"This is the most practical, hard-nosed, generous, direct, and useful guide to writing fiction." —Brad Watson Finally, a truly creative—and hilarious—guide to creative writing, full of encouragement and sound advice. Provocative and reassuring, nurturing and wise, *The Lie That Tells a Truth* is essential to writers in general, fiction writers in particular, beginning writers, serious writers, and anyone facing a blank page. John Dufresne, teacher and the acclaimed author of *Love Warps the Mind a Little* and *Deep in the Shade of Paradise*, demystifies the writing process. Drawing upon the wisdom of literature's great craftsmen, Dufresne's lucid essays and diverse exercises initiate the reader into the tools, processes, and techniques of writing: inventing compelling characters, developing a voice, creating a sense of place, editing your own words. Where do great ideas come from? How do we recognize them? How can language capture them? In his signature comic voice, Dufresne answers these questions and more in chapters such as "Writing Around the Block," "Plottery," and "The Art of Abbreviation." Dufresne demystifies the writing process, showing that while the idea of writing may be overwhelming, the act of writing is simplicity itself.

What can visual artifacts tell us about the past? How can we interpret them rigorously, weaving their formal and material qualities into rich social contexts to reach wider historical conclusions? Unfolding key historiographical and methodological issues, *Writing Visual Histories* equips students to answer these questions, showing visual analysis to be a key skill in historical research. A multifaceted structure makes this a practical guide for writing and reflecting on visual

histories. A first section includes six case studies -- on topics ranging from medieval heraldry to Life magazine. These examples are followed by an exploration of essential concepts that inform historical thinking about visual matters, a treatment of disciplinary practices, and discussion of the practicalities (such as accessing museum collections and organising permissions) that scholars working with visual sources have to navigate. This book is an invaluable tool kit for opening up a historical understanding of visual phenomena and practices of looking, and for writing that takes an integrated approach to studies of the past.

Robert Olen Butler, winner of the Pulitzer Prize in Fiction, teaches graduate fiction at Florida State University — his version of literary boot camp. In *From Where You Dream*, Butler reimagines the process of writing as emotional rather than intellectual, and tells writers how to achieve the dreamspace necessary for composing honest, inspired fiction. Proposing that fiction is the exploration of the human condition with yearning as its compass, Butler reinterprets the traditional tools of the craft using the dynamics of desire. Offering a direct view into the mind and craft of a literary master, *From Where You Dream* is an invaluable tool for the novice and experienced writer alike.

Wherever we look today, popular culture greets us with “texts” that make implicit arguments; this book helps students to think and write critically about these texts. *The World Is a Text* teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to “read” everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to the updated compact edition are chapters on fashion, sports, and nature and the environment.

Screenwriting Fundamentals: The Art and Craft of Visual Writing takes a step-by-step approach to screenwriting, starting with a blank page and working through each element of the craft. Written in an approachable anecdote-infused style that's full of humor, Bauer shows the writer how to put the pieces together, taking the process of screenwriting out of the cerebral and on to the page. Part One of the book covers character, location, time-frame and dialogue, emphasizing the particularity in writing for a visual medium. Part Two of the book focuses on the narrative aspect of screenwriting. Proceeding incrementally from the idea and story outline, through plotting and writing the treatment, the workshop-in-a-book concludes with writing the First Draft. A unique emphasis on the visual elements of storytelling because the camera is always present—the screenplay must act as a guide for the director and the editor. A "workshop in a book" approach that walks the reader step-by-step through a screenplay—focusing on character, location, time frame, visual components, and transitions—with plenty of exercises that generate material for the narrative writing process. A process-oriented approach, combined with a lighthearted tone and approachable style, that allows the reader to ease into the daunting task of writing a First Draft and takes them all the way through to the end— First Draft in hand.
