Mindfulness and yoga are widely said to improve mental and physical health, and booming industries have emerged to teach them as secular techniques. This movement is typically traced to the 1970s, but it actually began a century earlier. Wakoh Shannon Hickey shows that most of those who first advocated meditation for healing were women: leaders of the "Mind Cure" movement, which emerged during the late nineteenth and early twentieth centuries. Instructed by Buddhist and Hindu missionaries, many of these women believed that by transforming consciousness, they could also transform oppressive conditions in which they lived. For women - and many African-American men - "Mind Cure" meant not just happiness, but liberation in concrete political, economic, and legal terms. In response to the perceived threat posed by this movement, white male doctors and clergy with elite academic credentials began to channel key Mind Cure methods into "scientific" psychology and medicine. As mental therapeutics became medicalized and commodified, the religious roots of meditation, like the social-justice agendas of early Mind Curers, fell by the wayside. Although characterized as "universal," mindfulness has very specific historical and cultural roots, and is now largely marketed by and accessible to affluent white people. Hickey examines religious dimensions of the Mindfulness movement and clinical research about its effectiveness. By treating stress-related illness individualistically, she argues, the contemporary movement obscures the roles religious communities can play in fostering civil society and personal wellbeing, and diverts attention from systemic factors fueling stress-related illness, including racism, sexism, and poverty.

Among restrictions on imports, safeguard measures are particularly controversial in that they are invoked in the absence of any unfair trade practice. Safeguards interfere substantially with the normal stream of trade, and their improper application undermines the objectives of the WTO. Recent WTO cases have brought the attention of trade lawyers to the absence of comprehensive materials on this complex subject, and highlighted the need for a reliable guide to the WTO rules on safeguards. Dr. Y.S. Lee, perhaps the world's foremost authority on safeguard measures, has provided such a guide, here updated in its second edition. Readers may expect from this book comprehensive coverage on safeguards to date with legal analysis of the important issues in the interpretation and application of the current rules on safeguards. The author also proposes modifications to enhance and clarify the discipline of safeguards. The crucial issues raised include the following: economic and political justifications of safeguards; applicability of GATT Article XIX; interpretation and application of the Agreement on Safeguards, including non-discriminatory application of safeguards and justification of safeguards-in-

response; transitional product-specific safeguard measures against China; and emergency safeguards to trade in services. The focus of the book is on the WTO Agreement on Safeguards, as interpreted by WTO Panel and Appellate Body reports in key cases, including Korea Dairy Products, Argentina Footwear, United States Wheat Gluten, United States Lamb Meat, Chile Price Band System, United States Line Pipe and United States Steel Products. Dr. Lee summarizes the various key findings and provides lucid and well-balanced analysis of these reports. Other WTO rules considered include GATT Articles XIX, XII, and XVIII; the Understanding on Balance of Payments of the GATT 1994; the Agreement on Agriculture; the Agreement on Textile and Clothing; Article XII of the General Agreement on Trade in Services (GATS); and the Protocol on the Accession of the People's Republic of China. Safeguard Measures in World Trade comes at a time when safeguard measures continue to mount in various parts of the world and a possible domino effect can destabilize the international trading system. It will be of inestimable value to government officials, trade lawyers, international business people, and academics in trade law and related fields.

The Open Economy Macromodel: Past, Present And Future has two main objectives. The first is to assess the state of play of the Open Economy Macromodel by bringing together those who developed it with those who apply it today. The second is to assess possible directions for its future development. The volume is divided into three parts. Part one focuses on the models, men, and institutions involved in the development of the international macroeconomic model. In this section, the contributors examine the two monetary approaches to the balance of payments, as well as the relationship between long-term fluctuations in real exchange rates and inflation. Part two deals with the present state of the models by looking at Robert Mundell's theory of optimum currency areas (OCAs) and its relationship with key currencies. The chapters in this section also consider the impact of exchange rate variability on labor markets, as well as the interactions between theoretical developments and real-world behavior in the open economy macromodel. The third and last part of this volume provides a perspective on the future by looking at alternate models and institutional perspectives. Several contributors examine the relationship between asset prices, the real exchange rate, and unemployment in a small economy via what they call "a medium-run structuralist perspective". The future of institutional structures necessary to conduct international economic policy is the subject of the last chapters in part three of the volume.

Verico discusses the ASEAN economic integration from dual perspectives of time span (trade, investment and finance) and framework (bilateral, sub-regional, regional and regional plus). The work is a comprehensive study of the integration in the wake of the ASEAN Economic Community (AEC)'s inauguration in late 2015. Examining various economic agreement levels from the ASEAN Free Trade Area (AFTA), Bilateral Free Trade Agreement (BFTA) and the AEC to financial integration in ASEAN, Verico attempts to envisage the future of ASEAN in completing its regional economic integration from trade to investment and finance. Verico argues that, in the absence of a customs union, ASEAN must utilize the open-regionalism frameworks of the ASEAN Plus One, ASEAN Plus Three, Regional Comprehensive Economic Partnership and others in order to shift its economic integration level in this way.
