert Mathiesen, Professor Emeritus, Brown University, and co-author of The Rede of the Wicca "This wonderful book takes the concept of sigil well beyond the simplistic, basic notions of the [Austin Osman] Spare method, and opens the door on the deeper art and potential of sigils as it applies across the spectrum of spellcraft. Any student of the occult with an interest in sigils and sigil crafting: this is a book you need."—Arjil, teacher of Just Effing Magick and creator of the Ellis Sigil

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

European traders and soldiers established a foothold on Timor in the course of the seventeenth century, motivated by the quest for the commercially vital sandalwood and the intense competition between the Dutch and the Portuguese. Lords of the Land, Lords of the Sea focuses on two centuries of contacts between the indigenous polities on Timor and the early colonials, and covers the period 1600-1800.

"Beyond the Horizons: The Lockheed Story is the story of those turbulent eighty-two years during which Lockheed achieved fantastic successes and endured occasional failures. Lockheed aircraft set innumerable records and were flown by great pioneering aviators such as Amelia Earhart, Wiley Post, and Howard Hughes. Lockheed engineers achieved fame usually reserved for film stars: Men like the great Kelly Johnson and Ben Rich advanced the world of aviation with their genius, and were honored as legends in their own time. Yet the secret of Lockheed lies in the spirit of family that illuminated the corporation over the years and permitted it to gain great triumphs and survive great tragedies. Over eight decades, Lockheed's unique corporate culture has enabled the company to thrive despite fierce competition. Making the right choices in leadership and technology at the right time contributed to their success, and here is the inside story of the people responsible for transforming Lockheed into the most profitable, prestigious, and influential company in the aerospace industry." --

Ben is stuck. A development lead with a strong vision for how the intersection of development and operations at his office can be improved, he can't help but feel overwhelmed and discouraged by common problems such as slow turnaround time, rushed and ineffective handover documentation, mounting technical debt, and a lagging QA process.
