La revista decana de la prensa profesional de la construcción, líder del sector. Proporciona a los profesionales y empresas el conocimiento necesario para el desarrollo de sus proyectos y obras, tanto en su aspecto de edificación residencial, como en el industrial y comercial. Está dirigida a fabricantes y prescriptores; como arquitectos, aparejadores, instaladores, técnicos.

As much as any country, England bore the brunt of Germany's aggression in World War II, and was ravaged in many ways at the war's end. Celebrated historian David Kynaston has written an utterly original, and compellingly readable, account of the following six years, during which the country rebuilt itself. Kynaston's great genius is to chronicle the country's experience from bottom to top: coursing through through the book, therefore, is an astonishing variety of ordinary, contemporary voices, eloquently and passionately evincing the country's remarkable spirit. Judy Haines, a Chingford housewife, gamely endures the tribulations of rationing; Mary King, a retired schoolteacher in Birmingham, observes how well-fed the Queen looks during a royal visit; Henry St. John, a persnickety civil servant in Bristol, is oblivious to anyone's troubles but his own. Together they present a portrait of an indomitable people and Kynaston skillfully links their stories to bigger events thought the country. Their stories also jostle alongside those of more well-known figures like celebrated journalist-to-be John Arlott (making his first radio broadcast), Glenda Jackson, and Doris Lessing, newly arrived from Africa and struck by the leveling poverty of post-war Britain. Kynaston deftly weaves into his story a sophisticated narrative of how the 1945 Labour government shaped the political, economic, and social landscape for the next three decades.

Analyzes the interplay between Christian theological norms and Western legal principles concerning marriage, examining the theology and law of marriage in the Catholic, Lutheran, Calvinist, Anglican, and Enlightenment traditions.

Engineering Mathematics through Applications teaches mathematics in step-by-step fashion putting the mathematics into its engineering context at every stage.

Covering more than 3,000 pet-friendly accommodations from all over the country covered, this guide not only describes the hotel and motel facilities and services and lists their rates, but also--most important of all--includes Mobil's celebrated One- to Five-Star Quality Ratings, ensuring that there's not a fleabag in the bunch.

"Four hundred years after Kepler discovered his third law of planetary motion, disproving the Pythagorean notion of 'the

music of the spheres', music was discovered in the Sun. With this discovery the science of helioseismology was born." "In Music of the Sun, renowned helioseismologist William Chaplin tells the story of this discipline's origins and gives us invaluable insight into its implications - not only for better understanding the distant sun and stars - but for climate change, particle physics, and the very relationship between the Sun and the Earth."--BOOK JACKET.

This planner is organized alphabetically by state, with introductory information about the state followed by city listings in alphabetical order. For each city, the planner lists recommended sites and attractions and Mobil One- to Five-Star rated lodgings and restaurants.

Lists accommodations that accept pets

Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

In this study, Scott C. Ryan situates Paul's letter to the Romans as one voice among a number of Jewish voices that frame God as a divine warrior. He first investigates motifs related to divine conflict in Exodus 14-15, Amos, Isaiah, Ezekiel, and Daniel 7-12, along with 1 Enoch, Psalms of Solomon, Wisdom of Solomon, the War Scroll, and 4 Ezra. The author then places Romans in dialogue with the works of Paul's predecessors and near contemporaries. When Romans and these Jewish texts are placed alongside one another, Paul emerges as a writer who participates in Jewish divine conflict traditions. The apostle maintains Israel's eschatological hope in a warring deity even as he modifies that image in light of God's action in the Christ-event.
