From the 15th century until the mid-1990s, media based on the printed word—books, magazines, handbills, newspapers, and journals—dominated society. Today, an onslaught of digital media centered on the Internet is developing at a breathtaking pace, destabilizing the very idea of printed media and fundamentally reshaping our world in the process. This study explores how Internet entities like Amazon, YouTube, Facebook, Wikipedia, and Google, and gadgets such as digital cameras, cell phones, video games, robots, drones, and all things Macintosh have affected everything from the book industry and copyright law to how we conduct social relationships and consider knowledge. Including a chronology of significant events in the history of the digital explosion, this investigation of the often overlooked “shadow” side of new technology chronicles life during a radical societal shift and follows the process whereby one world disintegrates while another takes its place. Instructors considering this book for use in a course may request an examination copy here.

Farrago's Wainscot is a quarterly online zine that collects the weird and sublime in fiction and poetry. Words cannot be arranged in too strange a fashion for Old Man Farrago, and FWA 1 is the collected assortment of stories from the first year of the Wainscot's revival. Brand new! Fantastically fresh! With dogs in sweaters! Maybe not that last part, but everything else in the previous paragraph is true in the most literary weird sense possible, because that's what one comes to expect with the Wainscot.

"Utterly delicious, original, witty, hilarious and brilliant. Shakespeare in Love on magic mushrooms. The Bard has never been this much fun." —Christopher Buckley, New York Times-bestselling author A tale of two Shakespeares . . .

Struggling UC Santa Cruz grad student Willie Shakespeare Greenberg is trying to write his thesis about the Bard. Kind of . . . Cut off by his father for laziness, and desperate for dough, Willie agrees to deliver a single giant, psychedelic mushroom to a mysterious collector, making himself an unwitting target in Ronald Reagan's War on Drugs. Meanwhile, would-be playwright (and oppressed Catholic) William Shakespeare is eighteen years old and stuck teaching Latin in the

boondocks of Stratford-upon-Avon. The future Bard's life is turned upside down when a stranger entrusts him with a sacred relic from Rome . . . This, at a time when adherents of the "Old Faith" are being hanged, drawn, and quartered as traitors. Seemingly separated in time and place, the lives of Willie and William begin to intersect in curious ways, from harrowing encounters with the law (and a few ex-girlfriends) to dubious experiments with mind-altering substances. Their misadventures could be dismissed as youthful folly. But wise or foolish, the bold choices they make will shape not only the "Shakespeare" each is destined to become . . . but the very course of history itself. "Hilarious, fascinating . . . a cunningly witty, frolicsome, time-warping bildungsroman . . . Winfield slings bucketfuls of double-entendres and wily puns, and he slips in hilarious variations on Shakespeare's best-known lines . . . Winfield's high-spirited tribute is a celebration of the power of language and story." —Los Angeles Times

Divine Substitution documents the ancient Mesopotamian belief that one could (re)produce the presence of gods and humans by means of visual media (whether rocks, statues, etc.) and investigates the possible traces of this conceptualization in ancient Israel.

Henry Ford's Model T forever changed the world. The car made "for the great multitude" (as Ford put it) first debuted in 1908 and proved so affordable and so popular that fifteen million were sold through 1927. The "Tin Lizzie" was the first automobile to be mass-produced on moving assembly lines, and built using interchangeable parts. It proved tough and reliable in everyday use, and cheap enough to spawn the automobile revolution: the car cost \$850 in 1909 but amazingly by the 1920s, the price had dropped to a mere \$260 due to the perfection of production techniques and economy of scale. Designed by a team that included Childe Harold Willis, Joseph Galamb and Eugene Farkas, the Model T had a front-mounted four-cylinder engine that produced 20 hp and had a top speed of 45 mph. It was a rear-wheel drive vehicle with wooden wheels, and featured a two-speed transmission plus a reverse gear. Although models varied - and many revisions took place over two decades of production - the original version weighed about 1200 pounds. Created in the 1920s and featuring information about the original Model T and the "New Model T" of 1925, this maintenance manual is an invaluable resource. It was originally intended to educate the men tasked with assembling, repairing and maintaining

the Model T, and offers a plethora of information about the car, its design and operation. The text includes chapters on how to take apart and put together the car, how to overhaul the engine and transmission, valve grinding and carbon removal, rod bearings, fitting pistons and rings, correcting noisy timing gears, installation of camshaft bearings, cleaning oil lines, oil leaks, transmission band installation, axle overhauls, refurbishing and replacing springs, radiator repair, starting motor overhaul, and more. It also includes troubleshooting and general servicing information. A must have for any Model T owner, this book is also a terrific reference for the docent, historian, or anyone who ever wondered, "how did that work?"

Henri Lefebvre and the Spanish Urban Experience is the first book to thoroughly apply the French urban philosopher's thought on cities to the culture and literature of Spain. Fraser shows how Lefebvre's complex view of the city as a mobile phenomenon is relevant to understanding a variety of Spanish cultural products—from urban plans and short writing on the urban experience during the nineteenth century to urban theories, cultural practices and literary fiction of the twentieth century, pushing on to interrogate even the appearance of Mediterranean space and Barcelona in recent video games.

In a lyrical love letter to guide dogs everywhere, a blind poet shares his delightful story of how a guide dog changed his life and helped him discover a newfound appreciation for travel and independence. Stephen Kuusisto was born legally blind—but he was also raised in the 1950s and taught to deny his blindness in order to "pass" as sighted. Stephen attended public school, rode a bike, and read books pressed right up against his nose. As an adult, he coped with his limited vision by becoming a professor in a small college town, memorizing routes for all of the places he needed to be. Then, at the age of thirty-eight, he was laid off. With no other job opportunities in his vicinity, he would have to travel to find work. This is how he found himself at Guiding Eyes, paired with a Labrador named Corky. In this vivid and lyrical memoir, Stephen Kuusisto recounts how an incredible partnership with a guide dog changed his life and the heart-stopping, wondrous adventure that began for him in midlife. Profound and deeply moving, this is a spiritual journey, the story of discovering that life with a guide dog is both a

method and a state of mind.
