This fully revised and updated edition provides a comprehensive, non-technical introduction to the range of approaches to understanding mass communication. *Dynamics of Media Writing Third Edition* gives students transferable skills that can be applied across all media platforms—from traditional mass media formats like news, public relations, and advertising to emerging digital media platforms. Whether issuing a press release or tweeting about a new app, today's media writers need to adapt their message for each specific media format in order to successfully connect with their audience. Throughout this text, award-winning teacher and college media adviser Vincent F. Filak introduces fundamental writing skills that apply to all media, while also highlighting which writing tools and techniques are most effective for specific media formats and why. User-friendly and loaded with practical examples and tips from professionals across mass media, this is the perfect guide for any student wanting to launch a professional media writing career.

Placing convergence at the center of the discussion, this text uses the technologies we employ every day to explain our current media environment, and to project where we might be headed. Rather than discussing each media industry in isolation, *Converging Media* shows how each branch of media -print, visual, and audio - relates to and influences the others.

An Introduction to Political Communication explores the relationship between politics, the media and democracy in the UK, the USA and other contemporary societies. Brian McNair examines how politicians, trade unions, pressure groups, non-governmental organizations and terrorist organizations make use of the media. Separate chapters look at political media and their effects, the work of political advertising, marketing and public relations and the communication practices of organizations at all levels, from grassroots campaigning through to governments and international bodies. Recent developments covered in the new edition include: * the re-election of New Labour in 2001 * the changes in government information and communication policy introduced by the Blair administration since 1997 * the 2000 election of George W. Bush in the United States * the NATO interventions in Kosovo and the former Yugoslavia * the implications for international political communication of September 11 * the emergence of Al-Qaida and the war on terror.

Digital media is changing the ways in which we communicate: we watch TV and movies online, call friends on computers, and read newspapers on cell phones. Placing convergence at the center of the discussion, *Converging Media: A New Introduction to Mass Communication, Third Edition*, by John V. Pavlik and Shawn McIntosh, uses the technologies we employ everyday to explain our current media environment - and to project where we might be headed. Rather than discussing each media industry in isolation, *Converging Media* shows how each branch of media (print, visual, and audio)

relates to and influences the others. This enables students to see the inextricable and dynamic relationship between converging media and traditional media formats. Media Today gives your students the media literacy skills they need to think critically about the role of media in their lives. This book uses a media systems approach to look closely at the production, distribution, and exhibition of media, from Hollywood films to Facebook, to discover cultural, political, and economic forces that shape media now. Completely revised and updated, this 4th edition connects the latest trends, debates, and technologies to the history of media, highlighting the impact and meaning of today's changes to the media landscape, especially how traditional industry boundaries have blurred with digital convergence. Students and instructors will find a full range of supporting materials including interactive quizzes and online video resources at www.routledge.com/textbooks/mediatoday4e.

This book presents a practical approach to pro-environmental challenges faced by companies in the process of restructuring. It contains a broad variety of case

studies from different economic sectors, and small and large businesses, in four European countries: Ukraine, Romania, Germany and Poland. The studies are the results of surveys of companies that had either already restructured or were planning to, and reveal both the weaknesses and strengths in these practices. The book is divided into three parts: explorations of how political and legal factors are embedded in a company's strategy and how they influence the company's behaviour; analyses of companies' activities on matching restructuring with ecology; and approaches to ecoinnovations within the companies. The case studies throughout the book show that the restructuring of a company is an opportunity for the implementation of proecological action and "green" business models. The authors trust that the experiences and good practices of others will prove valuable both for future businessmen (i.e. students), but also for academics and representatives of local government, central environmental agencies, owners and managers of enterprises to be restructured.

controversies. The updated edition features updated statistics and current examples, including the Web 2.0, the firing of Don Imus, coverage of the shootings at Virginia Tech, citizen journalism and blogs, and much more!
