How many times had Philippe repeated this sentence, as his successes, ever more prestigious, were mounting up? 'I'm benefiting from it!', like the 'carpe diem' immortalised two thousand years earlier by the Roman poet, Horace. Like the magic of the moment, the pleasures of which one savours without knowing whether they will ever be reproduced. It was with that exact mindset that the world number one, the best cyclist of the year, the most titled modern-era rider of the classics, evolved during the four seasons of the exceptional year 2011, the one of his summit and his glory, where all his dreams, or almost, came true. Phil benefitted from his form, his talent, his work, his audacity and his character to pull off 19 major successes, including the two Ardennes classics, two national titles, the first stage of the Tour De France and the distinctive jerseys that accompanied him. On the podium of the Walloon Arrow, in Huy, Bernard Hinault himself said this: 'You see kid, you've done it, and there was no reason to fear the gradient of the Wall of Huy. Benefit, benefit: when you're in such form, you have to jump on everything that moves.' And he benefitted from it, beyond, perhaps, his wildest dreams. He indulged, while offering his public emotions of rare intensity. He has brought some pages of history to Belgian cycling on a cloud that it will be good to immortalise when the time comes. But Phil did not want to wait for the archives of his memory, rightly believing that this exceptional 2011 season might never again be reproduced. Rather than postponing sine die his emotions, his memories and his anecdotes into an end-of-career book, he has... benefitted from the freshness of his feelings to recount them hard on the heels of a breathtaking adventure, in a pulsating account of his victories that he dissects with meticulousness, precision, and passion.

The ultimate guide to mobile marketing - revised and updated! An American Express Open Forum Best Business Book We are in the midst of a technological revolution bigger than the television or the PC. How do we, as marketers, harness mobile technology to serve our customers most effectively? With the "first screen" - the television - companies sent ads directly into consumers' living rooms, reaching millions with one campaign. The "second screen" - the personal computer - increased interaction between companies and consumers and allowed for immediate customer feedback. Now, the "third screen" - the mobile device - changed the game in an even more revolutionary way. The Third Screen: The Ultimate Guide to Mobile Marketing defines the implications, strategies, and tactics used to thrive in business during the mobile revolution. This revised, updated edition links technological developments to behavioral changes, reveals the unexpected forces of the changes in mobile, and equips marketers and businesses for the future.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

How to make customers feel good about doing what you want Learn how companies make us feel good about doing what they want. Approaching persuasive design from the dark side, this book melds psychology, marketing, and design concepts to show why we're susceptible to certain persuasive techniques. Packed with examples from every nook and cranny of the web, it provides easily digestible and applicable patterns for putting these design techniques to work. Organized by the seven deadly sins, it includes: Pride — use social proof to position your product in line with your visitors' values Sloth — build a path of least resistance that leads users where you want them to go Gluttony — escalate customers' commitment and use loss aversion to keep them there Anger — understand the power of metaphysical arguments and anonymity Envy — create a culture of status around your product and feed aspirational desires Lust — turn desire into commitment by using emotion to defeat rational behavior Greed — keep customers engaged by reinforcing the behaviors you desire Now you too can leverage human fallibility to create powerful persuasive interfaces that people will love to use — but will you use your new knowledge for good or evil? Learn more on the companion website, evilbydesign.info.

Pro Android Python with SL4A is for programmers and hobbyists who want to write apps for Android devices without having to learn Java first. Paul Ferrill leads you from installing the Scripting Layer for Android (SL4A) to writing small scripts, to more complicated and interesting projects, and finally to uploading and packaging your programs to an Android device. Android runs scripts in many scripting languages, but Python, Lua, and Beanshell are particularly popular. Most programmers know more than one programming language, so that they have the best tool for whatever task they want to accomplish. Pro Android Python with SL4A explores the world of Android scripting by introducing you to the most important open-source programming languages that are available on Android-based hardware. Pro Android Python with SL4A starts by exploring the Android software development kit and then shows you how to set up an Eclipse-based Android development environment. You then approach the world of Android programming by using Beanshell, which runs on the Dalvik, and learning how to write small programs to administer an Android device. Next, discover how Lua, a lightweight language perfectly suited for scripting on smaller devices, can work with Android. Lua can be used for small but important tasks, like SMS encryption and synchronizing photos with flickr. Last, but certainly not least, you will discover the world of Python scripting for SL4A, and the power contained within the full range of Python modules that can combine with the Android SDK. You'll learn to write small location-aware apps to get you started, but by the end of this book, you'll find yourself writing fully GUI-fied applications running on the Android desktop! Pro Android Python with SL4A is rounded out with a chapter on distributing and packaging scripts, a skill that you'll find very useful as you reach out to a wider audience with your programs.
