The lab manual incorporates the terminology and much of the artwork used in Erin Amerman's Human Anatomy & Physiology text, but can accompany any A&P textbook. The lab manual is available in three versions for your students: Main, Cat, and Pig. The Cat and Pig versions are identical to the Main version except that they include seven additional cat dissection and 9 additional pig dissection exercises, respectively, at the back of the lab manual. Also available with Modified Mastering A&P By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student. Mastering A&P provides an extension of learning, allowing students a platform to practice, learn, and apply knowledge outside of the classroom. This is a lab manual for a college-level human anatomy course. Mastery of anatomy requires a fair amount of memorization and recall skills. The activities in this manual encourage students to engage with new vocabulary in many ways, including grouping key terms, matching terms to structures, recalling definitions, and written exercises. Most of the activities in this manual utilize anatomical models, and several dissections of animal tissues and histological examinations are also included. Each unit includes both pre- and post-lab questions and six lab exercises designed for a classroom where students move from station to station. The vocabulary terms used in each unit are listed at the end of the manual and serve as a checklist for practicals.
