A harrowing investigation of the tortuous path our food products take—from slaughter to Spam On the production line in American packing-houses, there is one cardinal rule: the chain never slows. Under pressure to increase supply, the supervisors of meat-processing plants have routinely accelerated the pace of conveyors, leading to inhumane conditions, increased accidents, and food of questionable, often dangerous quality. In *The Chain*, acclaimed journalist Ted Genoways uses the story of Hormel Foods and its most famous product, Spam—a recession-era staple—to probe the state of the meatpacking industry, including the expansion of agribusiness and the effects of immigrant labor on Middle America. Interviewing scores of line workers, union leaders, hog farmers, and local politicians and activists, Genoways reveals an industry pushed to its breaking point. Along the way, he exposes alarming new trends: sick or permanently disabled workers, abused animals, water and soil pollution, and mounting conflict between small towns and immigrant labor. The narrative moves across the heartland—from Minnesota, to witness the cut-and-kill operation; to Iowa, to observe breeding and farrowing in massive hog barns; to Nebraska, to see the tense town hall meetings and broken windows in reaction to the arrival of Hispanic workers; and back to Minnesota, where political refugees from Burma give the workforce the power it needs to fight back. A searching exposé in the tradition of Upton Sinclair, Rachel Carson, and Eric Schlosser, *The Chain* is a mesmerizing story and an urgent warning about the hidden costs of the food we eat.

A unique illustrated memoir by Sally Wade, the love of George Carlin's life for ten years, *THE GEORGE CARLIN LETTERS: THE PERMANENT COURTSHIP OF SALLY WADE* is a collection of never-before-seen writings and artwork by the late great comedian (representing at least 1/3 of the text in the book), woven into Wade's beautifully told chronicle of the last ten years of their life together. The book provides a rare glimpse into the man behind the legend. George Carlin wrote to Sally daily—notes, postcard, letters...he even started fights on paper; the title is taken from his very last note, which Sally found propped up on her computer upon returning from the hospital the day he died. One of the greatest love stories ever told...hilariously, until the release of this book, no one but Sally has ever seen this side of George Carlin. And everyone is guaranteed to fall in love with both of them.

When viewed from a quiet beach, the ocean, with its rolling waves and vast expanse, can seem calm, even serene. But hidden beneath the sea's waves are a staggering abundance and variety of active creatures, engaged in the never-ending struggles of life—to reproduce, to eat, and to avoid being eaten. With *Sex, Drugs, and Sea Slime*, marine scientist Ellen Prager takes us deep into the sea to introduce an astonishing cast of fascinating and bizarre creatures that make the salty depths their home. From the tiny but voracious arrow worms whose rapacious ways may lead to death by overeating, to the lobsters that battle rivals or seduce mates with their urine, to the sea's masters of disguise, the octopuses, Prager not only brings to life the ocean's strange creatures, but also reveals the ways they interact as predators, prey, or potential mates. And while these animals make for some jaw-dropping stories—witness the sea cucumber, which ejects its own intestines to confuse predators, or the hagfish that ties itself into a knot to keep from suffocating in its own slime—there's far more to Prager's account than her ever-entertaining anecdotes: again and again, she illustrates the crucial connections between life in the ocean and humankind, in everything from our food supply to our economy, and in drug discovery, biomedical research, and popular culture. Written with a diver's love of the ocean, a novelist's skill at storytelling, and a scientist's deep knowledge, *Sex, Drugs, and Sea Slime* enchants as it educates, enthraling us with the wealth of life in the sea—and reminding us of the need to protect it.

Today is Monday. The calls do not come as before. Weeks elapse between them, and when I answer the phone there is no overlap of voices, only my mother's. She spends much of the conversation avoiding mention of the pink elephant trumpeting in the middle of the room. The pink elephant would be my defection to Georgia. When I telephoned with the news of my imminent relocation my father asked, "Georgia, as in the Republic of Georgia by the Black Sea, or Georgia as in the Peach State?" He hoped I meant the former because that Georgia promised unique opportunities to advance the democratic cause of justice. What could Georgia, former land of the Confederacy, offer? Convicting arsonists and thieves in Macon, Georgia, was never Harvard Law grad Natalie Goldberg's dream. The pay is abysmal, the work is exhausting, and the humidity is hell for a woman with curly hair. But when a steamy romance with her high-powered New York boss went bad, Natalie jumped at the first job offered, packed her bags, and headed south. Natalie's leftist Yankee background brands her a conspicuous outsider in this insular community. Her father, a famous civil rights lawyer, refuses to accept her career change—or talk to her. Her best friend begs her to come back home, and Natalie keeps thinking she sees her former lover everywhere. But Natalie's not completely alone. There are a garden-obsessed neighbor, a former beauty queen—turned—defense attorney, and a handsome colleague who has a nervous tic whenever she gets near. And then there's a capital case that has her eating antacids by the truckload. Yep, it's going to be one heckuva long, hot summer. . . .
