The European Union is expanding. Wide cultural, political and economic differences within the Union have a significant impact on the management of human resources, so crucial to the success of any enterprise. Businesses within the EU have regularly tried to re-evaluate the context in which they work, and for investors from other continents, notably the US and Asia, the potential for expensive mistakes is only too real. In this comprehensive new book, the varied and particular challenges for human resource management in the EU are fully explored. Written in conjunction with the European Association for Personal Management (EAPM), the book offers country-by-country analysis from native authors, assessing the contexts faced by businesses working in thirteen different states: from founding EU members like France and Germany, to relatively new entrants like Latvia and Poland. The book also includes a chapter on Turkey, an emerging economy currently outside the Union. The key issues are addressed from both theoretical and practical perspectives, whilst each chapter is also complimented by best practice case studies.

This book compiles readings by thought leaders in human resource

management and communication, exploring the intersection of interests, theories, and perspectives from the two fields to highlight new opportunities for research and practice. Written at the cross-section of two established and critically linked fields, this book is a must-have for graduate human resource management and organizational communication students, as well as for high-level human resource management practitioners. Since its original publication in 2000, this text has been intended for students studying HRM for the first time. Its major features are its comprehensive and wide-ranging nature which deals with all major aspects of HRM in a down to earth and practical way, alongside the necessary theoretical underpinning. The key strength is its accessibility to students new to the subject area where it combines a clear explanation with numerous relevant and interesting cases and comments. The range and nature of HRM is fully illustrated by a combination of real life and fictional case studies which heighten awareness of key issues involved in HRM today. This new edition will continue to be appropriate for undergraduate courses, especially first and second year students studying an HRM degree but also for post-graduate courses where many students are new to the field of HRM. It continues to be divided into 12 chapters to provide one topic a week on a modular course, but it may be extended into two semesters. It has been revised to place a greater emphasis on the role of human resources in improving organisational and employee performance. These revisions include the greater use of technology in resourcing and development areas, the change of emphasis from 'recruitment/selection' to 'talent management' and the use of social networking developments as an aid to HR management.
