The first modern survey of a fascinating yet under appreciated art form, abundantly illustrated with new color photography. In this volume, a team of noted Italian art historians trace the evolution of Renaissance intarsia through a discussion of twelve of the most important intarsia cycles. These include the famous studiolo of Federico da Montefeltro in the ducal palace at Urbino; the sacristy of Santa Maria in Organo at Verona, which Vasari described as the most beautiful in all of Italy; and the choir of Santa Maria Maggiore in Bergamo, the cartoons for which were prepared by Lorenzo Lotto. Drawing on the latest scholarship and, in some cases, newly discovered documentary evidence, the authors explain the historical context and iconography of these masterpieces, as well as their connections to the painting, sculpture, and architecture of the time. Their insightful essays are illustrated with some two hundred new color images, the result of an extensive photographic campaign carried out exclusively for this work. Admirably filling in a unique chapter of art history, Renaissance Intarsia will be essential reading for scholars and enthusiasts of art, and a powerful source of inspiration for contemporary artists and craftsmen.
