Do you know where your sugar is coming from? Most likely everywhere. Sure, it's in ice cream and cookies, but what scared Eve O. Schaub was the secret world of sugar—hidden in bacon, crackers, salad dressing, pasta sauce, chicken broth, and baby food. With her eyes opened by the work of obesity expert Dr. Robert Lustig and others, Eve challenged her husband and two school-age daughters to join her on a quest to quit sugar for an entire year. Along the way, Eve uncovered the real costs of our sugar-heavy American diet—including diabetes, obesity, and increased incidences of health problems such as heart disease and cancer. The stories, tips, and recipes she shares throw fresh light on questionable nutritional advice we've been following for years and show that it is possible to eat at restaurants and go grocery shopping—with less and even no added sugar. Year of No Sugar is what the conversation about "kicking the sugar addiction" looks like for a real American family—a roller coaster of unexpected discoveries and challenges. "As an outspoken advocate for healthy eating, I found Schaub's book to shine a much-needed spotlight on an aspect of American culture that is making us sick, fat, and unhappy, and it does so with wit and warmth."—Suvir Sara, author of Indian Home Cooking "Delicious and compelling, her book is just about the best sugar substitute I've ever encountered."—Pulitzer Prize-winning author Ron Powers

Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand's magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America's best-loved novels by PBS's The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive

statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

David Gillespie was 40kg overweight, lethargic, sleep-deprived and the father of four, with twins on the way. He knew he needed to lose weight fast, but he had run out of diets - all had failed. After doing some reading on evolution (why weren't our forebears fat?), David cut sugar - specifically fructose - from his diet. He immediately started to lose weight, and kept it off. Slim, trim and fired up, David set out to look at the connection between sugar, our soaring obesity rates and some of the more worrying diseases of the twenty-first century, and discovered some startling facts in the process. Sugar was once such a rare resource that nature decided we didn't need an off-switch - in other words, we can keep eating sugar without feeling full. In the space of 150 years, we have gone from eating no added sugar to more than a kilogram a week. You would need to run 7km every day of your life just to not put on weight as a result of eating that much sugar. Two decades ago 1 in 14 adult Australians were obese; that figure is now 1 in 5. The 'natural' sugar in one glass of unsweetened fruit juice per day for a year is enough to add just over 2.5kg your waistline. The more sugar we eat, the more we want. Food manufacturers exploit our sugar addiction by lacing it through 'non-sweet' products, such as bread, sauces, soups and cereals. Sweet Poison exposes one of the great health scourges of our time and offers a wealth of practical and accessible information on how to avoid fructose, increase your enjoyment of food and lose weight.

En route, she shows us how to wake up and reconnect with life using "wild practices" that include: · Hike. Embrace the "walking cure" as great minds throughout history have. · Go to your edge. Do what scares you and embrace discomfort daily. · #Buylesslivemore. Break the cycle of mindless consumption and get light with your life. · Become a soul nerd. Light up your intellect with the arts. · Get "full-fat spiritual". Have an active practice and use it to change the world. · Practice wild activism. Through sustained, non-violent protest we can create our better world. The time has come to boldly, wildly imagine better. We are being called upon, individually and as a society, to forge a new path and to find a new way of living. Will you join the journey?

After changing your everyday eating habits, you will begin to gain a new understanding of how food works in your body—and just how much nutrition affects your entire life. There's no reason to wait! SUGAR IS TAKING OVER OUR LIVES. But why? And is it only those sweet, refined white crystals that are causing us problems, or could there be more to the story? Let's be honest: The problem isn't just sugar itself. It's the refined, nutrient-poor carbohydrates that carry tons of calories, but no real nutrition. In our world, these are the easiest foods to grab on the go, but they leave us fat, sick, tired, and downright unhappy. The effect that sugar, "hidden" carbs, and refined, processed foods have on our bodies goes far beyond our waistlines. We can't focus, we can't sleep, we have irrational mid-afternoon cravings, and we can't even make it through the day without wanting—or needing—to prop up our energy levels with caffeine or even more sugar! What can we do to break free from this cycle? The 21-Day Sugar Detox is here to help.

From the New York Times bestselling author of *I Quit Sugar* and *First, We Make the Beast Beautiful* comes this proven 2-week plan for reducing anxiety and beating one of its leading causes—sugar addiction—using 8 simple, sustainable dietary shifts. Eating more than 6 teaspoons of sugar a day? No wonder you're anxious. Anxiety has a lot to do with lifestyle choices, including what you put in your mouth. Sarah Wilson is an expert on sugar addiction and its connection to the most widespread mental health concern—chronic anxiety—affecting millions worldwide today. One in six people in the West alone suffer from an anxiety-related illness. While scientists know that anxiety is a chemical imbalance in the brain, recent studies have linked this condition to sugar consumption and inflammation in the gut. In *The Anti-Anxiety Diet*, Wilson unravels the cutting-edge science linking sugar addiction, inflammation, and gut health to mental health. "If you have fire in the gut," Sarah advises, "you have fire in the brain." And sugar is the primary culprit. The *Anti-Anxiety Diet* is her simple, 2-week jumpstart plan for eliminating sugar from your diet. Packed with delicious, easy-to-prepare recipes, 4-color photos, and detailed meal plans, it shows you how to replace the bad stuff (sugar) with the good stuff (whole, unprocessed foods), to soothe—and ultimately tame—the anxious beast.

Recipes include: Bacon 'N' Egg Quinoa Oatmeal, Caramelized Leek, Apple and Rosemary Socca, Two-Minute Desk Noodles, Red Velvet Crunch Bowl, and Chocolate Peanut Butter Crackles.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

From the best-selling author of *Why We Get Fat*, a groundbreaking, eye-opening exposé that makes the convincing case that sugar is the tobacco of the new millennium: backed by powerful lobbies, entrenched in our lives, and making us very sick. Among Americans, diabetes is more prevalent today than ever; obesity is at epidemic proportions; nearly 10% of children are thought to have nonalcoholic fatty liver disease. And sugar is at the root of these, and other, critical society-wide, health-related problems. With his signature command of both science and straight talk, Gary Taubes delves into Americans' history with sugar: its uses as a preservative, as an additive in cigarettes, the contemporary overuse of high-fructose corn syrup. He explains what research has shown about our addiction to sweets. He clarifies the arguments

against sugar, corrects misconceptions about the relationship between sugar and weight loss; and provides the perspective necessary to make informed decisions about sugar as individuals and as a society.

A companion to Add More ~Ing to Your Life chronicles the author's spiritual journey through low self-esteem and drug abuse to counsel readers on how to overcome personal fears and achieve greater fulfillment, providing a range of positive affirmations, physical activities and meditations.
