Criminology, or the study of crime, has developed rapidly as a subject in recent years, while crime and the problem of how to respond to it have become major concerns for society as a whole. This book provides a succinct, highly readable - and much needed - introduction to criminology for those who want to learn more, whether they are already studying the subject, thinking of doing so, or just interested to discover what criminology is about. Introducing Criminology begins by asking basic questions: what is crime? what is criminology?, before examining the ways in which crime has been studied, and looking at the main approaches and schools of thought within criminology and how these have been developed. The authors focus particularly upon attempts to understand and explain crime by the disciplines of psychology and sociology, and consider also the impact of feminist and postmodern thought on the development of the subject. In the second part of the book the authors take three very different topics to illustrate themes raised in the first half of the book, exploring the particular issues raised by each topic, and showing how criminologists have gone about their work.

The book explores police legitimacy and crime control, with a focus on the European region. Using comparative case studies, the contributions to this timely volume examine the effects of a transition to

democracy on policing, public attitudes towards police legitimacy, and the ways in which perceptions of police legitimacy relate to compliance with the law. Following these case studies, the authors provide recommendations for improving police legitimacy and controlling crime, in these particular sociopolitical environments, where the police are often associated with previous military or paramilitary roles. The techniques used by these researchers may be applied to studies for policing in other regions, with potential applications within Europe and beyond. Chapters present topical issues of crime, crime control and human emotions regarding crime, criminals, law enforcement and punishment in contemporary societies. This book will be of interest to researchers in criminology and criminal justice, as well as political science and public policy. This book is highly recommended for anyone interested in procedural justice and legitimacy, encounters between citizens and the state, the effectiveness of governmental institutions, and democratic development. It stands alone in its broad, cross-national contributions to understanding these issues. -Wesley G. Skogan, PhD, Professor of Political Science, Northwestern University, Chicago, IL, USA

Through theoretical and empirical examination of legal frameworks for court diversion, this book interrogates law's complicity in the debilitation of disabled people. In a post-deinstitutionalisation era, diverting disabled people from criminal justice systems and into mental health and disability services is considered therapeutic, humane and socially just. Yet, by drawing on Foucauldian theory of biopolitics, critical legal and political theory and critical disability theory, Steele argues that court diversion continues disability oppression. It can facilitate criminalisation, control and punishment of disabled people who are not sentenced and might not even be convicted of any criminal offences. On a broader level, court diversion contributes to the longstanding phenomenon of disability-specific coercive intervention, legitimates prison incarceration and shores up the boundaries of foundational legal concepts at the core of jurisdiction, legal personhood and sovereignty. Steele shows that the United Nations Convention on the Rights of Persons with Disabilities cannot respond to the complexities of court diversion, suggesting the CRPD is of limited use in contesting carceral control and legal and settler colonial violence. The book not only offers new ways to understand relationships between disability, criminal justice and law; it also proposes theoretical and practical strategies that contribute to the development of a wider re-imagining of a more progressive and just socio-legal order. The book will be of interest to scholars and students of disability law, criminal law, medical law, socio-legal studies, disability studies, social work and criminology. It will also be of interest to disability, prisoner and social justice activists.

Recent years have witnessed an increase in the attention given to the later stages of criminal careers. Research upon this topic has charted the main factors associated with the termination of criminal careers, outlined some of the possible reasons behind these relationships and started to develop theoretical explanations for such relationships. Collected together for the first time are some of the most important contributions to this field of research. The collection focuses upon the initial explorations into this topic, the most commonly observed findings, the cessation of offending by specific offender-types and theoretical matters. An introductory essay by the editor provides a thorough overview of the work in this area and highlights the reasons why the termination of criminal careers will become increasingly important to criminologists and criminal justice policy makers alike.

New examples and case studies of ethical dilemmas illustrate today’s climate of distrust, dissension, and dysfunction to encourage you to think critically about what is considered “ethical”. New video interviews with criminal justice professionals offer you career advice, provide you with insights into a variety of career paths, and discuss challenges and misconceptions of each profession.

The present book includes a set of selected papers from the First International Conference on Agents and Artificial Intelligence (ICAART 2009), held in Porto, Portugal, during January 19–21, 2009. The conference was organized in two simultaneous tracks: “Artificial Intelligence and Agents.” The book is based on the same structure. ICAART 2009 received 161 paper submissions, from more than 37 different countries in all continents. After a blind review process, only 26 were accepted as full papers, of which 21 were selected for inclusion in this book, based on the classifications provided by the Program Committee. The selected papers reflect the interdisciplinary nature of the conference. The diversity of topics is an important feature of this conference, enabling an overall perception of several important scientific and technological trends. These high-quality standards will be maintained and reinforced at ICAART 2010, to be held in Valencia, Spain, and in future editions of this conference. Furthermore, ICAART 2009 included five plenary keynote lectures given by Juan Carlos Augusto (University of Ulster), Marco Dorigo (IRIDIA, Free University of Brussels), Timo Honkela (Helsinki University of Technology), Edward H. Shortliffe (Arizona State University) and Paulo Urbano (University of Lisbon). We would like to express our appreciation to all of them and in particular to those who took the time to contribute with a paper to this book.

Provides complete coverage of the use and results of the contemporary methods employed in criminology and criminal justice research today.

A comprehensive introduction to all the key topics, criminological theories, and important themes that students will cover when studying criminology and criminal justice.

Criminology is at a crossroads. In the last two decades it has largely failed to produce the kind of new intellectual frameworks and empirical data that might help us to explain the high levels of crime and interpersonal violence that beset inner city areas and corrode community life. Similarly, it has failed to adequately explain forms of antisocial behaviour that are just as much a part of life in corporate boardrooms as they are in the ghettos of north America and the sink estates of Britain. Criminology needs to rethink the problem of crime and re-engage its audience with strident theoretical analysis and powerful empirical data. In *New Directions in Crime and Deviancy* some of the world's most talented and polemical critical criminologists come together to offer new ideas and new avenues for analysis. The book contains chapters that address a broad range of issues central to 21st century critical criminology: ecological issues and the new green criminology; the broad impact of neoliberalism upon our cultural and economic life; recent signs of political resistance and opposition; systemic and interpersonal forms of violence; growing fear and enmity in cities; the backlash against the women's movement; the subjective pathology of the serial killer; computer hacking and so on. Based on key papers presented at the historic York Deviancy Conferences, this cutting-edge volume also contains important critical essays that address criminological research methods and the production of criminological knowledge. It is key reading material for those with an academic interest in critical, cultural and theoretical criminology, and crime and deviance more generally.

"With Writing in the Disciplines"--Cover.

The chapters that appear delve into the state of quantitative methods in the discipline, group-based trajectory modeling, spatial dependence models, structural equation models, meta-analysis, social network designs, panel data modeling, and censored regression techniques. This book will be highly beneficial for readers who seek to stay as current as possible as they pursue answers to questions about crime and justice using quantitative research methods. This book was originally published as a special issue of the *Journal of Criminal Justice Education*.

Travis Hirschi is one of the most cited criminologists of the twentieth century. His work has provoked controversy and heated debates about the causes of crime, proper research methods, and the most effective policies to prevent and control crime. Known as a spokesperson for social control theory, Hirschi always ties his ideas to the mode of investigation and the mode of investigation to substantive concerns. Theoretical contributions and research methodology have been twin driving forces throughout his career. This book contains representative selections of Hirschi's work over many years. It is remarkable how little is known about Hirschi's life and career. John H. Laub's introduction combines a discerning account of Hirschi's life and work, accompanied by an interview with the author. Laub's volume covers various topics: methodological issues; principles of casual analysis; criteria of causality; longitudinal research on crime; rules and the study of deviant behavior; correlations between crime and delinquency; control theory of delinquency; intelligence, causes, and prevention of delinquency; family structure and crime; theory of crime; crime and criminality; deviance; white collar crime; and juvenile justice systems. Now available in paperback, this is an invaluable text for courses in criminology, as well as a valuable addition to professional libraries.
