"A terrific debut novel . . . Mountford's parable of the voracious global economy reminds me of Graham Greene's *The Quiet American*." —Jess Walter, #1 New York Times bestselling author of *The Cold Millions* On his first assignment for a rapacious hedge fund, Gabriel embarks to Bolivia at the end of 2005 to ferret out insider information about the plans of the controversial president-elect. Standing in his way are his headstrong mother, a survivor of Pinochet's Chile, and Gabriel's new love interest, the president's passionate press liaison. Caught in a growing web of lies and questioning his own role in profiting from an impoverished people, Gabriel sets in motion a terrifying plan that could cost him the love of all those he holds dear. Set against the stunning mountainous backdrop of La Paz and interspersed with Bolivia's sad history of stubborn survival, this examines the critical choices a young man makes as his world closes in on him. "Both of the book's settings—desperately poor but proud La Paz, the world's highest-altitude capital, and the world of go-go high finance, a realm about which Mountford clearly knows his stuff—are well rendered. Starting from an analysis of practices of participation in contemporary print and other media, the volume opens up a historical perspective, probing the potential of the concept of participatory cultures for the exploration of past forms of collaboration between individual and collective actors (i.e. authors, editors, publishers, fans, critics etc.). In doing so, the volume sheds new light on the historically, culturally, and medially specific forms and functions as well as on the economic, political and institutional parameters that contributed to the emergence and transformation of what turn out to be precarious alliances.

Man Booker Prize An ambitious, exuberant new novel moving from North West London to West Africa, from the multi-award-winning author of *White Teeth* and *On Beauty*. Two brown girls dream of being dancers—but only one, Tracey, has talent. The other has ideas: about rhythm and time, about black bodies and black music, what constitutes a tribe, or makes a person truly free. It's a close but complicated childhood friendship that ends abruptly in their early twenties, never to be revisited, but never quite forgotten, either. Tracey makes it to the chorus line but struggles with adult life, while her friend leaves the old neighborhood behind, traveling the world as an assistant to a famous singer, Aimee, observing close up how the one percent live. But when Aimee develops grand philanthropic ambitions, the story moves from London to West Africa, where diaspora tourists travel back in time to find their roots, young men risk their lives to escape into a different future, the women dance just like Tracey—the same twists, the same shakes—and the origins of a profound inequality are not a matter of distant history, but a present dance to the music of time. Zadie Smith's newest book, *Grand Union*, published in 2019.

I started writing this book keeping in mind; it should be shared with everyone. This story has thrilled me in every aspect and I could not resist myself from writing the same. This can happen with anyone. you might find this story unacceptable but we have to understand the fact that life of any one can take wrong turn if it's not given proper guidance or care when needed. In family we need to understand each other's need basis time and requirement. Small things impact a lot in life and this is something we have to understand. We run behind future but what if you're present is not good. You cannot make your future better indeed. This story have made me realize one thing that; you cannot force anyone (especially a girl ) to either get in to a relationship or come out of any relationship

till the time you don't understand the pros/cons of that relationship. So first understand why it's important for that person and even if you don't like it (being a parent) try making them understand the reason behind you want your loved ones to be away from the person/place or things you don't like (politely with care and respect). I think, not completely but some aspects are somewhere related to everyone's life and we can correlate it easily without any hitch. "Understanding your loved ones is very important"

A fascinating examination of technological utopianism and its complicated consequences. In *The Charisma Machine*, Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why—despite its failures—the same utopian visions that inspired OLPC still motivate other projects trying to use technology to “disrupt” education and development. Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte, One Laptop per Child promised to transform the lives of children across the Global South with a small, sturdy, and cheap laptop computer, powered by a hand crank. In reality, the project fell short in many ways—starting with the hand crank, which never materialized. Yet the project remained charismatic to many who were captivated by its claims of access to educational opportunities previously out of reach. Behind its promises, OLPC, like many technology projects that make similarly grand claims, had a fundamentally flawed vision of who the computer was made for and what role technology should play in learning. Drawing on fifty years of

history and a seven-month study of a model OLPC project in Paraguay, Ames reveals that the laptops were not only frustrating to use, easy to break, and hard to repair, they were designed for “technically precocious boys”—idealized younger versions of the developers themselves—rather than the children who were actually using them. The Charisma Machine offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development.

Step into picture-perfect Wilshire, home to some of the most privileged people in the world, where one woman's desperate act could bring the precariously balanced social order crashing down... Wilshire, Connecticut, the gilded enclave of Manhattan's prosperous elite, appears to be a vision of suburban tranquility: the mansions are tastefully designed, the lawns are expertly manicured, and the streets are as hushed as the complexities in the residents' lives. While Wilshire's husbands battle each other in the financial world, their wives manage their estates and raise the next elite generation. Some women are envied, some respected, and others simply tolerated. But regardless of where they stand, each woman is defined by the world she inhabits and bound by the unyielding social structure that surrounds her. Rosalyn Barlow, the most envied woman in Wilshire, is waging a battle of social manipulation to silence the scandalous gossip that threatens her daughter's reputation while her self-made billionaire husband grows more and more distant in his young retirement. But for fourteen year-old Caitlin Barlow, navigating life as a teenager in a culture of wealth and sexual promiscuity has become far more perilous than either of her parents knows. Newcomer Sarah Livingston has nothing but disdain for everyone and everything around her and a growing terror at having another child in a world she's come to resent. As she is pulled into the Barlow family's storm, the walls begin to close in around her marriage and the life she once thought she wanted. An alternative artistic guidebook to the Georgian capital Composed of artistic accounts that critically reflect on recent urban and social changes in Georgia's capital Tbilisi, this book unveils multifaceted perspectives on a city trying to negotiate its complex heritage, its contentious present and potential for the future. It also serves as an alternative guidebook. In the new knowledge economy, traditional modes of thinking are no longer effective. Compartmentalizing problems and solutions and assuming everything can be solved with the right formula can no longer keep pace with the radical changes occurring daily in the modern business world. It's Not Complicated offers a paradigm shift for business professionals looking for simplified solutions to complex problems. In his straightforward and highly engaging style, Rick Nason introduces the principles of "complexity thinking" which empower managers to understand, correlate, and explain a diverse range of business phenomena. For example, why some new products go viral while others remain unnoticed, how office cliques develop despite collaborative work policies and spaces, how economic bubbles form, and how an unknown retiree foiled one of the most carefully planned product launches ever with a single letter to the editor of his local newspaper. Rather than consider complicated and complex as interchangeable terms, Rick Nason explains what complexity is, how it arises, and the errors in solving complex situations with complicated thinking. It's Not Complicated provides managers with fresh, counterintuitive, and actionable models for dealing with challenging business problems.

labor? Um... It's Complicated. Josie Mendham never meant to have her own (radically different) set of gasps and moans a few doors down from where her best friend, Laura, was giving birth. And stealing away with the obstetrician who was consulting on Laura's case certainly wasn't part of any birth plan. When Dr. Alex Derjian watched the foursome enter the labor ward he did a doubletake: two dads? That defied biology as he knew it. Even more intriguing was the woman with the birthing mother and the fathers: Josie, the nurse he'd been watching from afar for months. One elevator kiss led to an on-call room soiree and soon he was breaking every romantic rule in his playbook. Finding his way into her pants wouldn't be hard. But into her heart? That would be a challenge. It's Complicated is the much-awaited novel that combines the stories of Laura, Mike, Dylan, Josie, and Madge from the Her Two Billionaires series with Darla, Trevor and Joe from the USA Today Bestseller Random Acts of Crazy, with Alex and Josie at the center of it all.
