Brett Morton wanted to prove the experts were wrong. "Win at roulette?" they scoffed. "Impossible." You could almost hear them say "Bah! Humbug!" So he set about learning how to play, observing why people won and lost. Over the past ten years, he has debated with casino staff, statisticians, mathematicians, friends and other experts. All but one were convinced that the casino could not be beaten – or if it could, then not consistently. But Morton insists the experts are mistaken, something he has learned through sheer discipline, by keeping it simple and understanding that winning at roulette

is a percentage game. This book explains in plain language just how easy it is to win or lose at roulette. Winning occasionally is simple. His aim was to win consistently. Morton, after watching, playing and listening all over the world, distilled the information, working out why he too had been losing too often. From that base, Morton realised that winning every visit is impossible. Each spin of the wheel is a new and usually random event. Every spin is a fight against the casino's advantages. It was a challenge – to debunk the theorists, especially those who had never played. His research and hard work proved he was right: winning consistently is possible. Morton proved that mathematical theory and clinical statistics, flawless in concept, blinker common sense and have no place in determining why people win and lose in casinos. After all, taking British casinos as a good example, the odds against the player can be as small as 1.31% - yet the casinos still expect to win between 20 and 30% from roulette players over a year. Enough said! Despite the casino's edge and even playing with the American double-zero, roulette tackled with skill, discipline and experience is a game at which consistent winning is perfectly possible. But consistent winning does not mean that every casino visit ends with a celebration. It means winning most of the time and ensuring that losses on the horrific days are contained and do not destroy all the other good work. Morton explains the methods

Today everyone—whether they know it or not—is in the emotional transportation business. More and more, success is won by creating compelling stories that have the power to move partners, shareholders, customers, and employees to action. Simply put, if you can't tell it, you can't sell it. And this book tells you how to do both. Historically, stories have always been igniters of action, moving people to do things. But only recently has it become clear that purposeful stories—those created with a specific mission in mind—are absolutely essential in persuading others to support a vision, dream or cause. Peter Guber, whose executive and entrepreneurial accomplishments have made him a success

in multiple industries, has long relied on purposeful story telling to motivate, win over, shape, engage and sell. Indeed, what began as knack for telling stories as an entertainment industry executive has, through years of perspiration and inspiration, evolved into a set of principles that anyone can use to achieve their goals. In *Tell to Win*, Guber shows how to move beyond soulless Power Point slides, facts, and figures to create purposeful stories that can serve as powerful calls to action. Among his techniques:

- * Capture your audience's attention first, fast and foremost
- * Motivate your listeners by demonstrating authenticity
- * Build your tell around "what's in it for them"
- * Change passive listeners into active participants
- * Use "state-of-the-heart" technology online and offline to make sure audience commitment remains strong

To validate the power of telling purposeful stories, Guber includes in this book a remarkably diverse number of "voices" —master tellers with whom he's shared experiences. They include YouTube founder Chad Hurley, NBA champion Pat Riley, clothing designer Normal Kamali, "Mission to Mars" scientist Gentry Lee, Under Armour CEO Kevin Plank, former South African president Nelson Mandela, magician David Copperfield, film director Steven Spielberg, novelist Nora Roberts, rock legend Gene Simmons, and physician and author Deepak Chopra. After listening to this extraordinary mix of voices, you'll know how to craft, deliver—and own—a story that is truly compelling, one capable of turning others into viral advocates for your goal.

Among the intriguing topics covered are the most popular (and the most foolish) combinations of numbers, why it is impossible to improve the odds of any legitimate lottery, how popular (and thus unprofitable) an attractive-looking ticket might be, why not to follow the suggested numbers from so-called "expert advisors" and why it is important to avoid winning combinations of past drawings.
