They came from the sea, a former ship captain named Owen Bird who inherited a Texas ranch from his brother. A former pirate named "Black Terrance" Malone, who has arrived in the once peaceful Rattlesnake Valley with a crew of sea dogs to do his dirty work. And dirty work it will be, as Black Terrance begins a campaign of thieving and threatening, even targeting Bird's beautiful young niece. Into this storm rides the Loner, Conrad Morgan, son of the legendary gunfighter Frank Morgan. The Loner sees what no one else does, a war born on the high seas and a third party is biding his time, waiting to strike a death blow on solid, bloody ground.

The third edition of Intensity Modulated Radiation Therapy was written to enhance the reader's understanding of the cutting-edge technology of Intensity Modulated Radiation Therapy. It is designed to both update old readers and inform new readers about the complexities and details of clinical management. This completely updated edition provides a step-by-step, practical approach to the use of IMRT in the evaluation and treatment of cancer patients. Because of IMRT's ability to employ individually controlled beamlets, it is an extremely promising technique, especially when paired with CT, PET, and/or MRI. With these improved procedures, doctors and clinicians will be able to take high resolution images of tumors while minimizing dosages to surrounding tissue. In order to focus on the most up to date IMRT techniques, the introductory chapters have been condensed to provide a brief overview of IMRT physics, mechanics and quality assurance, and also CT and MR imaging. To help assist in clinical decision-making it provides the reader with more than 700 full-color illustrations, IMRT tables and clear,

straightforward descriptions that address a range of tumor types and sites including head and neck, urinary, and gynecologic cancers.

Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year, with 35,000 serious injuries. Modern motor vehicles are becoming safer for occupants, due to advancement in technology, so persons are more likely to survive high impact speeds, but are also more likely to become entrapped. The Fire and Rescue Service, as the primary rescue service, requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care. Each chapter forms an independent reference source, but the publication as a whole forms a complete guide. Chapters cover: vehicle design and construction; dealing with incidents; safety procedures; operational procedures; extrication equipment; medical considerations and trauma care; Integrated Personal Development System (I.P.D.S.). Appendices cover: Highways Agency/Fire and Rescue Service memorandum of understanding; training and general information; and emergency services personnel (ESP) aide m moire. The CD-ROM, "Vehicle extrication techniques", is a multi media guide to rescue tool handling and extrication techniques.

**A Course in Miracles Urtext Manuscripts** is a collection of all seven canonical volumes of the world renowned Third Testament under one cover. It represents the oldest available typed copy of the words dictated by a voice to professor, research psychologist and Scribe Helen Schucman, Ph.D. between 1965 and 1978. The voice, claimed Schucman, was Jesus. This edition predates all others currently in print. It is available in two cover styles, one plain burgundy and another with a painting *The Resurrection* by Pieter Lastman, made available by the Getty Museum in Los Angeles, CA, USA. There is a free companion website with concordances and source material libraries. An optional 4.5 Gb/DVD containing an enhanced edition of the website, concordances, over 10,000 pages of source material, a synthesized audio reading of the 31 chapter text and several editions of the King James Bible is available in some editions. The Urtext Manuscripts include extensive discussions of the Bible, sex, possession, Freud and other topics which were edited out of other editions. There are over 2400 footnotes to references on variant ACIM readings and Bible verses. The book also includes

extensive appendices with commentary on the versions and history of A Course in Miracles by the compiler of this remarkable edition, Doug Thompson. The Urtext Manuscripts are ideal for students and teachers who wish to deepen their knowledge of A Course in Miracles and its unique approach to life and the teachings of the Bible. This edition seeks not to be the final rendition of A Course in Miracles, but rather one giant leap toward the greater goal of getting the words right. In that light, the reader may expect future editions to contain updates in textual scholarship, biblical references, appendices, added indexing, DVD contents and more."

For courses in Introduction to Corrections and Corrections Theory and Policy Brief. Affordable. Visual. Corrections provides an affordable, thought-provoking look at corrections that uses clear writing and eye-catching visuals to get your students straight to the important concepts. By focusing on these core concepts, students will gain true understanding of the material, without becoming overwhelmed with unnecessary information. The text examines how evidence-based practices are used in corrections and how theory is linked to treatment and punishment of offenders. The book's conversation-starting pedagogy encourages active participation in learning, encouraging students to think critically about community corrections, prison life, treatment of offenders, reentry, legal issues, the death penalty,

and juveniles in corrections. Geralt the Witcher -- revered and hated -- holds the line against the monsters plaguing humanity in this collection of adventures in the NYT bestselling series that inspired the blockbuster video games. Geralt is a Witcher, a man whose magic powers, enhanced by long training and a mysterious elixir, have made him a brilliant fighter and a merciless assassin. Yet he is

no ordinary murderer: his targets are the multifarious monsters and vile fiends that ravage the land and attack the innocent. But not everything monstrous-looking is evil and not everything fair is good...and in every fairy tale there is a grain of truth. Andrzej Sapkowski, winner of the World Fantasy Lifetime Achievement award, started an international phenomenon with his Witcher series. The Last Wish short story collection is the perfect introduction to this one of a kind fantasy world. "Fuse It" introduces new ways to utilise the bonanza of glass forming methods & materials through 18 lessons with names such as: Wear It (Jewellery), Display It (Holders), Hang It (Mirrors and Ornaments), Screw It (Clocks and Sculptures), Drop It (Vases), Zen It (Fountain), Rake It (hot combing), Sell It (marketing your work), plus 10 more. The book will be a valuable resource for fusers of all skill levels with a desire to progress to the next step. Over 300 colour photos offer a wealth of instruction and inspiring ideas for distinctive kiln formed creations. Includes over 75 project idea images and 18 step-by-step lessons.

Why do modern liberals think and act as they do? The radical left's politics and its destructive effects on our basic freedoms have provoked many to speculate on what makes these people tick. The Liberal Mind answers the question. This book is the first systematic analysis of the political madness that now threatens to destroy the West's greatest achievement: the American dream of civilized liberty.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Jimmy was only nine years old when he was molested and sexually assaulted in London's dingy East End. He struggled to keep his dark secret, while coping with being adopted and his illiterate father's violent outbursts.

Desperately needing to be loved, Jimmy accepts an offer of 'conditional kindness' from Tom, his scoutmaster.

Now, after a lifetime of secrets, his story can be told as Tom is now dead, so.... "They Can't Touch Him Now"

He wasn't born to the gun. But a gunman's blood ran in his veins--and it was only a matter of time before there would be hell to pay. . . Six Days Of Killing. No Day Of Rest. . . Once he was a young, happily married businessman. Then he lost his wife to human madness and that young man was gone, replaced by Kid Morgan, the wandering son of legendary gunfighter Frank Morgan and the current occupant of a cell in Hell Gate prison.

The Kid's crime? He looked too much like an outlaw who escaped from this very prison. So the Kid teams up with a fellow inmate with an escape plan, vowing to hunt down a look-alike killer on the loose. But in or out of prison, Frank Morgan's boy knows better than to trust anyone. And with Hell Gate behind him, any day could be his last. So every bullet must be his best.

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto

Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement. Designed for the introductory, calculus-based physics course, *Physics for Engineers and Scientists* is distinguished by its lucid exposition and accessible coverage of fundamental physics concepts. The text presents a modern view of classical mechanics and electromagnetism for today's science and engineering students, including coverage of optics and quantum physics and emphasizing the relationship between macroscopic and microscopic phenomena. Organized to address specific concepts and then build on them, the text divides each chapter into short, focused sections followed by conceptual review questions. Using real-world examples throughout the text, the authors offer a glimpse of the practical applications of physics in science and engineering and develop a solid conceptual

foundation that enables students to become better problem solvers. A well-integrated media package extends this emphasis on core concepts and problem-solving skills by offering students and instructors many diverse opportunities for active learning.

"The Justice Killer There's a twisted serial killer stalking the streets of New York City, dealing his own perverse version of justice. He kills swiftly and silently, leaving his calling card--a red "J"--on the bodies of his prey. His victims have one thing in common: they've all been jurors in the city's most infamous cases--cases in which the killer was found "not guilty." Overnight, the Justice Killer has the city in a stranglehold. And there's only one man who has a shot at finding him . . . Homicide detective Artemis Beam made his reputation hunting down serial killers. After getting shot by an armed robber--and stepping on the wrong toes in the NYPD--he's been retired. The city needs him now, and finding the killer is his chance to get back into the life he loves. As the body count climbs and the city's legal system fails, the Justice Killer thinks he's outsmarted the cops. But Beam isn't officially a cop anymore . . . and he doesn't have to play by the rules . . .

When used in NLP and hypnotherapy, metaphors have long given insights into the difficulties of people and have shown the ways in which we can escape or improve. If the stories strike a chord with you, then they also show a way out. These short stories, metaphors and interactive scripts will help you to eliminate negative thoughts and achieve your dreams by allowing you to relax while reading stories that can bring about positive change. Some of the stories will relax you, others will make you think. Some allow you to enter a light feeling of hypnosis. Hypnotherapy and hypnosis have been major users of metaphors to show different approaches to problems and their resolution. Milton Erickson, the grandfather of modern hypnotherapy used metaphors to great effect in resolving problems with his patients. Self hypnosis allows you to enter the areas of your mind where you can become imaginative and optimistic. You can create your dreams and the ways in which you will achieve them. Based on a huge amount of therapeutic work, these short stories, metaphors and interactive scripts can help you to bring about positive changes, eliminate negative thoughts and achieve your dreams.

Letter From the Editor, 2012Dear Reader, Thank you for picking up this magazine. Inside you will find a world of wonders. If you are like most people you will flick through and look at the art first. We are proud to feature gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our

magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty. Tim Youd did an entire art exhibit based on a passage out of Henry Miller's Tropic of Capricorn. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth. I met Thurston on a damp afternoon at the library. I am not an interviewer per se, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit... The East Coast is always well represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the U.S. of A. We have the wondrous poets Leah Umansky, J. Hope Stein, Joanna Penn Cooper and Angela Wong

Of all the formative experiences in a character's past, none are more destructive than emotional wounds. The aftershocks of trauma can change who they are, alter what they believe, and sabotage their ability to achieve meaningful goals, all of which will affect the trajectory of a story. Enter *The Emotional Wound Thesaurus*, which explores over 100 possible traumatic experiences from a character's past and how they can impact the character in the present. Armed with this unique resource, authors will be able to root their characters in reality by giving them an authentic wound that causes difficulties and prompts them to strive for inner growth to overcome it.

From the USA Today Bestselling author of *The Sword of the Templars* and *The Aztec Heresy* Some secrets are too great to bear... Retired Army Ranger Lt. Col. John Holliday has reluctantly settled into his teaching position at West Point when young Israeli archaeologist Rafi Wanounou comes to him with desperate news. Holliday's niece—and Rafi's fiancé—Peggy has been kidnapped. Holliday sets out with Rafi to find the only family he has left. But their search for Peggy will lead them to a trail of clues that spans across the globe, and into the heart of a conspiracy involving an ancient Egyptian legend and the darkest secrets of the Order of Templar Knights. Secrets that, once known, cannot be survived...

This book introduces readers to the core principles and methodologies of product development, and highlights the interactions between engineering design and industrial design. It shows to what extent the two cultures can be reconciled, and conversely what makes each of them unique. Although the semantic aspect is fundamental in industrial design, while the functional aspect is essential for the

industrial product, the interaction between the two worlds is strategically vital. Design is also a strategic problem-solving process that drives innovation, builds business success and leads to better quality of life through innovative products, systems, services and experiences. The book connects product development with the concepts and strategies of innovation, recognizing that product design is a complex process in which invention, consumers' role, industrial technologies, economics and the social sciences converge. After presenting several examples of artifacts developed up to the conceptual phase or built as prototypes, the book provides a case study on a packaging machine, showcasing the principles that should underlie all design activities, and the methods that must be employed to successfully establish a design process. The book is primarily targeted at professionals in the industry, design engineers and industrial designers, as well as researchers and students in design schools, though it will also benefit any reader interested in product design.

Following his decades in advertising, marketing and as a fully trained and very experienced hypnotherapist, John Smale has put together a number of stories and metaphors that have worked to help people to resolve a huge range of problems.

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

When 22-year-old Avery Walker, a senior at Penn State,

meets Grant Danko, a 37-year-old performance artist from Brooklyn whose stage name is Saint John of the Five Boroughs, her life changes radically as she leaves college to live with Grant in Brooklyn and pursue a life as an artist. Worried about Avery, her mother, Kate, and her aunt, Lindsey, and Lindsey's husband, Hank, travel to Brooklyn, where they all face a crisis of their own and make life-altering choices. Grant is an angry guy with a curiously attractive personality and a coterie of bright, artistic friends. He's used his good looks and his accomplishments, and the accomplishments of those friends, to get by while he works hauling stolen goods for his gangster uncle. He carries dark secrets that have caused his life to go off the rails. Grant is about as lost as a man can get, adept at making wrong choices. But when he finally faces his explosive moment of truth, something extraordinary happens. Saint John of the Five Boroughs is beautifully turned—a stunning and layered novel about the effects of violence, both personal and cultural, on its characters' lives. It's about the way violence twists character, but also about the possibilities for redemption and change, for achieving a kind of personal grace. Edward Falco once again proves to be a master of urgency and suspense, of events careening out of control, as he brilliantly explores why we make the choices we make—both the ones that threaten to destroy our lives, and those choices that might save us.
