With unprecedented attention on global change, the current debate revolves around the availability and sustainability of natural resources and how to achieve equilibrium between what society demands from natural environments and what the natural resource base can provide. A full understanding of the range of issues, from the consequences of the changing resource bases to the degradation of ecological integrity and the sustainability of life, is crucial to the process of developing solutions to this complex challenge. Authored by world-class scientists and scholars, *The Encyclopedia of Natural Resources* provides an authoritative reference on a broad spectrum of topics such as the forcing factors and habitats of life; their histories, current status, and future trends; and their societal connections, economic values, and management. The content presents state-of-the-art science and technology development and perspectives of resource management. Written and designed with a broad audience in mind, the entries clearly elucidate the issues for readers at all levels without sacrificing the scientific rigor required by professionals in the field. Volume I – Land includes 98 entries that cover the topical areas of renewable and nonrenewable natural resources such as forest and vegetative; soil;

terrestrial coastal and inland wetlands; landscape structure and function and change; biological diversity; ecosystem services, protected areas, and management; natural resource economics; and resource security and sustainability. Natural resources represent such a broad scope of complex and challenging topics that a reference book must cover a vast number of subjects in order to be titled an encyclopedia. The Encyclopedia of Natural Resources does just that. The topics covered help you face current and future issues in the maintenance of clean air and water as well as the preservation of land resources and native biodiversity.

Now in an updated paperback edition, *Why Taiwan Matters* offers a comprehensive but compact introduction to a country that exercises a role in the world far greater than its tiny size would indicate. Leading expert Shelley Rigger explains how Taiwan became such a key global player, highlighting economic and political breakthroughs so impressive they have been called "miracles." She links these accomplishments to Taiwan's determined society, vibrant culture, and unique history. Drawing on arts, economics, politics, and international relations, Rigger explores Taiwan's importance to China, the United States, and the world. Considering where Taiwan may be headed in its wary standoff with China, she traces how the focus of Taiwan's

domestic politics has shifted to a Taiwan-centered strategy. All readers interested in Asia and international affairs will find this an accessible and entertaining overview, replete with human interest stories and colorful examples of daily life in Taiwan. J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Edited by a renowned and much cited chemist, this book covers the whole span of molecular computers that are based on non-biological systems. The contributions by all the major scientists in the field provide an excellent overview of the latest developments in this rapidly expanding area. A must-have for all researchers working on this very hot topic. Perfectly complements *Biomolecular Information Processing*, also by Prof. Katz, and

This collection of paintings of the western wilderness and the accompanying text invite the reader to see the natural world through the eyes of Native Americans.

Take The Chump Challenge True Or False: 1.

Treating a girl you like to a dinner date is a great idea. 2. Slipping sexual innuendo into a conversation with a girl you hardly know is a bad idea. 3. Talking to the prettier of two girls is a good idea. If you answered false to all three questions, you just might be a PUA (pickup artist.) Otherwise, you are an AFC (average frustrated chump.) If you think that's crazy, consider this: these dynamics have been confirmed hundreds of times by hundreds of men. The Layguide teaches any guy the proven techniques of the best pickup artists in the world: • The 3-seconds Rule (the most important rule you'll ever learn). • Developing the confidence of a true player. • How to become an Alpha Male. • The most successful approaches. • Gimmicks that work. • Closing the deal. Armed with the wisdom collected in The Layguide, you will never again waste money on go-nowhere dates. You will never again hesitate to approach a beautiful woman. You will no longer fear rejection. You will never be a supplicating chump just because a woman is attractive. You WILL be an unapologetically sexual male with poise, power, and the skills to have any woman you desire. Tony Clink

I’m in awe of Juliet’s ability” (Jessica Fellowes, New York Times bestselling author of *The World of Downton Abbey*). England, 1936. A beloved king is dead, and by year’s end, the charismatic new monarch will give up his throne for love. The world is on the brink of war. And in the tumultuous intervening months, three outsiders will find themselves embroiled in the hidden truths, undeclared loves, unspoken sympathies, and covert complicities of a glittering high society in the throes of upheaval. After a long journey from her home in Barbados, May Thomas secures a position as a secretary and driver and opens her heart to a man seemingly beyond her reach. Outwardly affable American spinster Evangeline Nettlefold finds her place in the uppermost social circles, but her growing resentment toward her childhood friend Wallis Simpson predicts disaster. A friendship catapults Julian Richardson from his mother’s middle-class parlor to luxurious dinners with the king, yet he cannot forget those who struggle outside the gilded gates, nor his uneasy affection for May. As addictive as *Downton Abbey*, as poignant as *The Remains of the Day*, renowned historian Juliet Nicolson’s debut novel is a breathtaking story inspired by a love affair that shook the world at a time when order and chaos battled for

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City

is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, *The Lonely City* is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

With *The Greek Girl's Story*, Alan Singerman presents the first reliable, stand-alone translation and critical edition of Abbé Prévost's 1740 literary masterpiece *Histoire d'une Grecque moderne*. The text of this new English translation is based on Singerman's 1990 French edition, which Jonathan Walsh called "arguably the most valuable critical edition" of Prévost's novel to date. This new edition also includes a complete critical apparatus comprising a substantial introduction, notes, appendixes, and bibliography, all significantly updated from the 1990 French edition, taking into account recent scholarship on this work and providing some additional reflection on the question of Orientalism. Prévost's roman à clef is based on a true story involving the French ambassador to the Ottoman Porte from 1699 to 1711. It is narrated from the ambassador's viewpoint and is a model of subjective, unreliable narration (long before Henry James). It is remarkably modern in its presentation of an enigmatic, ambiguous character, as the truth about the heroine can never be established with certainty. It is the story of the tormented relationship between the diplomat and a beautiful young Greek concubine, Théophé, whom he frees from a pasha's harem. While her benefactor becomes increasingly infatuated with her and bent on becoming her lover, the Greek girl becomes obsessed with the idea of becoming a virtuous and respected woman. Viewing the

ambassador as a father figure, she condemns his quasi-incestuous passion and firmly rejects his repeated seduction attempts. Unable to possess the young woman or tolerate the thought that she might grant to someone else what she has refused him, the narrator subjects her behavior to minute scrutiny in an effort to catch her in an indiscretion. His investigations are fruitless, however, and Théophé, the victim of incessant persecution, simply dies, leaving all the questions about her behavior unanswered.

In a lyrical love letter to guide dogs everywhere, a blind poet shares his delightful story of how a guide dog changed his life and helped him discover a newfound appreciation for travel and independence. Stephen Kuusisto was born legally blind—but he was also raised in the 1950s and taught to deny his blindness in order to "pass" as sighted. Stephen attended public school, rode a bike, and read books pressed right up against his nose. As an adult, he coped with his limited vision by becoming a professor in a small college town, memorizing routes for all of the places he needed to be. Then, at the age of thirty-eight, he was laid off. With no other job opportunities in his vicinity, he would have to travel to find work. This is how he found himself at Guiding Eyes, paired with a Labrador named Corky. In this vivid and lyrical memoir, Stephen Kuusisto recounts how an incredible partnership with a guide dog changed his life and the heart-stopping, wondrous adventure that began for him in midlife. Profound and deeply moving, this is a spiritual journey, the story of discovering that life with a guide dog is both a method and a state of mind. As the daughter of blockbuster author Harold Robbins, Adreana Robbins's childhood was divided between glamorous Hollywood and the picturesque south of France. Like her father's works, Adreana Robbins's debut novel is an exciting page-turner, packed with exotic settings and glimpses into the lives of the wealthy and powerful. Through her own lyrical style, reminiscent of F. Scott Fitzgerald's, Robbins captures the allure of Parisian high society and uncovers generations lost in deceit and betrayal. Shortly before her twenty-first birthday, Djuna Cortez journeys to Paris to claim a mysterious legacy from a grandfather she never knew, Joaquim Carlos Cortez, a world-renowned surrealist painter. Djuna is shocked to learn that he has left her an estate that includes a winery and chateau in Loire, an

apartment in Paris, and a priceless art collection, which includes his own works and those of his friends and contemporaries, Miro, Picasso, and Dali. Even more, Joaquim Carlos has made Djuna his literary executor, asking her to see to the publication of his journals. Robbins skillfully relates the parallel comings-of-age of the impressionable Djuna in contemporary Paris and the controversial, hot-blooded Joaquim Carlos in the wild Paris of the 1930s and World War II, both transformed forever by the City of Light. Setting her tale in France, Spain, Morocco, and the seductive Mediterranean, Adreana Robbins carries her readers on a passionate journey. Djuna, overwhelmed by sudden wealth and responsibility and caught up in a jet-set lifestyle, struggles with love, intrigue, and danger. Through her grandfather's journals, Djuna learns of Joaquim Carlos's own struggles: to succeed in the exciting new world of surrealist art, to overcome his obsession with physical pleasure, to survive under Nazi terror. But the greatest shocks come when Djuna uncovers the secrets of her family's painful, mysterious past. Drawing courage from the truths she learns about her family and herself, Djuna strives to recover her freedom and her sanity, and to claim her grandfather's powerful artistic legacy.

Bestselling author of *Autopsy of a Boring Wife* Marie-Renée Lavoie is a master of making us fall in love with her characters. She does it again with the tender coming-of-age story *Some Maintenance Required*. It is 1993, the last year of school and Laurie's final spring before adulthood. She works part time at a restaurant and looks after Cindy, her neglected, potty-mouthed little

neighbour. Like her mother, Laurie devours books and dreams big. Her father works at a garage, where Laurie constantly struggles to keep her car running. It is here that a budding romance intensifies Laurie's understanding of class differences, and opens her eyes to a more complicated world. With her big heart, she takes Cindy globe-trotting without even leaving town, and learns how to come to terms with circumstances beyond her control. Life teaches Laurie that everyone requires some maintenance sometimes. A story of taking responsibility and coming into adulthood, *Some Maintenance Required* is as funny and as impressive as its main character.

*Trans(in)fusion* is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across
