This is an emerging field of research, teaching and practical interest in international trade and commercial law, requiring reference to multiple areas of law, including both private and public international law, the law of specific commercial transactions and arbitration. For the first time Transnational Commercial Law combines all these relevant issues in one book, and provides a basis for further study as well as detailed, cutting edge academic analyses. It provides a compact yet accessible guide to the most important cornerstones of this evolving legal discipline. Transnational Commercial Law is aimed primarily for use on LLM courses and master's programmes in commercial law. Students are presented with the actual contractual rules in the wider context of the general legal framework, and situates it within the theoretical debate, providing a truly international perspective on transnational commercial law in a globalised world.

In today's globalised world, an understanding of international trade is essential for those studying and practising law, business, banking and finance. International Trade Law offers a comprehensive and informed analysis of the complexities of an international sale transaction through case law, policy documents, legislation, international conventions and rules adopted by international organisations such as the ICC. Focusing on international sales of goods and the various relations that arise as a result of sale contract, this book considers and discusses: Standard trade terms, the Convention on International Sales of Goods 1980 and the UNIDROIT Principles for International Commercial Contracts 2004; Issues relating to E-Commerce including electronic transport documents, especially electronic bills of lading; International transportation of cargo, both unimodal (sea, air, land and rail) and multimodal, the various conventions affecting such transportation and the proposed new convention drafted by UNCITRAL and CMI; Insurance and payment mechanisms, in particular letters of credit and the recently adopted UCP 600; Dispute resolution including issues of jurisdiction, applicable law, arbitration and mediation; Corruption as a major challenge to conducting business and the various anti-corruption conventions, in particular the OECD Anti-Bribery Convention 1997 and the UN Convention Against Corruption 2003. Accessible to students encountering this often challenging area of the law for the first time, International Trade Law clarifies a range of topics through Tables and diagrams, and directs the reader to relevant further reading, online resources, and journal articles throughout.

This book is one of the first to link company law to the law of succession by concentrating on family businesses. It shows that, to understand the legal framework underlying the daily operations of family businesses, one needs legal analysis, empirical data, psychological and sociological knowledge. The book works on the premise that, since many businesses have been founded by families, practitioners need to develop an understanding of the legal background of such businesses and build up experience to be able to create contracts, trusts, foundations and other legal mechanisms to give shape to systems and procedures for the transfer of shares and control within the family. Comparing the national legal order, techniques, and mechanisms in a range of countries, the book examines parallel developments in these fields of law across the world. Finally, it demonstrates the room for companies, shareholders and the members of a family to develop individual solutions within the legal framework for transferring businesses and shares to the next generation.

Several contributions allow the reader to familiarise themselves with the general subject matter; others scrutinise the particular issues Small States face when confronted with an international dispute and discuss new and innovative solutions. Researchers, policy advisors and practitioners will find a wealth of insights, information and practical ideas in this book.

This book brings together the top international sales law scholars from twenty-three countries to review the Convention on Contracts for International Sale of Goods (CISG) and its role in the unification of global sales law. It reviews the substance of CISG rules and analyzes alternative interpretations. A comparative analysis is given of how countries have accepted, interpreted, and applied the CISG.

The law of international trade raises questions of great intellectual depth. In Principles of Law Relating to International Trade, the author draws from his practical and teaching experience to give a comprehensive introduction to the key areas of law that apply in international business. For the benefit of readers unfamiliar with the English legal system and the many associated branches of English civil law, the book includes a brief introduction to, among other topics, constitutional, criminal, and employment law. The branches of law directly related to international trade, such as contract, insurance, competition, carriage of goods, and sale of goods, are concisely covered in the main text. Case studies and examples are used to clarify the issues for the non-specialist, making international trade law accessible to those taking professional examinations in this field, as well as business executives. The extensive use of footnotes and inclusion of case commentaries bring into clearer focus the many facets of this complicated subject and would be of benefit to the international trade law specialist.

The remainder of the volume comprises two sets of papers on contemporary substantive and procedural issues in international commercial arbitration. The first set contains in-depth reports on the topical subjects of arbitration of foreign investment disputes, the granting of provisional or interim measures with respect to arbitration and the enforceability of awards, supplemented by commentary from the point of view of

various specializations and regions. The second, also using the format of reports and commentary, addresses modalities of conciliation and settlement in relation to arbitration, including various non-binding (ADR) processes, issues (drafting step clauses and confidentiality) in integrated dispute resolution systems, which may combine conciliation and arbitration, and the role of arbitrators as settlement facilitators.

The Guide to International Legal Research is an authoritative and comprehensive reference tool for law students and practitioners. Authored annually by The George Washington International Law Review, the Guide is designed to assist both novices and professionals with their international legal research. Following an introduction by Professor Christopher J. Borgen, the Guide is organized into two parts. In the first part, chapters are divided by regions. Each regional chapter includes an overview of the geopolitical climate in that region and lists government resources,

legal resources, media resources, and resources by topic. Where appropriate, these sources are subdivided by country. Many of the chapters discuss general multi-national organizations as well as international trade organizations and agreements that are specific to the region. The Guide also provides an overview of what each source covers and how it can be most effective. The second part of the Guide covers substantive areas of international law, including general international law, public health law, space law, human rights law, group rights, intellectual property, international trade, international business transactions, tax law, environmental law, labor law, and international security law, among other topics. Much like the regional sections, the substantive chapters begin with a section on international governance followed by a section on secondary sources pertinent to that subject area.

Every October the Fordham Corporate Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. None of the chapters are merely descriptive, all raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy. All chapters, if necessary, are revised and updated before publication. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The Annuals are an indispensable guide through the sea of international antitrust law. The Fordham Corporate Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published.

This book provides an accessible introduction to selected new issues in transnational law, and connects them to existing theoretical debates on transnational business regulation. More specifically, (i) it introduces the argument about the evolving character of contemporary international business regulation; (ii) it provides an overview of some of the main fields of law that are currently important for firms that operate across borders; and (iii) it sets out an interpretive framework for making sense of disparate developments occurring across a number of jurisdictions, among which are the form of regulation and style of enforcement, issues of legal certainty, and behavioural aspects of regulation. The selected topics are indicative of some key issues confronting businesses looking to operate across national borders, as well as policy makers seeking to introduce and enforce meaningful regulatory standards in an increasingly global society. Topics include: consumer law; product liability; warranty law and obsolescence; collective redress; alternative dispute resolution; corporate wrongdoing; corporate governance; and e-commerce. This timely work offers a novel perspective on transnational business law and examines a range of legal issues that preoccupy companies operating transnationally. This book is intended not only for law students looking for an introduction, overview or commentary on the contemporary state of international business law, but also for anyone looking for an introduction to the regulation of business in a global, inter-connected economy.

First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

It includes in-chapter learning objectives, exercises, summaries, boxed inserts, and a detailed glossary. In addition, a sample data disk is bound into each copy of the book.
