“A comprehensive and thorough guide for quilters just entering the arena of abstract art and design . . . Beginning art quilters will no doubt be inspired.”
—Quilting Arts Magazine The bestselling author of Luminous Landscapes guides you through an amazing journey into the world of designing abstract art quilts. Take your imagination to new heights as you learn how to create an abstract design and then break it down into easy segments to sew and embellish. Included are four projects incorporating the author’s techniques. “Integrate your own drawings, doodles, or photographs with the elements and principles of design to produce eye-catching art quilts. Gloria’s step-by-step instructions are thorough and concise in this beautiful book.” —American Quilter

Practical guide to create Concrete5 themes. This book is great for theme developers new to concrete5 who are looking to use their experience in HTML and CSS to create high quality themes for concrete5. It's assumed that you have worked with HTML before and can also read code as you'll see some basic PHP and JavaScript code. There are a few words about using concrete5, but you're expected to spend a bit of time on your own to get familiar with the concrete5 interface by yourself and by reading some of the articles listed in the book. Readers are expected to have the ability to set up their own concrete5 site, but basic information about the installation and links to follow up are provided though. A user-friendly introduction to some of the most useful analytical tools for model building, estimation, and analysis, presenting key methods and examples. Simulation modeling is increasingly integrated into research and policy analysis of complex sociotechnical systems in a variety of domains. Model-based analysis and policy design inform a range of applications in fields from economics to engineering to health care. This book offers a hands-on introduction to key analytical methods for dynamic modeling. Bringing together tools and methodologies from fields as diverse as computational statistics, econometrics, and operations research in a single text, the book can be used for graduate-level courses and as a reference for dynamic modelers who want to expand their methodological toolbox. The focus is on quantitative techniques for use by dynamic modelers during model construction and analysis, and the material presented is accessible to readers with a background in college-level calculus and statistics. Each chapter describes a key method, presenting an introduction that emphasizes the basic intuition behind each method, tutorial style examples,

references to key literature, and exercises. The chapter authors are all experts in the tools and methods they present. The book covers estimation of model parameters using quantitative data; understanding the links between model structure and its behavior; and decision support and optimization. An online appendix offers computer code for applications, models, and solutions to exercises. Contributors Wenyi An, Edward G. Anderson Jr., Yaman Barlas, Nishesh Chalise, Robert Eberlein, Hamed Ghodduzi, Winfried Grassmann, Peter S. Hovmand, Mohammad S. Jalali, Nitin Joglekar, David Keith, Juxin Liu, Erling Moxnes, Rogelio Oliva, Nathaniel D. Osgood, Hazhir Rahmandad, Raymond Spiteri, John Sterman, Jeroen Struben, Burcu Tan, Karen Yee, Gönenç Yücel Helps managers to assess the current value of IT in their organizations from the human point of view before committing additional investments for more hardware and software technologies.

Creating Concrete5 ThemesPackt Publishing Ltd

This pocket-sized text features more than 20 clinical trials that have influenced the treatment of LUTS. Includes graphs, tables, and clear line illustrations. Covers the most influential trials in the study of BPH over the past 15 years.
