Multiple Choice Questions for Economics: is based upon the syllabus requirements of the International Baccalaureate Diploma for economics (for first examinations in May 2013) – at both Standard and Higher Level. is structured in the study order of our textbook Economics from a global perspective (third edition), which exactly follows the current IB Diploma syllabus. is sequenced by section, chapter and topic, as in our textbook. has Higher Level only questions clearly marked. has over 450 questions, with many new questions covering the mathematical content of the current syllabus. has answers that can be removed if using the book for course tests. is ideal for use with Economics from a global perspective. is at a suitable level for use with GCE A Level courses, professional courses, and university introductory courses.

The multiplier is a central concept in Keynesian and post-Keynesian economics. It is largely what justifies activist full-employment fiscal policy: an increase in fiscal expenditures contributing to multiple rounds of spending, thereby financing itself. Yet, while a copingstone of post-Keynesian theory, it is not universally accepted by all post-Keynesians, for reasons vastly different than the mainstream. This book explores both the pros and cons of the multiplier from a strictly post-Keynesian – and Kaleckian – approach. Anchored within the tradition of endogenous money, this book offers a lively discussion from a number of well-known post-Keynesians from a variety of perspectives: history of thought, theory and economic policy. The book starts by analysing the historical foundations of the Keynesian Multiplier and its treatment throughout the history of economic thought. Moving through a critical debate about the limits of the multiplier, the contributions finish by offering cutting edge new views on this fascinating concept. .

A New York Times Bestseller The leading thinker and most visible public advocate of modern monetary theory -- the freshest and most important idea about economics in decades -- delivers a radically different, bold, new understanding for how to build a just and prosperous society. Stephanie Kelton's brilliant exploration of modern monetary theory (MMT) dramatically changes our understanding of how we can best deal with crucial issues ranging from poverty and inequality to creating jobs, expanding health care coverage, climate change, and building resilient infrastructure. Any ambitious proposal, however, inevitably runs into the buzz saw of how to find the money to pay for it, rooted in myths about deficits that are hobbling us as a country. Kelton busts through the myths that prevent us from taking action: that the federal government should budget like a household, that deficits will harm the next generation, crowd out private investment, and undermine long-term growth, and that entitlements are propelling us toward a grave fiscal crisis. MMT, as Kelton shows, shifts the terrain from narrow budgetary questions to one of broader economic and social benefits. With its important new ways of understanding money, taxes, and the critical role of deficit spending, MMT redefines how to responsibly use our resources so that we can maximize our potential as a society. MMT gives us the power to imagine a new politics and a new economy and move from a narrative of scarcity to one of opportunity.

The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. This is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face. For many candidates the mix of words, theory and numbers in Paper 3 questions can be overwhelming, if they have not developed easy familiarity throughout their course. With clear layout and content that beautifully mirrors IB examination questions, this resource is the one we have all been waiting for. I absolutely recommend it as a 'must have' for all those who are preparing for the HL Economics examination. It is a core resource invaluable to students and teachers alike. Janet Barrow, IB Economics Teacher, OSC Teacher, IB Examiner, author of IB Business Management and TOK teacher resources 20160615

Political Ideologies provides a broad-ranging introduction to both the classical and contemporary political ideologies. Adopting a global outlook, it introduces readers to ideologies' increasingly global reach and the different national versions of these ideologies. Importantly, ideologies are presented as frameworks of interpretation and political commitment, encouraging readers to evaluate how ideologies work in practice, the problematic links between ideas and political action, and the impact of ideologies. Regular learning features encourage readers to think critically about ideologies, and view them as competing and contestable ways of interpreting the world. A unique "stop and think" feature calls for readers to reflect on their own ideological beliefs. Online Resources: Political Ideologies is accompanied by comprehensive online resources, to support political ideology courses. For students: * Further reading and resources for each chapter to help students to undertake further research and deepen their understanding and critical thinking; * Regular updates help students to keep up to date with ideologies as frameworks of understanding and political action in the real world. For lecturers: * Indicative answers to questions in the book provide a framework for approaching these; * Powerpoint slides to support each chapter, providing an overview and key points to help with planning; * Further discussion and debate ideas, for use in seminars, encourage big picture thinking about the relationships between ideologies.
