Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

In 2000, the Millennium Development Goals set out targets aimed at creating a safer, more prosperous, and more equitable world. If these goals were to be achieved, children's lives would indeed be transformed. In this collection, achievements against these targets are identified, with each contributor examining the progress made in early years provision in Australia, China, England, Greece, the Netherlands, Portugal, South Africa, and Sweden. They highlight the priorities and agendas of their respective governments, and focus on the trends and issues which are particularly relevant to each situation, thereby revealing the social and

educational inequalities that persist across countries. A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families. It is clear that although the past two decades have seen many changes in attitude towards the importance of the early years of life; politically, economically, and environmentally, much still remains to be done if the Millennium Development Goals for young children and their families are to be fully met. Despite this, this volume demonstrates that those who work in this area continue to experience a deep concern for the well-being of young children, which transcends cultures, frontiers, and political and sectarian divides. This book was originally published as a special issue of the International Journal of Early Years Education. This pioneer study goes well beyond the subject of linguistics to encompass economic, sociological, political, and educational approaches to language change. In the context of the development of national resources, the book focuses on language planning--the deliberate change and promotion of language structure and language use. It outlines a theoretical approach to the study of language planning and includes selected case studies which demonstrate the possibilities of broadening and improving national planning by taking linguistic and human resources into explicit account to enhance forecasting. The contributors to this volume include highly renowned experts in their respective academic fields as well as actual language planners. They were brought together on the instigation of a

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Seminar paper from the year 2011 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,3, Ernst Moritz Arndt University of Greifswald (Anglistik/Amerikanistik), course: Hauptseminar: English in Contact, language: English, abstract: There are 24 languages which are regularly used by more than 44.8 million South Africans and almost 80 % of the South African population use one of the African languages at home. "The most commonly spoken home language is isiZulu, which is spoken by 23.8 % of the population, followed by isiXhosa (17.6 %) and Afrikaans (13.3 %)" Although English is the home language of only 8.2 % of the South African population it is still used as a lingua franca throughout the nation. The eleven official languages are used by 99% of the country's population and those languages are all supposed to have equal rights. Belonging to these languages are English and Afrikaans, and nine other African languages: "Sepedi, Sesotho, Setswana, siSwati, Tshivenda, Xitsonga, isiNdebele, isiXhosa, and isiZulu". There are also many other languages spoken in South Africa like for example Arabic, German, Greek, Hindi, Tamil, Hebrew and many more. Some European languages like French, German, and Portuguese are used in South Africa but they are not nearly as influential as English. The historical development of South Africa has brought the question of language forward. The country

became aware of its unique language situation and the chances and problems which are connected to it. After Mandela many people developed a greater interest in smaller languages. The paper is going to explore the language vitality of some of the 11 official South African languages, dealing with the problem of language endangerment/death and language revitalisation. It is going to be seen whether the multilingualism which is propagandized by the government is or can be realised in real life. Due to the lack of valid information for many of the smaller indigenous African languages the paper will mostly look at the situation of Afrikaans and English, only rarely considering the other languages in much detail.

Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Times, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave

together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

This much-awaited volume uncovers the long-lost pages of the major African multilingual newspaper, Abantu-Batho. Founded in 1912 by African National Congress (ANC) convenor Pixley Seme, with assistance from the Swazi Queen, it was published up until 1931, attracting the cream of African politicians, journalists and poets Mqhayi, Nontsisi Mgqweth, and Grendon. In its pages burning issues of the day were articulated alongside cultural by-ways. The People's Paper - comprising both essays and an anthology - explores the complex movements and individuals that emerged in the almost twenty years of its publication. The essays contribute rich, new material to provide clearer insights into South African politics and intellectual life. The anthology unveils a judicious selection of never-before published columns from the paper spanning every

Abantu-Batho had a regional and international focus, and by examining all these dynamics across boundaries and disciplines, The People's Paper transcends established historiographical frontiers to fill a lacuna that scholars have long lamented.

This book argues for the essential use of drawing as a tool for science teaching and learning. The authors are working in schools, universities, and continual science learning (CSL) settings around the world. They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking – sometimes direct observation and in other instances, their memories. The result is a collection of research and essays that offer theory, techniques, outcomes, and models for the reader. Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms. Secondary students describe their ideas of chemistry and physics. Teacher educators use drawings to consider the progress of their undergraduates' understanding of science teaching and even their moral/ethical responses to teaching about climate change. Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted. A physician explains how the history of drawing has been a critical tool to medical education and doctor-patient communications. Each chapter contains samples, insights, and where applicable, analysis techniques.

The chapters in this book should be helpful to researchers and teachers alike, across the teaching and learning continuum. The sections are divided by the kinds of activities for which drawing has historically been used in science education: An instance of observation (Audubon, Linnaeus); A process (how plants grow over time, what happens when chemicals combine); Conceptions of what science is and who does it; Images of identity development in science teaching and learning.

"Why are you learning Zulu?" When Mark Sanders began studying the language, he was often asked this question. In *Learning Zulu*, Sanders places his own endeavors within a wider context to uncover how, in the past 150 years of South African history, Zulu became a battleground for issues of property, possession, and deprivation. Sanders combines elements of analysis and memoir to explore a complex cultural history. Perceiving that colonial learners of Zulu saw themselves as repairing harm done to Africans by Europeans, Sanders reveals deeper motives at work in the development of Zulu-language learning—from the emergence of the pidgin Fanagalo among missionaries and traders in the nineteenth century to widespread efforts, in the twentieth and twenty-first centuries, to teach a correct form of Zulu. Sanders looks at the white appropriation of Zulu language, music, and dance in South African culture, and at the association of Zulu with a

martial masculinity. In exploring how Zulu has come to represent what is most properly and powerfully African, Sanders examines differences in English- and Zulu-language press coverage of an important trial, as well as the role of linguistic purism in xenophobic violence in South Africa. Through one person's efforts to learn the Zulu language, *Learning Zulu* explores how a language's history and politics influence all individuals in a multilingual society.

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity.

Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

In addition, the clear writing style makes the book accessible to people without a background in psychology but who have a personal or professional interest in the process of reading.

"A masterpiece of contemporary Bible translation and commentary."—Los Angeles Times Book Review, Best Books of 1999 Acclaimed for its masterful new translation and insightful commentary, *The David Story* is a fresh, vivid rendition of one of the great works in Western literature. Robert Alter's brilliant translation gives us David, the beautiful, musical hero who slays Goliath and, through his struggles with Saul, advances to the kingship of Israel. But this David is also fully human: an ambitious, calculating man who navigates his life's course with a flawed moral vision. The consequences for him, his family, and his nation are tragic and bloody. Historical personage and full-blooded imagining, David is the creation of a literary artist comparable to the Shakespeare of the history plays.
