The 1st edition of Structural Fire Fighting: Initial Strategy and Tactics is intended to provide fire personnel with the knowledge needed to deploy resources in the first 10 minutes of any structural fire incident. The manual is designed to help the reader develop a logical decision-making process for determining incident priorities, strategies, and tactics regardless of the available resources or configuration of the emergency services organization. Scenarios for residential, commercial, and special hazard incidents are included with recommended best practices and considerations. Training officers can use these scenarios, modified to local resources and realities, to develop classroom discussions or field simulations. This manual is a companion to Structural Fire Fighting: Truck Company Skills and Tactics, 2nd edition and the soon to be released Structural Fire Fighting: High Rise Fire Fighting. Each chapter of the manual contains learning objectives, key terms, and review questions to assist the reader in understanding the material.

This new IFSTA manual details the training required of Company Officers according to NFPA® 1021, Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition of Fire and Emergency

Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA's single-column format and upgraded and updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material.

This text deals with the basics of wildland and forest firefighting. It has been totally revised and is now in full color. Protect against the life-threatening dangers of building collapse! Brannigan's book can save your life! Extensively updated, revised, and expanded, this 3rd edition text shows you how to recognize the signs of building collapse before it happens--so you can get out while there's still time. You'll be informed about critical topics such as: The toxic combustion products of vermin- and moisture-resistant treated wood The outcome of multi-million-dollar lawsuits involving some fire-retardant treated plywood The total collapse hazard to post-tensioned concrete buildings under construction The dynamics of the "stack effect", and more! Photographs and illustrations help you visualize key concepts, so you can spot dangers on the job. A "must" for fire fighters, engineers, and

comprehensive and effective guidance for today's world. Major revisions in NFPA 921 help you render opinions that stand up to scrutiny: An all-new section on Report Review Procedure in Chapter 4 outlines the review process in fire investigation and discusses peer vs. technical review. Rewritten Chapter 18, Cause helps ensure fire investigators use scientific methodology when developing hypotheses, to avoid Daubert challenges resulting from the absence of supportive evidence, commonly known as "negative corpus." Revised Chapter 21, Explosions includes a critical update of the science and technology affiliated with explosions, along with new illustrations and photos. Rewritten Chapter 23, Fire Deaths and Injuries explains how medical reports such as blood tests and tissue samples can help investigators determine fire origin and cause. Learn when to request toxicology reports and how to interpret findings. Chapter 25, Motor Vehicle Fires introduces expanded sections covering recreational vehicles and agricultural equipment. Only the 2011 NFPA 921 includes complete data on all types of vehicles, including electric/hybrids. Revised Chapter 26, Wildfires has new visuals to assist personnel charged with investigations involving this growing fire problem. Updated Chapter 12, Safety explores major risks and covers PPE and other safety protocols that protect fire investigators on the job. Use the 2011 NFPA 921's total system for safe and accurate fire investigations. The 2011 NFPA 921 addresses everything from basic methodology t

For his first book, Chief Billy Goldfeder, a 40-year fire service veteran, solicited insights and pearls of wisdom from our country's greatest firefighters, fire officers and emergency responders. The stories that make up this unprecedented collection share many perspectives of the emergency service experience and offer invaluable, often hard-won, lessons learned. Every firefighter, from probie to veteran, can find something to take away from these factual, real-life, first-hand stories, which offer a range of emotions—from wit to heartache and basic common sense. Features:

- Introductions by Billy Goldfeder to each chapter
- Chapters written by a very diverse group of more than 80 well-known fire service veterans
- Experiences of some of the best names in the fire service that most of us would not have the opportunity to learn from directly

Chief Goldfeder is donating 100% of his royalties equally to the Chief Ray Downey Scholarship and the National Fallen Firefighters Foundation. Every contributor fully supported the benevolent mission of this book.

Proposes changes in the way firefighters gain entry, advance hose-lines and approach compartment (room and space) fires within the confinement of a burning building. Discusses issues such as tactical venting of structures and alternative means of alleviating worsening conditions. Encourages a risk-based approach to interior size-up where the concept of personal risk versus gain must be seriously considered. Cf. P. 47.

The 4th edition of Fire Detection and Suppression Systems has been completely updated and provides up-to-date information on fire protection systems. This manual familiarizes fire service and other interested personnel with the types, arrangements, and operating principles of these systems. Topics addressed include fire detection and alarm systems, smoke management systems, water supply, fire pumps, automatic sprinkler systems, standpipe and hose systems, special extinguishing systems, and portable fire extinguishers. This manual has been developed to meet all FESHE outcomes for the Fire Protection Systems core course.
