Marketing has become ridiculously complicated, but yours doesn't have to be. With decades of hands-on experience, expert strategist and writer Drew Neisser has witnessed the dramatic evolution of business-to-business marketing. Working alongside giant brands like IBM, as well as startups and mid-size companies, and interviewing over four hundred top practitioners, Neisser uncovered the top four characteristics that all successful marketers have in common: they are Courageous, Artful, Thoughtful, and Scientific (CATS). These four characteristics form the basis for the framework in Renegade Marketing. Over the years, Neisser created a twelve-step formula to radically simplify B2B marketing and build an unbeatable brand. In his book, he shares the stories of marketing CATS as he gives you the tools to: Walk through a highly refined discovery process that culminates in finding your brand's purpose Define your company's purpose in eight words or fewer Build team support for new marketing initiatives while establishing your unique brand story, voice, and design Assemble effective marketing plans that engage employees, inspire customers, and attract new business Drive perpetual growth by creating a culture with metrics, marketing technology, and experimentation

Industrial internet of things (IIoT) is changing the face of industry by completely redefining the way stakeholders, enterprises, and machines connect and interact with each other in the industrial digital ecosystem. Smart and connected factories, in which all the machinery transmits real-time data, enable industrial data analytics for improving operational efficiency, productivity, and industrial processes, thus creating new business opportunities, asset utilization, and connected services. IIoT leads factories to step out of legacy environments and arcane processes towards open digital industrial ecosystems. Innovations in the Industrial Internet of Things (IIoT) and Smart Factory is a pivotal reference source that discusses the development of models and algorithms for

predictive control of industrial operations and focuses on optimization of industrial operational efficiency, rationalization, automation, and maintenance. While highlighting topics such as artificial intelligence, cyber security, and data collection, this book is ideally designed for engineers, manufacturers, industrialists, managers, IT consultants, practitioners, students, researchers, and industrial industry professionals.

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

B2B marketing is functioning in an increasingly fast-paced and complex business landscape, with a wealth of new technologies, tools and channels, and where customers are more in control of the buying process than ever before. With the imperative to

become 'digital', B2B marketers have become consumed by the marketing activity itself - the tactics - instead of the outcomes marketers want and need to achieve for customers and businesses. B2B Marketing Strategy provides fresh insight into the challenges marketers are facing in such an environment and offers a new framework for developing B2B marketing strategy and plans. Written by an internationally recognised and award winning senior marketing strategist, B2B Marketing Strategy is a thought-provoking and comprehensive exploration of the state of B2B marketing. Expertly examined, this book will challenge the perspective of B2B marketers by confronting and refuting the many fallacies that currently dominate the industry. Filled with real-world case studies and practical, actionable insights, B2B Marketing Strategy takes the reader through three phases of thinking, doing and being different in order to make B2B marketing memorable in the hearts and minds of customers, creating lasting customer engagement.

Featuring insights from practising professionals and case studies from organizations including Microsoft, Accenture, O2 and Fujitsu, it also contains guidance on developing the competencies needed for account-based marketing and managing your ABM career. There's a new truth in B2B marketing: if you want to move products, you need to move minds. Most companies suffer from a delusion, and it's this: that buyers always make decisions in a rational, logical, and economic way. The result is a slew of features-driven B2B marketing that few people really care about. In recent years B2B customers have evolved. They don't just want to buy from businesses anymore, they want to buy into them. The problem is too few B2B companies realize this. They continue with the same product-centric marketing that increases revenue by a percentage point here and there. It seems safe but it's dangerously short-sighted, because it doesn't deliver the transformational and long-term growth that makes businesses category leaders. It's even more important to address this issue at such a critical and delicate moment in the world economy. Marketing leaders require strategies that have an exponential, rather than an incremental, effect on brand, marketing and sales, and to implement them they need the new super-skills this book teaches. This involves establishing a core purpose, shifting the focus from products to people, from features to feelings and from messaging to storytelling, acknowledging that neuro science has proved that people buy on emotion and justify with fact. In other words, it requires a completely different mindset to the one that's prevalent right now, one that we call 'Humanizing B2B'.

Hello. You're a B2B SaaS marketer, right? Yeah, I thought I recognized you. What are you working on? What's that? "Whatever the sales team needs to close the next deal." It's hard, right? The maniacal race to convert leads is an addiction for tech companies. But such deal-driven focus means your B2B marketing often looks identical to that of your growing competitor set: complex, technical, product-led sales messages blurred into another whitepaper. It's self-sabotage: 'fail to differentiate, blend in, become invisible'. If this all sounds familiar, you need this book. Why? Boring2Brave is a step-by-step guide to showing how B2B marketing done differently can influence strategy and '10X' results. It's 'get-off-the-treadmill' time. Stop being measured in metrics you've always known are meaningless and start building your company's brand and value. Mark's 'Bravery-as-a-Strategy' approach unshackles you from the stale, ineffective drudge of conventional B2B software selling. This book will equip you to inject audacity, invention and white-hot competitive advantage into your B2B marketing. Just by being brave. A former editor of Marketing Week magazine, Mark's 20-year career at the heart of global B2B marketing has seen him grow more than 50 B2B technology companies across the world.

Surprising rules for successful monetization Innovation is the most important driver of growth. Today, more than ever, companies need to innovate to survive. But successful innovation—measured in dollars and cents—is a very hard target to hit. Companies obsess over being creative and innovative and spend significant time and expense in designing and building products, yet struggle to monetize them: 72% of innovations fail to meet their financial targets—or fail entirely. Many companies have come to accept that a high failure rate, and the billions of dollars lost annually, is just the cost of doing business. Monetizing Innovations argues that this is tragic, wasteful, and wrong. Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork. That happens when you put customer demand and willingness to pay in the driver seat—when you design the product around the price. It's a new paradigm, and that opens the door to true game change: You can stop hoping to monetize, and start knowing that you will. The authors at Simon Kucher know what they're talking about. As the world's premier pricing and monetization consulting services company, with 800 professionals in 30 cities around the globe, they have helped clients ranging from massive pharmaceuticals to fast-growing startups find success. In Monetizing Innovation, they distil the lessons of thirty years and over 10,000 projects into a practical, nine-step approach. Whether you are a CEO, executive leadership, or part of the team responsible for innovation and new product development, this book is for you, with special sections and checklist-driven summaries to make monetizing innovation part of your company's DNA. Illustrative case studies show how some of the world's best innovative companies like LinkedIn, Uber, Porsche, Optimizely, Draeger, Swarovski and big pharmaceutical companies have used principles outlined in this book. A direct challenge to the status quo "spray and pray" style of innovation, Monetizing Innovation presents a practical approach that can be adopted by any organization, in any industry. Most monetizing innovation failure point home. Now more than ever, companies must rethink the practices that have lost countless billions of dollars. Monetizing Innovation presents a new way forward, and a clear promise: Go from hope to certainty.

"What do you think will impress a potential business customer most? A slick marketing pitch or a concrete example of how your products or services have helped genuine businesses make real money? Here is a radically different approach for business-to-business marketers, based on proof not promises. Business customers and traditional consumers do not buy the same way; they are driven by different impulses and respond to different approaches. Business buyers behave differently and it's time we marketed to them differently. B2B and B2C marketing satisfy their respective customers' needs and wants in different ways. B2B product development is driven by technological progress, B2C driven by fashion and trends. B2B purchases are often a

considered, group decision while B2C purchases are personal and more impulsive.

This book is for practitioners working to move their companies forward, not theorists and academicians. And it's for those wishing to transform their business, not apply a short-term patch.

Named a Top 10 Business Strategy Book of 2018 by Inc. magazine In his pioneering book *Seizing the White Space*, Mark W. Johnson argued that business model innovation is the most proven path to transformational growth. Since then, Uber, Airbnb, and other startups have disrupted whole industries; incumbents such as Blockbuster, Sears, Toys "R" Us, and BlackBerry have fallen by the wayside; and digital transformation has become one of the business world's hottest (and least understood) slogans. Nearly a decade later, the art and science of business model innovation is more relevant than ever. In this revised, updated, and newly titled edition, Johnson provides an eminently practical framework for understanding how a business model actually works. Identifying its four fundamental building blocks, he lays out a structured and repeatable process for reinventing an existing business model or creating a new one and then incubating and scaling it into a profitable and thriving enterprise. In a new chapter on digital transformation, he shows how serial transformers like Amazon leverage business model innovation so successfully. With rich new case studies of companies that have achieved new success and postmortems of those that haven't, *Reinvent Your Business Model* will show you how to: Determine if and when your organization needs a new business model Identify powerful new opportunities to serve your existing customers in existing markets Reach entirely new customers and create new markets through disruptive business models and products Seize opportunities for growth opened up by tectonic shifts in market demand, government policy, and technologies Make business model innovation a more predictable discipline inside your organization Business model innovation has the power to reshape whole industries--including retail, aviation, media, and technology--redistributing billions of dollars of value. This book gives you the tools to reshape your own company for enduring success. *Reinvent Your Business Model* is the strategic innovation playbook you need now and in the future.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships – except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and

easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships—and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, The Challenger Sale argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one—the Challenger—delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the

customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

Apply software-inspired management concepts to accelerate modern marketing In many ways, modern marketing has more in common with the software profession than it does with classic marketing management. As surprising as that may sound, it's the natural result of the world going digital. Marketing must move faster, adapt more quickly to market feedback, and manage an increasingly complex set of customer experience touchpoints. All of these challenges are shaped by the dynamics of software—from the growing number of technologies in our own organizations to the global forces of the Internet at large. But you can turn that to your advantage. And you don't need to be technical to do it. Hacking Marketing will show you how to conquer those challenges by adapting successful management frameworks from the software industry to the practice of marketing for any business in a digital world. You'll learn about agile and lean management methodologies, innovation techniques used by high-growth technology companies that any organization can apply, pragmatic approaches for scaling up marketing in a fragmented and constantly shifting environment, and strategies to unleash the full potential of talent in a digital age. Marketing responsibilities and tactics have changed dramatically over the past decade. This book now updates marketing management to better serve this rapidly evolving discipline. Increase the tempo of marketing's responsiveness without chaos or burnout Design "continuous" marketing programs and campaigns that constantly evolve Drive growth with more marketing experiments while actually reducing risk Architect marketing capabilities in layers to better scale and adapt to change Balance strategic focus with the ability to harness emergent opportunities As a marketer and a manager, Hacking Marketing will expand your mental models for how to lead marketing in a digital world where everything—including marketing—flows with the speed and adaptability of software.
