Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics

of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well – to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

This book challenges the usual introductions to the study of law. It argues that law is inherently political and reflects the interests of the few even while presenting itself as neutral. It considers law as ideology and as politics, and critically assesses its contribution to the creation and maintenance of a globalized and capitalist world. The clarity of the arguments are admirably suited to provoking discussions of the role of law in our contemporary world. This third edition provides contemporary examples to sustain the arguments in their relevance to the twenty-first century. The book includes an analysis of the common sense of law; the use of anthropological examples to gain external perspectives of our use and understanding of law; a consideration of central legal concepts, such as order, rules, property, dispute resolution, legitimation and the rule of law; an examination of the role of law in women's subordination and finally a critique of the effect of our understanding of law upon the wider world. This book is ideal for undergraduate and postgraduate students reading law.
