What is to be done about prostitution? Is it work or is it violence? Are women involved in prostitution offenders or victims? Is prostitution a private or a political issue? The answers to these questions vary depending on many factors, including where in the world you live. This book provides a valuable, detailed international comparison of the laws, policies and interventions in eight countries across Europe (England and Wales, France, Sweden and Moldova) and Asia (India, Pakistan, Thailand and Taiwan). The countries were chosen because of their contrasting social policy and legislative frameworks. Specific topics covered include national social and historical contexts in relation to prostitution; legal frameworks - with discussion of existing laws and policies and debates around legislation and decriminalisation; key issues faced - particularly relating to reasons for entering prostitution and analysis of policies and interventions. The case studies are brought to life by giving voice to the experiences of women involved in prostitution themselves together with the personal reflections of the authors. Aimed at a wide audience of students, academics, policy makers and practitioners, this book makes an important contribution to academic and policy debates in the fields of criminology, law, social policy, women's studies, sociology, politics and international relations.

Arguing convincingly that mainstream theory lacks the tools to adequately explain European integration, this challenging book draws upon critical political economic theory to develop a more comprehensive and consistent analysis of the processes of integration. Although not claiming that states have ceded their role as "masters of the treaties," the contributors develop innovative case studies of national and transnational processes to illustrate the salience of trans-European business networks and the primacy of neoliberalism as central organizing concepts of the post-Maastricht European project.

This volume is a collection of papers that highlights some recurring themes that have surfaced in the generative tradition in linguistics over the past 40 years. The volume is more than a historical take on a theoretical tradition; rather, it is also a "compass" pointing to exciting new empirical directions inspired by generative theory. In fact, the papers show a progression from core theoretical concerns to data-driven experimental investigation and can be divided roughly into two categories: those that follow a syntactic and theoretical course, and those that follow an experimental or applied path. Many of the papers revisit long-standing or recurring themes in the generative tradition, some of which seek experimental validation or refutation. The merger of theoretical and experimental concerns makes this volume stand out, but it is also forward looking in that it addresses the recent concerns of the creation and consumption of data across the discipline.

"A candid and truthful appraisal of the economic, financial, and social problems the Confederacy had to face."-Saturday Review of Literature In this groundbreaking study, Charles W. Ramsdell maintains that deficiencies on the homefront were fundamental to the collapse of the Confederacy. The war, he argues, raised unexpected problems that the southern people were unprepared to solve. Weakened and demoralized, the civilian population could not adequately support its armies, causing the Confederacy to break down from within long before the military situation appeared desperate. PRAISE FOR THE BOOK "Stephenson's admirable Foreword and his bibliography of Ramsdell's writings give the book something of the character of a memorial volume that makes it the more welcome."-C. Vann Woodward Walter Lynwood Fleming Lectures in Southern History Charles W. Ramsdell (1877-1942) was professor of history at the University of Texas at Austin. He is the author of Reconstruction in Texas and A School History of Texas.

Nonviolent state behavior in Japan, this book argues, results from the distinctive breadth with which the Japanese define security policy, making it inseparable from the quest for social stability through economic growth. While much of the literature on contemporary Japan has resisted emphasis on cultural uniqueness, Peter J. Katzenstein seeks to explain particular aspects of Japan's security policy in terms of legal and social norms that are collective, institutionalized, and sometimes the source of intense political conflict and change. Culture, thus specified, is amenable to empirical analysis, suggesting comparisons across policy domains and with other countries. Katzenstein focuses on the traditional core agencies of law enforcement and national defense. The police and the military in postwar Japan are, he finds, reluctant to deploy physical violence to enforce state security. Police agents rarely use repression against domestic opponents of the state, and the Japanese public continues to support, by large majorities, constitutional limits on overseas deployment of the military. Katzenstein traces the relationship between the United States and Japan since 1945 and then compares Japan with postwar Germany. He concludes by suggesting that while we may think of Japan's security policy as highly unusual, it is the definition of security used in the United States that is, in international terms, exceptional.

The dynamic, collaborative management model that saved a U.S. manufacturing city When car-making giant General Motors decided to close its plant in Lansing, Michigan, in 1996, one person—the city’s newly elected mayor—stood up and said “no.” Initially, it was the cry of a man in the wilderness. Not once in its century-long history had GM reversed a decision to close a plant. But Mayor David Hollister quietly went to work building the Lansing Works! Keep GM! movement and succeeded in defying all the odds. Lansing remains GM’s Oldsmobile headquarters. Hollister’s collaborative problem-solving approach—the Second Shift model—succeeded in bringing together state and regional politicians, economic developers, private sector firms, labor unions, educators, and residents of the region. Powerful, persuasive, and well-organized, this coalition implemented a strategic, six-dimensional framework to achieve the seemingly impossible: • Identifying: Name the challenge and its impact • Partnering: Develop meaningful relationships • Building: Construct your strategy as you go • Solving: Engage in constant problem solving • Celebrating: Mark successful milestones • Persevering: Adapt and endure The Lansing Works! Keep GM! movement was a victory of people over bureaucracy, of a can-do attitude over cynicism—a story rarely told in today’s complex, technological, and often dehumanizing world of large business and out-of-control government. And the best part was that, in the end, both sides came away winners. It’s proof positive that when the public and private sectors work together as equal partners, amazing things can happen. One of the great business sagas of modern times, Second Shift provides a proven, practical design for problem solving that anyone can apply in any business, large or small.

This accessible text provides a comprehensive narrative and interpretative account of the entire history of the Communist International, 1919-1943. By incorporating the most recent Western and Soviet research the authors explain the legendary complexities of Comintern history and chart its degeneration from a revolutionary internationalist organisation into an obedient instrument of Soviet foreign policy. Key themes include: continuities and discontinuities between the Leninist and Stalinist phases, Bolshevisation versus national traditions, and the role of leading individuals in the Comintern apparatus. A selection of documents will elucidate these central themes.
