This 13 week, interactive study looks at issues many women face today and reminds them of their inherent value as daughters of the one true King. Mordecai's challenge to Esther, "Were you not born for such a time as this?" is repeated for all women throughout the ages, says Diana Hagee. Every woman has a divine destiny. But women cannot fulfill that goal unless they understand His biblical guidelines. In this interactive workbook, Diana leads women through a self-examination of their lives and their goals from God's perspective, not the secular society's. Topics such as self-esteem, diligence, attitude, goal setting and stewardship encourage women to establish a strong foundation for growth while learning to see themselves in a new light. Through scripture, thought-provoking questions and answers, prayers, practical advice and devotional ideas, women learn how valuable they are to God and how they can have an intimate relationship with Him while evaluating the standards that make them a daughter of the King.

I am Special is a workbook developed by Peter Vermeulen and already used extensively with young people with autism spectrum disorder. The workbook is designed for a child to work through with an adult - parent, teacher or other professional. Unlike other books, its content and layout are devised especially for children who read, think and process information differently. I am Special is divided into two parts. The first is a theoretical introduction that explains how to inform children that they have autism or Asperger Syndrome and how to use the worksheets with groups or individuals. The second part consists of a series of worksheets which the child works through with an adult to create a unique and personal book about him or herself. It includes a series of exercises that present autism positively. They strike a balance between general facts, information about autism and personal information, covering the strengths an autistic person may have as well as the difficulties they may face. I am Special can be used with young people over the age of ten years. Not only is it an excellent source of information for the autistic child; it can be the first step in a process of counselling or psychotherapy or the springboard for a discussion group on autism.
