The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The liberating effect of music has been a particularly important theme in twentieth-century African American literature. The nine original essays in Black Orpheus examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies, American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately explore the thematic, linguistic structural presence of music in twentieth-century African American fiction.

A great Napoleonic soldier's life-two volumes complete in one special edition Armand Caulaincourt was a principal figure of the Napoleonic epoch. Born in 1773, he was serving in the army of France at the age of 15. By 1801, he had been swept up by the tide of French revolution and politics, had risen in rank, been reduced to common soldier, risen again to colonel and twice suffered wounds in his thirteen campaigns. Becoming an aide to Napoleon, Caulaincourt's fortunes prospered during the imperial period and led to his becoming Duke of Vicenza in 1808. He strongly advised Napoleon not to invade Russia, but was ignored. He served during the Russian Campaign as Grand Ecuyer to the emperor being present at Borodino and upon the retreat from Moscow until Napoleon left the doomed army. Caulaincourt accompanied Napoleon on his return to France, becoming Grand Marshal of the Palace following the death of Duroc. The remainder of his career was spent engaged in diplomacy for which he had a considerable talent, particularly impressing Tsar Alexander I who subsequently used his influence to save Caulaincourt from arrest and execution following the Hundred Days. This good value Leonaur edition of the life of this outstanding man, contains the complete text of both volumes as they were originally published. Leonaur editions are newly typeset and are not facsimiles; each title is available in softcover and hardback with dustjacket; our hardbacks are cloth bound and feature gold foil lettering on their spines and fabric head and tail bands.

Divlji Labudovi - I cigni selvatici (hrvatski - talijanski)Dvojezicna djecji knjiga prema jednoj bajci od Hansa Christiana Andersena, sa audioknjigom za preuzimanje This edited collection addresses the link between second language pragmatics (including interlanguage and intercultural) research and English language education. The chapters use different contemporary research methods and theoretical frameworks such as conversation analysis, language-learners-as-ethnographers, discourse and interactional approaches and data in contexts (either in the region or overseas). The content explores and discusses the significance of learning and teaching of second language (L2) pragmatics in language education for learners who use English as a lingua franca for academic and intercultural communication purposes with native and non-native speakers of English, focusing on pragmatic actions, social behaviours, perceptions and awareness levels in three regions in East Asia – China, Japan and South Korea. It is an important contribution to the area of second language pragmatics in language education for East Asian learners. It recommends research-informed pedagogies for the learning and teaching of interlanguage or intercultural pragmatics in

regions and places where similar cultural beliefs or practices are found. This is an essential read for researchers, language educators, classroom teachers, readers who are interested in second language pragmatics research and those interested in second language acquisition and English language education in the East Asian context.

William Temple, late Archbishop of Canterbury, on meeting Reinhold Niebuhr for the first time, commented, At last I've met the troubler of my peace. Of him John Baillie, the distinguished theologian, also remarked, Intellectually, Niebuhr is head and shoulders, he is legs and ankles above any other American. The full range of Niebuhr's political thought -- in his own writing -- is here made available in one convenient volume. Using materials from sixteen of his books and some one hundred and seventy of his articles, the editors, Harry R. Davis and Robert C. Good, have brilliantly succeeded in linking together the various selections so that they form a logical whole. The volume begins with Niebuhr's examination of the contemporary crisis and his analysis of the false solutions offered by the liberal creed and by communist doctrine. The ground thus cleared, Niebuhr erects his own system of political thought. In the final section of the book, Niebuhr deals with problems of the day in the light of his central beliefs and insights. As an advisory committee the editors enjoyed the assistance of Charles Burton Marshall (Washington Center of Foreign Policy Research), Hans J. Morgenthau (Chicago), E. E. Schattschneider Jr. (Harvard), and Arnold Wolfers (Washington Center of Foreign Policy Research). Niebuhr himself read and approved the contents.

The leading critic of supernatural literature here examines the roots of the "weird tale" (as Lovecraft called it) through detailed examinations of five "founding fathers" of the genre: Arthur Machen, Lord Dunsany, Algernon Blackwood, M.R. James, and H.P. Lovecraft. The result is a thorough study of the art, craft, philosophy, and aesthetics of an enduring genre of fantastic literature.

In *Red Flag Relationships*, author Debra S. Cole, MEd, LPC addresses the issue of warning signs in personal relationships, business relationships, and several other types of relationships in a straightforward manner. Cole offers the "ultimate" red flags that pose the most threat, as well as a four-step strategy to help the reader learn how to respond to red flags. We've all either asked ourselves or heard another ask "How could this have happened? There must have been a sign, how did I miss it?" Learning to recognize the warning signs helps, but one must also have a strategy of how to respond once a warning sign has been acknowledged. In a sense, learning what red flags to watch for on one's journey through life is a form of emotional emergency preparedness. In addition, there is a lot of practical information in this book about how we interact with the world around us. Cole explains what constitutes healthy vs. unhealthy relationships to help the reader improve all of his or her relationships. Having healthy relationships is the most reward-ing experience in life.

Adattamento illustrato della fiaba classica di Andersen in due lingue (italiano e croato). Con audiolibro scaricabile e disegni da stampare e colorare.

This memoir outlines the life of a scientist spanning much of the twentieth century. It began at a time before radios were found in most American homes, and before the advent of "talking pictures." His interest in science was born at an early age, sparked by his mother, as she introduced him to the stars in a dark Utah sky. Early experiences and training were much the same as for any other boy at the time. But with the beginning of war in Europe, and the U.S. response by instituting universal conscription (the draft), he realized the importance of education in fulfilling his military obligation, and enlisted in a Navy training program. Navy service took him to Chicago and Southern California, and eventually to little-known Peleliu Island in the Western Pacific, a foretaste of a life of frequent travel to follow. World War II was followed all too soon by the retreat of the Soviet Union behind an "Iron Curtain" of secrecy, a massive buildup of conventional forces and armed occupation of neighboring countries. It became essential to know when they succeeded in building the atomic bomb. This book is a first-hand account in non-technical terms of some of the ways in which this was accomplished. This was followed by attempts to ban the bomb, or at least to ban nuclear testing. The author was fortunate to be near the center of U.S. efforts in many of these attempts, and the book describes important activities and events that ultimately led to achieving the lesser of these goals.

This text comprises a selection of papers that provide state of the art insights into bank performance, risk and firm financing post crisis that were presented at the European

Association of University Teachers of Banking and Finance Conference (otherwise known as the Wolpertinger Conference) held at Bangor University, Wales, 2010. This book draws on financial, economic, and management theory in its exploration of the theory underlying risk and risk management at both micro- and macroeconomic levels. It has a particular reference to the public financial sector. Chapters investigate the elimination of currency risk in the Transatlantic Trade and Investment Partnership (TTIP), as well as the changes that credit ratings undergo due to the influence of credit spreads. Featuring contributions on important topics such as public safety and the internet, intellectual capital, bank regulatory risk in the EU, the financial distress of public sector entities, and systemic risk in the insurance sector, it also explores innovative and emerging issues in the European tax gap in personal income taxes and VAT carousel fraud in selected European countries. Discussion of the complex nature of risk management in public administration will appeal to public officials, policy-makers, academics and researchers alike.
