Insiders Guide To Egg Donation A Compassionate And Comprehensive Guide For All Parents To Be

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition – these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives

brought by the book's European and American contributors – in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.

The maternal womb modifies the genetics of the embryo conceived with own egg or donated by another woman, as in a case of a lesbian couple (who'd prefer to use the ROPA method) or with an unrelated surrogate. With healthy habits maintained over time we can optimise the inheritance we receive from our parents and grandmothers and pass it on to our grandchildren

If you need help having a baby, reproductive technology can supply the answer. But it also raises a host of questions that won't arise until after the child is born: What will you say to "Where did I come from?" when the answer includes a donor or surrogate? Will knowing the truth about how you conceived make your child love you less? Will having a baby with someone else strain your relationship with your spouse or partner? What will grandparents, family members, friends, and coworkers think? Dr. Diane Ehrensaft--a developmental and clinical psychologist who's worked with families formed using assisted reproductive technology for more than 20 years--helps you anticipate the big questions and find solutions that are right for you and your loved ones. Dr. Ehrensaft offers

The Immortal Life of Henrietta Lacks meets Get Out in this landmark investigation of racial inequality at the core of the heart transplant race. In 1968, Bruce Tucker, a black man, went into Virginia's top research hospital with a head injury, only to have his heart taken out of his body and put into the chest of a white businessman. Now, in *The Organ Thieves*, Pulitzer Prize–nominated journalist Chip Jones exposes the horrifying inequality surrounding Tucker's death and how he was used as a human guinea pig without his family's permission or knowledge. The circumstances surrounding his death reflect the long legacy of mistreating African Americans that began more than a century before with cadaver harvesting and worse. It culminated in efforts to win the heart transplant race in the late 1960s. Featuring years of research and fresh reporting, *The Organ Thieves* is a story that resonates now more than ever, when issues of race and healthcare are the stuff of headlines and horror stories.

Carbon Market and its Clean Development Mechanism (CDM), which allows developing nations to receive carbon credits when they reduce their emissions below their baselines. The carbon market, an economic system that created a price for carbon for the first time, is now used in four continents, is promoted by the World Bank, and is recommended even by leading oil and gas companies. However, one critical problem for the future of the Kyoto Protocol is the continuing impasse between the rich and the poor nations. Who should reduce emissions — the rich or the poor countries? This book is about the 21st session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (UNFCCC), or COP21, held from 30 November to 11 December 2015 in Paris, which brought together around 40,000 participants in total — with delegates representing each country, observers, and civil society members. It is one of the largest climate conferences ever organized. Co-written by Graciela Chichilnisky, who proposed and designed the carbon credit emissions trading market, this book is a must read for academics and professionals studying, implementing and analyzing global climate change policies; interested advance undergraduates and postgraduates interested in the follow up of the Kyoto Protocol and UNFCCC 1992 founding.

creativity. JAMES BEARD AWARD FINALIST Houston's culinary reputation as a steakhouse town was put to rest by Chris Shepherd, the Robb Report's Best Chef of the Year. A cook with insatiable curiosity, he's trained not just in fine-dining restaurants but in Houston's Korean grocery stores, Vietnamese noodle shops, Indian kitchens, and Chinese mom-and-pops. His food, incorporating elements of all these cuisines, tells the story of the city, and country, in which he lives. An advocate, not an appropriator, he asks his diners to go and visit the restaurants that have inspired him, and in this book he brings us along to meet, learn from, and cook with the people who have taught him. The recipes include signatures from his restaurant—favorites such as braised goat with Korean rice dumplings, or fried vegetables with caramelized fish sauce. The lessons go deeper than recipes: the book is about how to understand the pantries of different cuisines, how to taste and use these flavors in your own cooking. Organized around key ingredients like soy, dry spices, or chiles, the chapters function as master classes in using these seasonings to bring new flavors into your cooking and new life to flavors you already knew. But even beyond flavors and techniques, the book is about a bigger story: how Chris, a son of Oklahoma who looks like a football coach, came to be “adopted” by these immigrant cooks and families, how he learned to connect and share and truly cross cultures with a

sense of generosity and respect, and how we can all learn to make not just better cooking, but a better community, one meal at a time.

Big Tobacco meets Silicon Valley in this corporate exposé of what happened when two of the most notorious industries collided—and the vaping epidemic was born. “The best business book I’ve read since *Bad Blood*.”—Jonathan Eig, *New York Times* bestselling author of *Ali: A Life* Howard Willard lusted after Juul. As the CEO of tobacco giant Philip Morris’s parent company and a veteran of the industry’s long fight to avoid being regulated out of existence, he grew obsessed with a prize he believed could save his company—the e-cigarette, a product with all the addictive upside of the original without the same apparent health risks and bad press. Meanwhile, in Silicon Valley, Adam Bowen and James Monsees began working on a device that was meant to save lives and destroy Big Tobacco, but they ended up baking the industry’s DNA into their invention’s science and marketing. Ultimately, Juul’s e-cigarette was so effective and so market-dominating that it put the company on a collision course with Philip Morris and sparked one of the most explosive public health crises in recent memory. In a deeply reported account, award-winning journalist Lauren Etter tells a riveting story of greed and deception in one of the biggest botched deals in business history. Etter shows how Philip Morris’s struggle to innovate left Willard desperate to acquire Juul, even as his own team sounded alarms about the startup’s reliance on underage customers. And she shows how Juul’s executives negotiated a lavish deal that let them

pocket the lion's share of Philip Morris's \$12.8 billion investment while government regulators and furious parents mounted a campaign to hold the company's feet to the fire. The Devil's Playbook is the inside story of how Juul's embodiment of Silicon Valley's "move fast and break things" ethos wrought havoc on American health, and how a beleaguered tobacco company was seduced by the promise of a new generation of addicted customers. With both companies' eyes on the financial prize, neither anticipated the sudden outbreak of vaping-linked deaths that would terrorize a nation, crater Juul's value, end Willard's career, and show the costs in human life of the rush to riches—while Juul's founders, board members, and employees walked away with a windfall.

A biography of venture capitalist and entrepreneur Peter Thiel, the enigmatic, controversial, and hugely influential power broker who sits at the dynamic intersection of tech, business, and politics A New York Times Book Review Editors' Choice “Max Chafkin’s *The Contrarian* is much more than a consistently shocking biography of Peter Thiel, the most important investor in tech and a key supporter of the Donald Trump presidency. It’s also a disturbing history of Silicon Valley that will make you reconsider the ideological foundations of America’s relentless engine of creative destruction.”—Brad Stone, author of *The Everything Store* and *Amazon Unbound* Since the days of the dot-com bubble in the late 1990s, no industry has made a greater impact on the world than Silicon Valley. And few individuals have done more to shape Silicon Valley than Peter Thiel. The billionaire venture capitalist and entrepreneur has been a behind-the-scenes operator influencing countless aspects of our contemporary way of life, from the technologies we use every day to the delicate power balance between Silicon Valley, Wall Street, and Washington. But despite his power and the ubiquity of his projects, no public figure is quite so mysterious. In the first major biography of Thiel, Max Chafkin traces the trajectory of the innovator's singular life and

worldview, from his upbringing as the child of immigrant parents and years at Stanford as a burgeoning conservative thought leader to his founding of PayPal and Palantir, early investment in Facebook and SpaceX, and relationships with fellow tech titans Mark Zuckerberg, Elon Musk, and Eric Schmidt. The Contrarian illuminates the extent to which Thiel has sought to export his values to the corridors of power beyond Silicon Valley, including funding the lawsuit that destroyed the blog Gawker and strenuously backing far-right political candidates, notably Donald Trump for president in 2016. Eye-opening and deeply reported, *The Contrarian* is a revelatory biography of a one-of-a-kind leader and an incisive portrait of a tech industry whose explosive growth and power is both thrilling and fraught with controversy.

Our understanding of what makes a family has undergone a revolution in the last few decades, from same-sex parenthood to surrogacy, donor conception, and IVF. But what has the impact been on children? In *We Are Family*, Professor Susan Golombok visits lesbian mothers, gay fathers, single parents, donor conception parents, co-parents, trans parents, surrogates, and donors, and, more importantly, their children, to find out if they are as well-adjusted, happy, and emotionally stable as children from traditional nuclear families. And she discovers that the answer is yes — and sometimes even more so. Susan's work at the Centre for Family Research at Cambridge proves that any family set-up can provide a loving, secure home for a child — although, the children from these families will often face prejudiced attitudes from others. Since the 1970s, when

she was first drawn to this area of research after reading about lesbian mothers whose children were being removed from their care, Susan has worked tirelessly to challenge outdated attitudes and prevent families being split up for no good reason. This book tells the stories of those families — their struggles and their triumphs — while celebrating love and family in all its wonderful variations.

#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments

should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

This comprehensive, accessible guide leads you with confidence through every decision you'll have to make during the adoption process -- including the ones that you'd never know to expect. So you've made the decision to adopt. What's next? For starters, how do you know whether domestic or international adoption is right for you? (And what are the real differences between the two?) Adoption insider Elizabeth Swire Falker answers these questions and many more. As an attorney who practices in the area of adoption and has worked with hundreds of families, and as an adoptive parent herself, she offers expert advice on each stage of the process. Complete with checklists, tips, sidebars, and plenty of advice, it shows you how to: Identify which adoption experts you do and don't need Find the right birth mother or choose the right country for your family-and how to spot red flags in potential situations Select an attorney or agency and prepare for your home visit Finance an adoption on a budget, manage the red tape, and get around the roadblocks Navigate all of the complex emotions that surface along the way With Elizabeth Swire Falker's warm yet been-there-done-that voice, *The Insider's Guide to Adoption* is sure to become a tried-and-true resource for adoptive parents everywhere.

A Pulitzer Prize-winning journalist offers an intimate investigation of China's one-child policy and its consequences for families and the nation at large. For over three decades, China exercised unprecedented control over the reproductive habits of its billion citizens. Now, with its economy faltering just as it seemed poised to become the largest in the world, the Chinese government has brought an end to its one-child policy. It may once have seemed a shortcut to riches, but it has had a profound effect on society in modern China. Combining personal portraits of families affected by the policy with a nuanced account of China's descent towards economic and societal turmoil, Mei Fong reveals the true cost of this controversial policy. Drawing on eight years of research, Fong reveals a dystopian legacy of second children refused documentation by the state; only children supporting their parents and grandparents; and villages filled with ineligible bachelors. A "vivid and thoroughly researched" piece of on-the-ground journalism, *One Child* humanizes the policy that defined China and warns that the ill-effects of its legacy will be felt across the globe (The Guardian, UK).
