This book is a guide to understanding and using the software package ARPACK to solve large algebraic eigenvalue problems. The software described is based on the implicitly restarted Arnoldi method, which has been heralded as one of the three most important advances in large scale eigenanalysis in the past ten years. The book explains the acquisition, installation, capabilities, and detailed use of the software for computing a desired subset of the eigenvalues and eigenvectors of large (sparse) standard or generalized eigenproblems. It also discusses the underlying theory and algorithmic background at a level that is accessible to the general practitioner.

It is estimated that literally billions of residents in urban and peri-urban areas of Africa, Asia, and Latin America are served by onsite sanitation systems (e.g. various types of latrines and septic tanks). Until recently, the management of faecal sludge from these onsite systems has been grossly neglected, partially as a result of them being considered temporary solutions until sewer-based systems could be implemented. However, the perception of onsite or decentralized sanitation technologies for urban areas is gradually changing, and is increasingly

being considered as long-term, sustainable options in urban areas, especially in low- and middle-income countries that lack sewer infrastructures. This is the first book dedicated to faecal sludge management. It compiles the current state of knowledge of the rapidly evolving field of faecal sludge management, and presents an integrated approach that includes technology, management, and planning based on Sandecs 20 years of experience in the field. Faecal Sludge Management: Systems Approach for Implementation and Operation addresses the organization of the entire faecal sludge management service chain, from the collection and transport of sludge, and the current state of knowledge of treatment options, to the final end use or disposal of treated sludge. The book also presents important factors to consider when evaluating and upscaling new treatment technology options. The book is designed for undergraduate and graduate students, and engineers and practitioners in the field who have some basic knowledge of environmental and/or wastewater engineering.

In *Belated Travelers*, Ali Behdad offers a compelling cultural critique of nineteenth-century travel writing and its dynamic function in European

colonialism. Arriving too late to the Orient, at a time when tourism and colonialism had already turned the exotic into the familiar, late nineteenth-century European travelers to the Middle East experienced a sense of belatedness, of having missed the authentic experience once offered by a world that was already disappearing. Behdad argues that this nostalgic desire for the other contains an implicit critique of Western superiority, a split within European discourses of otherness. Working from these insights and using analyses of power derived from Foucault, Behdad engages in a new critique of orientalism. No longer viewed as a coherent and unified phenomenon or a single developmental tradition, it is seen as a complex and shifting field of practices that has relied upon its own ambivalence and moments of discontinuity to ensure and maintain its power as a discourse of dominance. Through readings of Flaubert, Nerval, Kipling, Blunt, and Eberhardt, and following the transition in travel literature from travelog to tourist guide, *Belated Travelers* addresses the specific historical conditions of late nineteenth-century orientalism implicated in the discourses of desire and power. Behdad also views a broad range of issues in addition to nostalgia and tourism, including transvestism and melancholia, to specifically demonstrate the ways in which the heterogeneity of orientalism and the plurality of its practice is an enabling force in the production and transformation of colonial

power. An exceptional work that provides an important critique of issues at the forefront of critical practice today, *Belated Travelers* will be eagerly awaited by specialists in nineteenth-century British and French literatures, and all concerned with colonial and post-colonial discourse.
