By most accounts, China has quickly grown into the second largest economy in the world. In this controversial new book, Subramanian argues that China has already become the most economically dominant country in the world in terms of wealth, trade and finance. Its dominance and eclipsing of US global economic power is more imminent, more broad-based and larger in magnitude than anyone has anticipated. Subramanian compares the economic dominance of China with that of the two previous economic superpowers--the United States and the United Kingdom--and highlights similarities and differences. One corollary is that the fundamentals are strong for the Chinese currency to replace the dollar as the world's reserve currency. The final chapter forecasts how the international economic system is likely to evolve as a result of Chinese dominance.

The multi-front trade war, which started with solar panels and washing machines, quickly expanded to additional battles: the 232 action on Aluminum and Steel imports, Intellectual Property, Autos, and Immigration. As a result, retaliatory tariffs were imposed and the flow of global trade the world once knew was changed. Headlines reporting the China tariffs "on hold," "truces announced" as well as threats of additional tariffs being imposed, continue to feed the uncertainty which would send the markets to historic highs and dramatic selloffs. So how can one get a sense of the true status of trade and the good faith being pledged by countries like China? Through the trade flows! With ninety percent of the world's economy moved by maritime transport, the ocean highway is the best way for anyone to gauge the status of trade talks as well as monitor the flow of trade. Remember, the two phrases your mom said when you were a teen: "talk is cheap" and "actions speak louder than words?" Well, when it comes to the world of shipping, that is the action being taken. Best-selling author Lori Ann LaRocco takes readers inside the world of global trade and shows us: Containers and tankers don't lie. Let's cut through the political rhetoric and see what the tea leaves of maritime are telling us, as well as the strategies some business leaders are employing to navigate the trade wars.

Chinese President Xi Jinping launched the Silk Road Economic Belt component of the One Belt One Road (OBOR) initiative at Kazakhstan in 2013. OBOR is a development strategy and framework that focuses on connectivity and cooperation among countries primarily in Eurasia. It consists of two main components, the land-based "Silk Road Economic Belt" (SREB) and ocean-going "Maritime Silk Road" (MSR). This book studies the equilibrium or balance between overland and maritime trade routes of OBOR. This book has two major sections. The interpretive section examines contemporary media narratives related to the OBOR initiative and how contemporary commentators appropriate narratives about historical events related to the maritime Silk Road to interpret current policy agendas and legitimize diplomatic or economic exchanges. In terms of institutional studies, the chapters related to Asian Infrastructure Investment Bank (AIIB) will look at the issues facing the Bank in its quest in forming a new world platform for multilateral development financing. The other section, the empirical case study of the publication highlights the fact that Euro-China High Speed Rail (HSR) and Central Asia-China HSR are not viable at the moment as passenger volume is not sufficient to justify the HSR line. This section examines the overland route of the OBOR and looks at recent Chinese HSR history and conventional sub-high speed rail technology development, and identifies technical & economic criteria determining the appropriate technology for a certain line. The chapter in this section will use the developed criteria to analyze the various rail linkage projects currently under study in the OBOR framework, highlight the economic, bureaucratic and geo-political challenges that these projects likely face and lay down conditions that will determine the outcome of these projects.

In the last few years, countries in the former Soviet Union and South America have become major players. Compared to other businesses, however, import export companies have a very low startup cost. You do not need any special license or degree; what you need to succeed is the expert advice presented in this new, comprehensive manual. This is a business you run from home, and travel is mostly optional. The year 2010 marked when the National Bureau of Economic Research declared an end to the Great Recession. The economy had shed over six million jobs in 2008 and 2009, but few had been recalled to work by 2010. Today, government policies have yet to make a significant dent in unemployment. In *End Unemployment Now*, Ravi Batra explores why this is the case. He explains how joblessness can be completely eliminated—in just two years, and without the help of our painfully incompetent Congress. The President and the Federal Reserve have the legal authority to generate free-market conditions that will quickly end the specter of unemployment, all without involving Congress. Some examples of how to end unemployment without congressional intrusion:

- Creating a bank by the FDIC to compete with banking giants and then charging only 5% interest rates on credit card balances, instead of the standard 10-35% seen today
- Banning mergers among large and profitable firms, as such mergers directly cause layoffs and reinforce monopoly capitalism
- Aid to small businesses in the form of cheap loans and government contracts, because small firms have been real job creators since 1980, while Big Business has been a job destroyer
- Offer retiree bonds to increase the incomes of pensioners who live on savings and whose incomes have been practically destroyed by the collapse of

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

Just getting started with product research and sourcing? Stuck trying to find ideas or find that "perfect" winning product? Want to find good selling products that others are ignoring? Interested in wholesale or private label products? If you answered yes, then this book is for you. If you are an experienced seller or are looking to do arbitrage this book will have less value as I don't discuss sourcing by arbitrage. I don't do arbitrage, so I don't teach it. This book is written for the new or struggling seller wanting to source wholesale or private label products. What you will learn: Basic steps for finding top selling products How to generate product ideas and look for trends How to validate demand Tips for finding suppliers Analyzing data to help you pick a product It took me 5 months of research before I pulled the trigger on my first products to sell on Amazon. Five months and countless hours. I have pages of notes with product ideas in many different categories. Some were wholesale products, others were ideas for my own products. I had some money set aside to buy inventory. But I couldn't commit. I was looking for...not necessarily the perfect product, but, well yeah, the perfect product. Fear of choosing "wrong" was holding me back. I knew that product selection was key to success so I needed to choose right. Another part of the problem was I had bigger ideas-I wanted to create a brand and I had some ideas as to what sorts of products I would carry. But those ideas required more capital than I was willing to invest for my first product. As a result, I put so much pressure on myself to dream big and think towards the future that I did...nothing! Another hold up was I was a little skittish to follow the advice to source from Chinese suppliers. It seemed so complicated for a beginner. Could I not take a little less profit and source domestically? Were there not manufacturers that could produce my ideas in North America? Yes, and yes. Ultimately the delays helped me because I learned a lot by joining Facebook groups and listening to and learning from the experiences of others. I devoured the advice in forums as well as blogs, books, webinars, and courses. I learned of the pitfalls of private label that the gurus selling you the dream never talk about. And finally, I did pull the trigger. I put together this guide to help any of you who are feeling a little gun-shy too. I put this book together for all of you who have the brains to say "Hey, if everyone buys top 100 selling products won't that saturate the market?" I put this book together to help you find great products from many different approaches. After reading this, you should feel confident enough to find a product and get started with your e-commerce business.

Doing business in China is tougher than you think. Not only is the culture vastly different, but China's experience in manufacturing is still developing. It will be a few years before the majority of manufacturers are up to world standards. In the meantime, quality, contract laws, schedules and logistics must be closely monitored. As a result, the things Westerners must do to be successful are far different from dealing with American or European manufacturers. The best way to quickly come up to speed on these differences and how to handle them is to learn from the experience of others. Through over 20 extraordinary executive interviews, Rosemary Coates captured the essence of sourcing and manufacturing in China. '42 Rules for Sourcing and Manufacturing in China (2nd Edition)' is a pragmatic approach that every businessperson headed to China must read. For business people who are experienced in doing business in China, or for first-time visitors, this book will provide valuable insights from real executives and experts. These executives offer their personal experiences and recommendations about sourcing and manufacturing in China. Going beyond simple cultural do's and don'ts, you will discover: how business is really done how you can make things happen in China the mistake westerners often make, and how to avoid them what made these executives successful Based on her 25 years of supply chain experience, much of it spent living and working across Asia, Rosemary Coates has become an expert on doing business in China. Her own personal experiences in China are interwoven into this book.

Look closely at any typically "American" article of clothing these days, and you may be surprised to see a Japanese label inside. From high-end denim to oxford button-downs, Japanese designers have taken the classic American look-known as ametora, or "American traditional"-and turned it into a huge business for companies like Uniqlo, Kamakura Shirts, Evisu, and Kapital. This phenomenon is part of a long dialogue between Japanese and American fashion; in fact, many of the basic items and traditions of the modern American wardrobe are alive and well today thanks to the stewardship of Japanese consumers and fashion cognoscenti, who ritualized and preserved these American styles during periods when they were out of vogue in their native land. In Ametora, cultural historian W. David Marx traces the Japanese assimilation of American fashion over the past hundred and fifty years, showing how Japanese trendsetters and entrepreneurs mimicked, adapted, imported, and ultimately perfected American style, dramatically reshaping not only Japan's culture but also our own in the process.
