Teach your child to memorize an age old poem. It will be with her/him for life. My Grandfather taught it to my father in 1887 when he was 5. My Father taught it to me in 1940 when I was 5. I taught it to my children. Make a video of your child reciting the poem and upload it to YouTube. Let your child start a family tradition. Any professional photographer would understand how light is important to photography. The quality of every snapshot is judged by the light effects at play. Too much or too little light can ruin a pretty picture. Flash photography is the art of using flash devices to balance the light requirements of a picture. Flash is used as a primary light source in cases where natural light is insufficient. If you use your flash effectively it can be your best friend, helping to give you perfect images shot after shot. There are many flash techniques that a photographer can make use of to give his pictures perfect lighting. There is the straight flash technique where the flash device is attached to or placed next to the camera. The bounce flash technique bounces the light off a surface so that the light is more diffused. The muted flash is used to allow for a dim/muted detail in the background. The tipped flash technique is a combination of bounce flash and straight flash. The feather flash is used for a large group of people. Many beginner enthusiasts

spend good money on the latest flashguns, with all the gizmos and buttons, thinking that is all they need. Well, as in any art form, it takes a lot of practice to learn how to use all sorts of flash devices to master the techniques so that you can get the desired results in each and every photograph.

And entirely new way to look at photography. Presented as a series of short stories about the journey that is learning to be a creative photographer. Perfect for a beginner, surprisingly eye-opening for a professional.

Gregory the Great was pope from 590-604 and left behind a substantial literary heritage. His most ambitious work and one of the most popular works of scriptural exegesis in the middle ages was the *Moralia in Job*, commenting the book of Job in 35 books running to over half a million words. *Saint Gregory's Commentary on Job* was written between 578 and 595, begun when Gregory was at the court of Tiberius II at Constantinople, but finished only after he had already been in Rome for several years. This is Volume 1 of 3 - containing Books 1-10

Your personal photographs have a worth that can't be measured in dollars and cents. They're likely the one thing you would grab on the way out of a burning house – an irreplaceable record of the life you lead, of friends and family, and of the occasions with which you mark passing years. The funny thing is, most people aren't entirely happy with their photographs. And that's where *Photography For Dummies* comes in. You don't need a fancy camera with multiple, removable lenses to get good pictures. The problem is, nearly every book on photography assumes that you're using one. But this book assumes that you're using a point-and-shoot camera for all your pictures. In fact, this may be the most complete guide available for taking pictures with a modern point-and-shoot camera. This revised edition of *Photography For Dummies* helps you choose film (much simpler than you'd think), load film into the camera (no big sweat), and understand how to hold the camera (yes, there are right and wrong ways). You'll also discover tips about dealing with your photofinisher – a far more important factor in getting good results than most people realize, especially in the digital age. What's more, you'll

The eye of the camera lens is a window to our world. Through it, we see beauty, tragedy, and the passing of our lives. Sometimes, if we are especially fortunate, we are privileged to view fleeting moments in history. "Eye Remember" is a personal glimpse at the people, places, and events that shaped a generation of post World War II "baby-boomers." This volume contains photos, all from the author's personal collection, and profiles of celebrities, activists, and political leaders from those times. They colored the lives of us all.

Jacek Lidwin presents "Unknown People", a book containing 126 black and white street portraits. This book highlights provoking and contemporary examples of the medium of portraiture. Jacek is trying to express his perspective on individuals, unknown people who he meets in the streets of Poland. His art illustrates Osho's words: "We are born alone, we live alone and we die alone. Aloneness is our very nature but we are not aware of it". He is inspired by street

Photographer, author, and educator Roberto Valenzuela has a proven track record for teaching and explaining difficult concepts to photographers of all skill levels. His remarkable ability to break down complicated ideas into understandable, approachable elements that photographers can truly grasp—and then use their newfound knowledge to improve their

photography—made his first book, *Picture Perfect Practice*, a breakout success. In *Picture Perfect Posing*, Roberto takes on the art of posing. For many photographers, after learning to compose an image and even light it properly, a portrait can still easily be a failure if the pose is not natural, elegant, and serving the needs of both the subject and the photographer. Instead of just showing page after page of poses—like most posing books on the market—Roberto actually breaks down the concept of posing by examining the anatomy, starting with the core foundation: the spinal chord and neck. Building from there, Roberto discusses every component of what makes poses work, as well as fail. How should the model hold her hands? Bend her elbows? Position her fingers? Should the model look toward or away from the camera, and why? It all depends on what the photographer wants for the shot, and Roberto discusses the entire process, from the intent of the photographer through the execution of the pose. For those who have been discouraged by an inability to pose their subjects, or who have simply not known where to start in order to "figure it out," *Picture Perfect Posing* is the essential resource they need to learn how posing truly works, and how they can learn to direct the exact pose they need for the shot they want.

Understand your camera's capabilities. Master the skills of exposure, composition and focus. Take amazing photos; no post-processing, no Photoshop, just your own vision. With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, it's fair to say that digital cameras have now become so powerful that they have left many of their users behind. Most photographers are able to take competent shots in a range of conditions, or fix

imperfect exposures in Photoshop or Lightroom, but very few have the skill to really push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's photos are given his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, including mid-range, compact and mirrorless models, and the emphasis is on getting results by improving your own skills, not wasting money on expensive professional-level equipment and software.

A time to reflect on my seventy years of life. Maybe some folks will be interested in my life and the folks I have met, or maybe not. This is a non-traditional memoir, filled with alphabetical vignettes not chronological ones. I have made a foray into fiction with an asterisk: in those cases where I have marked the vignette as fictional, it might be 100 percent not true, but in many cases I knew of, was part of, or heard from others about the story itself. At any rate, the entire book is my recollection of things past, and as in all recollections, the more distant the

memory the clearer the details.

Steve is just an ordinary guy living in a rural town north of Toronto. And when the world goes to shit, everyone looks to him for help. Heck, he even gets a girlfriend out of it. But survival in a broken world can be tough when everyone wants to have what you have. Even the corpses lumber after him through the adventure of staying alive. The top of his whole existence is the bikers, they blame him for everything that happens. And when things go real wrong, they try to take their revenge. Little do they know he has friends. From the mind of Douglas Owen comes the story of the zombie apocalypse as it unfolds just north of Toronto. Steve is nice, polite, caring, and trying to survive in a country with gun control laws.

Braxton notices things that most people don't. He's an observer, a zoner, and in the process he's taken a backseat to his own life. His mind often travels into his own little world to escape the job he hates and the best friend who brings him down. From much needed inspiration from his mother, he finally can find reason to push on in his musical path. But success is difficult while he still feels trapped in his own head and he must come to terms with the reality that even his family won't always be there to pick him up. A chance encounter with a stranger gives him a reason to break free from his mundane routine. She pulls him out of his neverending spiral and he learns that maybe reality isn't so bad after all.
