An exciting textbook for students and teachers of the International Baccalaureate Diploma, written and developed by practising IB teachers

This IB Chemistry book may be your best bet for a comprehensive and effective review of the SL or HL course material. The book has friendly and understandable explanations of complex concepts, with 250 practice questions for the test, as well as a complete listing of all related terms and their explanation. Important equations are listed throughout each content chapter, covering what you need to know in order to excel in the SL or HL test. Questions with answers include an overview section, and an additional in-depth section if you need further clarification. The user-friendly format makes it one of the best IB Chemistry review book available. It provides a means for developing study plans that you can customize to fit your needs. It isn't too skimpy or too overwhelming with information. It also provides a great way for structuring your studying, which is helpful if you consider yourself somewhat less than a totally organized student.

Provides complete coverage of the syllabus requirements. This book offers information on Chemistry for IB Diploma course.

Clear links are made to the Learner profile and the IB core values. Table of Contents: Stoichiometric Relationships Atomic Structure Periodicity Chemical Bonding and Structure Energetics/Thermochemistry Chemical Kinetics Equilibrium Acids and Bases Redox Processes Organic Chemistry Measurement and Data Processing Option A: Materials Option B: Biochemistry Option C: Energy Option D: Medicinal Chemistry

With its piano accompaniment, this piece is suitable for SATB and piano or orchestra.

Unlike most technical analysis books, Gerald Appel's Practical Power Tools! offers step-by-step instructions virtually any investor can use to achieve breakthrough success in the market. Appel illuminates a wide range of strategies and timing models, demystifying even advanced technical analysis the first time. Among the models he covers: NASDAQ/NYSE Relative Strength, 3-5 Year Treasury Notes, Triple Momentum, Seasonality, Breadth-Thrust Impulse, and models based on the revolutionary MACD techniques he personally invented. Appel covers momentum and trend of price movement, time and calendar cycles, predictive chart patterns, relative strength, analysis of internal vs. external markets, market breadth, moving averages, trading channels, overbought/oversold indicators, Trin, VIX, major term buy signals, major term sell signals, moving average trading channels, stock market synergy, and much more. He presents techniques for short-, intermediate-, and long-term investors, and even for mutual fund investors.

The author team behind the bestselling text, Industrial Organization, has written a brand new, calculus-based text designed to prepare students for a complete analysis of all facets of industrial organization. Contemporary Industrial Organization enhances students' understanding of the strategic behavior of firms, the structure of markets, and imperfect competition using calculus, game theory, econometrics, and practical examples and applications. This text's unique presentation and blend of quantitative and qualitative tools assumes familiarity with intermediate microeconomics with calculus and econometrics.
