Is my child too sick to go to daycare today? When can my child go back to daycare? What should I look for when I am considering a daycare center for my new baby? Every parent of a child in daycare asks these questions. Dr. Leigh Grossman's new book, *THE PARENT'S SURVIVAL GUIDE TO DAYCARE INFECTIONS*, presents the facts about different germs and provides guidance on what to do when your child has been exposed to or is sick with a specific infection. How do I choose a daycare center that uses current infection control practices? How long does a child need to stay home when they do have an infection? Can I prevent infection in my child? What are the appropriate and inappropriate uses of antibiotics? What are the best practices for treating a specific childhood infection? Designed to be the home reference book for parents of young children in daycare and preschool, *THE PARENT'S SURVIVAL GUIDE TO DAYCARE INFECTIONS* is a comprehensive and clear book, with an easy-to-use format, informational quick reference tables, and a detailed index. Providing up-to-date guidance, the book includes contributions from 39 pediatric expert physicians. With chapters on most of the infections that parents of children in daycare and preschool encounter, the authors explain what the illness is, how the infection is spread, how the illness is diagnosed, how long it lasts and how long the child needs to stay at home. This book is a ready reference for the children in your life and an excellent gift for the new parent.

Lean User Testing A Pragmatic Step-by-Step Guide to User Tests If you believe in agile software development and delivering value to your customers and your company, reading this book is the right decision as it will greatly support your process to identify and create valuable, feasible and usable products. "We Know What We Need to Build" Who hasn't yet heard that dreaded, gut feeling-based notion in the past? To my experience, it is rarely valid, but more often an expression of an outdated thinking, that values output over outcome, that believes in requirement documents and micromanaging the product team. This book, however, is dedicated to completely different approach, that Steve Blank once wrapped up in his famous quote: *There are No Facts Inside Your Building - Get Outside.*" And you should do so as early as possible in the process -it is the most important task of any product team. This book is therefore a deliberately short, focused, pragmatic manual for everyone, who designs, develops or markets software: Product manager, engineers and designers (UX/UI). It is based on hundreds of user interviews that I have run up to now and provides all you need to know to start your own user interview initiative in about two hours of your time. Save up to 90% of Typical User Interview Costs And there is more good news: The lean user testing approach will save up to 90% of the costs compared to outsourcing user interviews to a professional usability agency, but will return at least 80% of possible insights. **Avoid Building Expensive Features Nobody Wants** No more flying blind in the early stages: Test your hypotheses quickly and turn product discovery into your advantage over the competition. Learn how to avoid wasting

Get Free Insignia Tv Online User Guide

money on software nobody wants and how to deliver value instead. Obsolete features aren't just expensive to build. They also need to be maintained and probably be removed at a later stage again, not to mention their opportunity costs: Imagine what you could have built instead. Gain More Runway for Your Startup Optimizing the cycle-time of your product hypotheses will focus available engineering and product management resources on valuable, usable and feasible features, thus extending your runway and improving your standing for the next funding round. Improve Communication with Stakeholders User tests greatly simplify the communication with stakeholders - the interviews, you will be running, are your product organization's first line of defense when it comes to turning down unreasonable feature requests. About the Author The author has worked for many years as a product manager and agile coach (Scrum, Lean Startup, Lean Change). During that time, he developed B2C as well as B2B software, mainly for startups, including a former Google subsidiary. He originally studied chemistry, business administration, and law. However, he has never worked in a laboratory. Instead, back in 1996, he released the first online shop software with SAP R/3 connectivity, only to learn that the early bird does not necessarily catch the worm. After his move to Berlin, Germany, he founded a marketplace for local service. In 2011, Entrepreneurs Club Berlin e.V. followed, as did Startup Camp Berlin- one of the largest German startup conferences today. His latest project, Age Of Product - Invent For Your Customers, focuses on the exchange of knowledge between product people, designers, and developers. It is about lessons learned and best practices on how to identify which product to build and how to build it in an efficient way. Age Of Product will host events and workshops in Berlin from autumn 2015 on and might also organize a new conference in the near future."

cultures, immigration and citizenship and learning to appreciate differences. These stories are intended to foster intercultural awareness and sensitivity and encourage individual and community action to assist newcomers in their adjustment. While written to help youth understand their classmates and friends, Kids Like Me also includes discussion questions, self-directed activities and research ideas for teachers and other mentors that can be used in classrooms, youth clubs and community settings. Richly illustrated with photos and maps of each home country, the text presents countless opportunities to explore and understand different cultures and new friends. Young people who have come from all over the world share their stories and invite their new neighbors to see that in so many ways these kids are just like me.

Rely on this practical, end-to-end guide on cyber safety and online security written expressly for a non-technical audience. You will have just what you need to protect yourself—step by step, without judgment, and with as little jargon as possible. Just how secure is your computer right now? You probably don't really know. Computers and the Internet have revolutionized the modern world, but if you're like most people, you have no clue how these things work and don't know the real threats. Protecting your computer is like defending a medieval castle. While moats, walls, drawbridges, and castle guards can be effective, you'd go broke trying to build something dragon-proof. This book is not about protecting yourself from a targeted attack by the NSA; it's about armoring yourself against common hackers and mass surveillance. There are dozens of no-brainer things we all should be doing to protect our computers and safeguard our data—just like wearing a seat belt, installing smoke alarms, and putting on sunscreen. Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension,

When the space drama Battlestar Galactica debuted on ABC in 1978, it was expected to be the most popular new program of the year. Instead, it was attacked as a Star Wars rip-off and canceled after a mere 17 stories. The author acknowledges the show was full of dramatic clichés and scientific inaccuracies, but despite these shortcomings, Battlestar Galactica was a dramatically resonant series full of unique and individual characters, such as Commander Adama (Lorne Greene) and ace warrior Captain Apollo (Richard Hatch). The author contends

that Battlestar Galactica was a memorable attempt to make science fiction accessible to mainstream television audiences. The brilliant work of artist John Dykstra brought a new world of special effects to network television. Battlestar Galactica also skillfully exploited legends and names from both the Bible and ancient mythology, which added a layer of depth and maturity to the weekly drama.

Tapping is an activity that many of us engage in everyday without even thinking about what we are doing. We drum our fingers on a desk or table while we wait for something to happen. We tap our forehead while we are figuring out a problem. We stroke our chin or rub our head as we contemplate the issues of the day. Each of these acts is our body's clumsy way of attending to a need for peace or resolution. Tapping prayer is a spiritual practice that intentionally focuses our attention on the rhythmic movement of our finger tips. It directs the energy of God's healing onto specific points on our body that through the practice of acupuncture and reiki, have shown to be conduits of healing. Tapping prayer is the most exciting addition to my spiritual tool belt in 25 years of ministry. It's fun and effective and easy to administer alone, one on one, or in a group. It is very flexible...and did I mention, effective? Tapping prayer is effective in bringing individuals into a one on one relationship with God that creates peace, healing, and a desire to share those gifts with other individuals, communities, and Creation. Tapping prayer is an integration of sacred wisdom from the East and West. It is a spiritual practice that blends a

knowledge of the Spirit's movement through our body with an understanding of meridian tapping based on the Emotional Freedom Technique created by Gary Craig. Tapping prayer brings balance and peace to individuals who are experiencing spiritual distress. By gently tapping on identified points of entry for the Holy which correspond to meridian end points in acupuncture, while praying for God to attend to a particular pain, we focus God's intention to heal and in most cases actually experience a peace which is not of our own doing. By acknowledging pain instead of wishing for relief, we recognize God's interest to heal us and indeed, God heals us. This technique can be used for individuals who are seeking peace from a wide variety of issues ranging from: trauma such as a car accident, an abusive parent, a friend killed in battle, a sudden illness, a job loss, a fire, a damaged relationship. Tapping prayer can also facilitate forgiveness and/or letting go. Tapping prayer is effective in praying for others (surrogate prayer tapping focused on an individual who is not present to the prayer tapping), for events (9/11, Sandy Hook, a company leaving a community), or Creation (an oil spill, deforestation, strip mining). Wherever there is a disruption to the peaceful flow of the Holy Spirit, tapping prayer can be applied. When I first learned about the Emotional Freedom Technique as a tool to help veterans in our community, I thought it was weird. The tapping. The repetition. It seemed...odd. This was not how I understood healing from trauma to work, and yet it worked. Clearly, my Western roots were showing. When I got home from the training I began using the technique with members of my community and saw such dramatic results I had to learn more. They also found it strange, but effective. Some folks were uncomfortable with the language of "energies" and "chi," so I experimented a bit and added more traditional faith language to the mix. I dug deeply into my own faith traditions and discovered a theology

Get Free Insignia Tv Online User Guide

of healing that accompanied tapping prayer. I found that by invoking God's presence into the act of tapping, people from varying faith experiences were able to connect to the Holy on a deeper level. They began to experience God as very real and very present in their lives. They asked to learn more about this new way of praying. They discovered that by using tapping prayer on a wide variety of issues, their relationship with God grew deeper. If you are ready to draw closer to God's healing love for you, please take responsibility for your participation in tapping prayer, and let's pray! --Todd Farnsworth
