Women seeking to express concerns about childbirth or to challenge institutionalized medicine by writing online birth plans or birth stories exercise rhetorical agency in undeniably feminist ways. In *Writing Childbirth: Women's Rhetorical Agency in Labor and Online*, author Kim Hensley Owens explores how women create and use everyday rhetorics in planning for, experiencing, and writing about childbirth. Drawing on medical texts, popular advice books, and online birth plans and birth stories, as well as the results of a childbirth writing survey, Owens considers how women's agency in childbirth is sanctioned, and how it is not. She examines how women's rhetorical choices in writing interact with institutionalized medicine and societal norms. *Writing Childbirth* reveals the contradictory messages women receive about childbirth, their conflicting expectations about it, and how writing and technology contribute to and reconcile these messages and expectations. Demonstrating the value of extending rhetorical investigations of health and medicine beyond patient-physician interactions and the discourse of physicians, *Writing Childbirth* offers fresh insight into feminist rhetorical agency and technology and expands our understanding of

the rhetorics of health and medicine.

Rhetoric is among the most ancient academic disciplines, and we all use it every day whether expertly or not. This book is a lively set of lessons on the subject. It is about rhetorical figures: practical ways of applying old and powerful

principles--repetition and variety, suspense and relief, concealment and surprise, the creation of expectations and then the satisfaction or frustration of them--to the composition of a simple sentence or a complete paragraph. --from publisher description.

The Address was delivered at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, on the afternoon of Thursday, November 19, 1863, during the American Civil War, four and a half months after the Union armies defeated those of the Confederacy at the decisive Battle of Gettysburg. In just over two minutes, Lincoln invoked the principles of human equality espoused by the Declaration of Independence and redefined the Civil War as a struggle not merely for the Union, but as "a new birth of freedom" that would bring true equality to all of its citizens, and that would also create a unified nation in which states' rights were no longer dominant. The Writing & Rhetoric series method employs fluent reading, careful listening, models for imitation, and progressive steps. It assumes that students learn the best by reading excellent, whole-story examples of literature and by growing their skills through imitation. Each exercise is intended to impart a skill (or tool) that can be employed in all kinds of writing and speaking. The exercises are arranged from simple to more complex. What's more, the exercises are cumulative, meaning that later exercises incorporate the skills acquired preceding exercises.

This series is a step-by-step apprenticeship in the art of writing and rhetoric. *Fable*, the first book in the Writing & Rhetoric series, teaches students the practice of close reading and comprehension, summarizing a story aloud and in writing, and amplification of a story through description and dialogue. Students learn how to identify different kinds of stories; determine the beginning, middle, and end of stories; recognize point of view; and see analogous situations, among other essential tools. The Writing & Rhetoric series recovers a proven method of teaching writing, using fables to teach beginning writers the craft of writing well.

Designed to help all writers learn to use style as a rhetorical tool, taking into account audience, purpose, context, and occasion, *The Writer's Style* is not only a style guide for a new generation but a new generation of style guide. The book helps writers learn new strategies inductively, by looking at firsthand examples of how they operate rhetorically, as well as deductively, through careful explanations in the text. The work focuses on invention, allowing writers to develop their own style as they analyze writing from varied genres. In a departure from the deficiency model associated with other commonly used style guides, author Paul Butler encourages writers to see style as a malleable device to use for their own purposes rather than a domain of rules or privilege. He encourages writing instructors to present style as a practical, accessible, and rhetorical tool, working with models that connect to a broad range of writing situations—including traditional texts like essays, newspaper articles, and creative nonfiction as well as digital texts in the form of tweets, Facebook postings, texts, email, visual rhetoric, YouTube videos, and others. Though designed for use in first-year composition courses in which students are learning to write for various audiences, purposes, and contexts, *The Writer's Style* is a richly layered work that will serve anyone considering how style applies to their professional, personal, creative, or academic writing.

Examines genre and its educational purposes from a variety of perspectives. The text is not limited to literary genres or to ideas of genres as formal conventions; it provides a theoretical definition of genre as rhetorical, dynamic and flexible, ideological and constraining, to an examination of the role of genres in different communities.

"This book exists, is here for you as a resource because we, the authors/editors of this text (Suzanne Blum Malley and Ames Hawkins), saw very similar, very exciting things happening in our classrooms using ethnographic research methods in our inquiry-based first-year writing classrooms. We have watched our students develop strong voices as writers, while also using critical analytical skills and addressing important ideas of ethics, identity, and representation. In our classrooms, we have seen a greater level of investment in ethnographic projects than we have seen in more traditional rhetorically based assignments. Ethnographic writing, by creating a very authentic role for the researcher and a connection to community, offers a means to address the alienation and/or boredom that many

non-traditional writers and first-year college students feel when confronted with the traditional composition curriculum—any curriculum, actually. More importantly, ethnographic research allows students to access what can seem so terribly difficult when framed in other assignments: to pursue a line of inquiry rather than a topic, to research ethically, and to write with authority. Though we initially wrote this text with the first-year writing classroom in mind, we have come to understand that there are many courses that also present students with ethnographic writing assignments. These courses may or may not be designed to spend much time on the question of how to get started with these projects. In addition, instructors might want to supplement the basic methodological approach with their own course content. We are also aware that textbook size and cost has exploded in recent years. We believe in preserving the internet as an open-source space and wish to reinforce our belief with practice. As a result of these realizations, we have reorganized the project in order to 1) Make it relevant and accessible to students in nearly any college classroom who might be assigned an ethnographic writing project; 2) Allow instructors to supplement the core methodology (presented here in Chapters 1–6), as they see fit, using any number of Supplemental Modules that offer additional materials, lenses, and multi-modal examples of and for issues and ideas

discussed in the core text. 3) Make it accessible and available, via the internet and other technological platforms, to students and instructors everywhere. A disclaimer: we want to make clear that while we use and invoke methodological principles and practices associated with ethnography, we are not claiming *Engaging Communities* as a text that teaches ethnography as a research methodology. This book has been designed to help students (most likely undergraduates, perhaps high school, possibly graduates ) envision interesting, hands-on research projects that are eventually converted—translated—into written text. Throughout the text, we often use the word ethnographic in order to describe our methodological presentation and theoretical concerns as this term reflects the pedagogical (teaching) and rhetorical (arguing) concerns of ethnography, rather than the actual disciplinary understanding of the methodology. We choose to use to teach this way because ethnographic writing allows for specific discussion regarding how to involve and interest a reader, in evoking physical and emotional connection with writing, rather than simply becoming informed or persuaded by any specific piece of writing"--Back cover.

Drawing on key texts from the rhetorical tradition, as well as on newer approaches from linguistics and literary stylistics, Fahnestock demonstrates how word choice, sentence form, and passage construction can combine to create effective spoken and written arguments. With examples from political speeches, non-fiction works, and newspaper reports, *Rhetorical Style* surveys the arguer's options at the word, sentence, interactive, and passage levels, and illustrates the enduring usefulness of rhetorical stylistics in analyzing and constructing arguments.

"A galvanizing exposé" of America's trash problem from plastic in the ocean to "wasteful packaging, bogus recycling, and flawed landfills and incinerators" (Booklist, starred review). Eat a take-out meal, buy a pair of shoes, or read a newspaper, and you're soon faced with a bewildering amount of garbage. The United States is the planet's number-one producer of trash. Each American throws out 4.5 pounds daily. But garbage is also a global problem. Today, the Pacific Ocean contains six times more plastic waste than zooplankton. How did we end up with this much rubbish, and where does it all go? Journalist and filmmaker Heather Rogers answers these questions by taking readers on a grisly and fascinating tour through the underworld of garbage. *Gone Tomorrow* excavates the history of rubbish handling from the nineteenth century to the present, pinpointing the roots of today's waste-addicted society. With a "lively authorial voice," Rogers draws connections between modern industrial production, consumer culture, and our throwaway lifestyle (New York Press). She also investigates the politics of recycling and the export of trash to poor countries, while offering a potent argument for change. "A clear-thinking and peppery writer, Rogers presents a galvanizing exposé of how we became the planet's trash monsters. . . . [*Gone Tomorrow*] details everything that is wrong with today's wasteful packaging, bogus recycling, and flawed landfills and incinerators. . . . occasion, and purpose. In *Teaching Arguments*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to help students at all levels read, write, listen, speak, and think rhetorically. Jennifer believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. *Teaching Arguments* will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments--a major cornerstone for being not just college- and career-ready but ready for the challenges of the world.

conversations among rhetoricians, technical communicators, software studies scholars, and programming practitioners to demonstrate how software code and its surrounding discourse are highly rhetorical forms of communication. He considers examples ranging from large, well-known projects like Mozilla Firefox to small-scale programs like the “FizzBuzz” test common in many programming job interviews. Undertaking specific examinations of code texts as well as the contexts surrounding their composition, Brock illuminates the variety and depth of rhetorical activity taking place in and around code, from individual differences in style to changes in large-scale organizational and community norms. Rhetorical Code Studies holds significant implications for digital communication, multimodal composition, and the cultural analysis of software and its creation. It will interest academics and students of writing, rhetoric, and software engineering as well as technical communicators and developers of all types of software.

thorough study of the intersections between scholarly literary criticism and undergraduate writing in introductory literature courses. *Rhetorical Strategies and Genre Conventions in Literary Studies* is the first examination of rhetorical practice in the research and teaching of literary study and a detailed assessment of the ethics and efficacy of explicit instruction in the rhetorical strategies and genre conventions of the discipline. Using rhetorical analysis, ethnographic observation, and individual interviews, Wilder demonstrates how rhetorical conventions play a central, although largely tacit, role in the teaching of literature and the evaluation of student writing. Wilder follows a group of literature majors and details their experiences. Some students received experimental, explicit instruction in the special topoi, while others received more traditional, implicit instruction. Arguing explicit instruction in disciplinary conventions has the potential to help underprepared students, Wilder explores how this kind of instruction may be incorporated into literature courses without being overly reductive. Taking into consideration student perspectives, Wilder makes a bold case for expanding the focus of research in writing in the disciplines and writing across the curriculum in order to grasp the full complexity of disciplinary discourse.

While it has long been understood that the circulation of discourse, bodies, artifacts, and ideas plays an important constitutive force in our cultures and communities, circulation, as a concept and a phenomenon, has been underexamined in studies of rhetoric and writing. In an effort to give circulation its rhetorical due, *Circulation, Writing, and Rhetoric* introduces a wide range of studies that foreground circulation in both theory and practice. Contributors to the volume specifically explore the connections between circulation and public rhetorics, urban studies, feminist rhetorics, digital communication, new materialism, and digital research.

Circulation is a cultural-rhetorical process that impacts various ecologies, communities, and subjectivities in an ever-increasing globally networked environment. As made evident in this collection, circulation occurs in all forms of discursive production, from academic arguments to neoliberal policies to graffiti to tweets and bitcoins. Even in the case of tombstones, borrowed text achieves only partial stability before it is recirculated and transformed again. This communicative process is even more evident in the digital realm, the underlying infrastructures of which we have yet to fully understand. As public spaces become more and more saturated with circulating texts and images and as networked relations come to the center of rhetorical focus, *Circulation, Writing, and Rhetoric* will be a vital interdisciplinary resource for approaching the contemporary dynamics of rhetoric and writing. experience of becoming the first woman nominated for president by a major party in an election marked by rage, sexism, exhilarating highs and infuriating lows, stranger-than-fiction twists, Russian interference, and an opponent who broke all the rules. “At her most emotionally raw” (People), Hillary describes what it was like to run against Donald Trump, the mistakes she made, how she has coped with a shocking and devastating loss, and how she found the strength to pick herself back up afterward. She tells readers what it took to get back on her feet—the rituals, relationships, and reading that got her through, and what the experience has taught her about life. In this “feminist manifesto” (The New York Times), she speaks to the challenges of being a strong woman in the public eye, the criticism over her voice, age, and appearance, and the double standard confronting women in politics. Offering a “bracing... guide to our political arena” (The Washington Post), *What Happened* lays out how the 2016 election was marked by an unprecedented assault on our democracy by a foreign adversary. By analyzing the evidence and connecting the dots, Hillary shows just how dangerous the forces are that shaped the outcome, and why Americans need to understand them to protect our values and our democracy in the future. The election of 2016 was unprecedented and historic. *What Happened* is the story of that campaign, now with a new epilogue showing how Hillary grappled with many of her worst fears coming true in the Trump Era, while finding new hope in a surge of civic activism, women running for office, and young people marching in the streets.

Becoming rhetorical is a transformation that allows students to identify rhetorical problems and respond to them with arguments, no matter the course or context from which the problems emerge. In *BECOMING RHETORICAL*, author Jodie Nicotra takes students beyond the view of the rhetorical situation as being composed of communicator, audience, and message, encouraging them also to consider important aspects such as exigence, purpose, and the means of communication. Students learn to analyze and compose in textual, visual, and multimodalities -- from evaluating an op-ed piece, to making a video of a consumer product, to creating an entire public awareness campaign -- thereby becoming confident critical thinkers in a 21st century multimedia world. Comprised of a study spanning over five years, this text looks at four engineering co-op students as they write at work. Since the contributors have a foot in both worlds -- work and school -- the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like. Primarily concerned with whether engineers see their writing as rhetorical or persuasive, the study attempts to describe the students' changing understanding of what it is they do when they write. Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified: \* a reverence for data, and \* the hierarchical structure of the

organizations in which engineering is most commonly done. Both of these features discourage an open recognition of persuasion. Finally, the study shows that the four co-op students learned most of what they knew about writing at work by engaging in situated practice in the workplace, rather than by attending formal classes. In *The Art of Rhetoric*, Aristotle demonstrates the purpose of rhetoric—the ability to convince people using your skill as a speaker rather than the validity or logic of your arguments—and outlines its many forms and techniques. Defining important philosophical terms like *ethos*, *pathos*, and *logos*, Aristotle establishes the earliest foundations of modern understanding of rhetoric, while providing insight into its historic role in ancient Greek culture. Aristotle’s work, which dates from the fourth century B.C., was written while the author lived in Athens, remains one of the most influential pillars of philosophy and has been studied for centuries by orators, public figures, and politicians alike. globe who here contribute to our understanding of how digital rhetoric is changing the landscape of writing. Increasingly, all of us must navigate networks of information, compose not just with computers but an array of mobile devices, increase our technological literacy, and understand the changing dynamics of authoring, writing, reading, and publishing in a world of rich and complex texts. Given such changes, and given the diverse ways in which younger generations of college students are writing, communicating, and designing texts in multimediated, electronic environments, we need to consider how the very act of writing itself is undergoing potentially fundamental changes. These changes are being addressed increasingly by the emerging field of digital rhetoric, a field that attempts to understand the rhetorical possibilities and affordances of writing, broadly defined, in a wide array of digital environments. Of interest to both researchers and students, this volume provides insights about the fields of rhetoric, writing, composition, digital media, literature, and multimodal studies.

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is

written that makes you feel and respond the way you do? The argument of this book is that the earliest tradition of Western rhetoric, the classical perspective of Aristotle and Cicero, continues to have the greatest impact on writing instruction--albeit an unconscious impact. This occurs despite the fact that modern rhetoric no longer accepts either the views of mind, language, and world underlying ancient theory or the concepts about discourse, knowledge, and communication presented in that theory. As a result, teachers are depending on ideas as outmoded as they are unreflectively accepted. Knoblauch and Brannon maintain that the two traditions are fundamentally incompatible in their assumptions and concepts, so that writing teachers must make choices between them if their teaching is to be purposeful and consistent. They suggest that the modern tradition offers a richer basis for instruction, and they show what teaching from that perspective looks like and how it differs from traditional teaching.

**NEW YORK TIMES BESTSELLER** • From an award-winning journalist at The Atlantic, these searing essays make a damning case that cruelty is not merely an unfortunate byproduct of the Trump administration but its main objective and the central theme of the American project. with the ease of a grand maestro.” Like many of us, Adam Serwer didn’t know that Donald Trump would win the 2016 election. But over the four years that followed, the Atlantic staff writer became one of our most astute analysts of the Trump presidency and the volatile powers it harnessed. The shock that greeted Trump’s victory, and the subsequent cruelty of his presidency, represented a failure to confront elements of the American past long thought vanquished. In this searing collection, Serwer chronicles the Trump administration not as an aberration but as an outgrowth of the inequalities the United States was founded on. Serwer is less interested in the presidential spectacle than in the ideological and structural currents behind Trump’s rise—including a media that was often blindsided by the ugly realities of what the administration represented and how it came to be. While deeply engaged with the moment, Serwer’s writing is also haunted by ghosts of an unresolved American past, a past that torments the present. In bracing new essays and previously published works, he explores white nationalism, myths about migration, the political power of police unions, and the many faces of anti-Semitism. For all the dynamics he examines, cruelty is the glue, the binding agent of a movement fueled by fear and exclusion. Serwer argues that rather than pretending these four years didn’t happen or dismissing them as a brief moment of madness, we must face what made them possible and continues to endure. Unless we confront these toxic legacies, the fragile dream of American multiracial democracy will remain vulnerable to the forces that have nearly destroyed it time and again.
