A classic Canadian story of the bravery and ingenuity of three animals who find their way home. First published in 1961, *The Incredible Journey* tells the story of three pets: a young Labrador retriever, an old bull terrier, and a Siamese cat. While their owners are away in England, they are being cared for by a family friend at his home in the country. But a miscommunication occurs between the friend and his housekeeper when he goes on a hunting trip, and the animals are left alone for a several hours, with a gnawing instinct that something has gone wrong. They soon set off on a journey to find home, which instinct tells them is to the west. They travel 400 kilometres across the Northern Ontario wilderness, facing many obstacles along the way: swift-flowing rivers and the rugged landscape; wild animals and unsympathetic humans; starvation, injuries and sheer exhaustion. Separately they would not have survived, but together this disparate group prevails, and they find their way home to the family they love.

And she never talked back to her nanny, Miss Barmy, although it was almost impossible to keep quiet, some days. She really was a little too good. Which is why she liked to sit by the Rat. The Rat was not good at all . . . Hilarious, inventive, and irresistably rodent-friendly, Emmy and the Incredible Shrinking Rat is a fantastic first novel from acclaimed picture book author Lynne Jonell.

THE INTERNATIONAL BESTSELLER: "Beautifully told."—CNN • "A remarkable story...worth retelling and celebrating."—USA Today • "Oh, it's a good one!"—Fox News A "beautiful story of a brotherhood between enemies" emerges from the horrors of World War II in this New York Times bestseller by the author of Spearhead. December, 1943: A badly damaged American

bomber struggles to fly over wartime Germany. At the controls is twenty-one-year-old Second Lieutenant Charlie Brown. Half his crew lay wounded or dead on this, their first mission. Suddenly, a Messerschmitt fighter pulls up on the bomber's tail. The pilot is German ace Franz Stigler—and he can destroy the young American crew with the squeeze of a trigger... What happened next would defy imagination and later be called “the most incredible encounter between enemies in World War II.” The U.S. 8th Air Force would later classify what happened between them as “top secret.” It was an act that Franz could never mention for fear of facing a firing squad. It was the encounter that would haunt both Charlie and Franz for forty years until, as old men, they would search the world for each other, a last mission that could change their lives forever.

How can otherwise normal, moral persons - as citizens, voters, and jurors - participate in a process that is designed to take the life of another? In *DEATH BY DESIGN*, research psychologist Craig Haney argues that capital punishment, and particularly the sequence of events that lead to death sentencing itself, is maintained through a complex and elaborate social psychological system that distances and disengages us from the true nature of the task. Relying heavily on his own research and that of other social scientists, Haney suggests that these social psychological forces enable persons to engage in behavior from which many of them otherwise would refrain. However, by facilitating death sentencing in these ways, this inter-related set of social psychological forces also undermines the reliability and authenticity of the process, and compromises the fairness of its outcomes. Because these social psychological forces are systemic in nature - built into the very system of death sentencing

itself - Haney concludes by suggesting a number of inter-locking reforms, derived directly from empirical research on capital punishment, that are needed to increase the fairness and reliability of the process. The historic and ongoing public debate over the death penalty takes place not only in courtrooms, but also in classrooms, offices, and living rooms. This timely book offers stimulating insights into capital punishment for professionals and students working in psychology, law, criminology, sociology, and cultural area studies. As capital punishment receives continued attention in the media, it is also a necessary and provocative guide that empowers all readers to come to their own conclusions about the death penalty.

Greece in the age of Heroes. Patroclus, an awkward young prince, has been exiled to the kingdom of Phthia. Here he is nobody, just another unwanted boy living in the shadow of King Peleus and his golden son, Achilles. Achilles, 'best of all the Greeks', is everything Patroclus is not - strong, beautiful, the child of a goddess - and by all rights their paths should never cross. Yet one day, Achilles takes the shamed prince under his wing and soon their tentative companionship gives way to a steadfast friendship. As they grow into young men skilled in the arts of war and medicine, their bond blossoms into something far deeper - despite the displeasure of Achilles's mother Thetis, a cruel and deathly pale sea goddess with a hatred of mortals. Fate is never far from the heels of Achilles. When word comes that Helen of Sparta has been kidnapped, the men of Greece are called upon to lay siege to Troy in her name. Seduced by the promise of a glorious destiny, Achilles joins their cause, Torn between love and fear for his friend, Patroclus follows Achilles into war, little knowing that the years that follow will test everything they have learned, everything they hold dear. And that, before he is ready, he will be forced to surrender his friend to the hands of Fate. Profoundly moving and breathtakingly original, this rendering of the epic Trojan War is a dazzling feat of the imagination, a devastating love story, and an almighty battle between gods and kings, peace and glory, immortal fame and the human heart.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize

when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Roland Barthes – the author of such enduringly influential works as *Mythologies* and *Camera Lucida* - was one of the most important cultural critics of the post-war era. Since his death in 1980, new writings have continued to be discovered and published. *The Afterlives of Roland Barthes* is the first book to revisit and reassess Barthes' thought in light of these posthumously published writings. Covering work such as Barthes' *Mourning Diary*, the notes for his projected *Vita Nova* and many writings yet to be translated into English, Neil Badmington reveals a very different Barthes of today than the figure familiar from the writings published in his lifetime.
