

Journals Impact Factor Above 10

This 120-page journal features: 117 wide-ruled lined pages 5.5" x 8.5" size - big enough for your writing and small enough to take with you smooth 55# cream-color paper, perfect for ink, gel pens, pencils or colored pencils a cover page where you can enter your name and other information a beautiful full-color cover illustration of luminescent butterflies in flight that wraps around the front and back covers a matte-finish cover for an elegant, professional look and feel This journal can be used for writing poetry, jotting down your brilliant ideas, recording your accomplishments, and more. Use it as a diary or gratitude journal, a travel journal or to record your food intake or progress toward your fitness goals. The simple lined pages allow you to use it however you wish. Journals to Write In offers a wide variety of journals, so keep one by your bedside as a dream journal, one in your car to record mileage and expenses, one by your computer for login names and passwords, and one in your purse or backpack to jot down random thoughts and inspirations throughout the day. Paper journals never need to be charged and no batteries are required! You only need your thoughts and dreams and something to write with. These journals also make wonderful gifts, so inspire someone you love today!

This easy to read pocketbook, written by world

leaders in the field of evidence-based pain treatments, acts as a simple guide for people who wish to make sense of evidence in a healthcare setting and who want to avoid being misled by faulty evidence. It provides practical guidelines on how to make sense of and interpret the evidence that is available, with information on how to avoid straying beyond evidence into conjecture, supposition, and wishful thinking. It covers size, trial design, harm as well as benefit, and health economics and management evidence. 'Bandolier's Little Book of Making Sense of the Medical Evidence' has not been written as a comprehensive manual for those who want to do a systematic review or a meta-analysis, nor as a statistical or methodological textbook for students. Its origins lie in lectures for medical students, healthcare professionals from a variety of settings, and journalists. This book is a summary of the tools that Bandolier uses to assess evidence, to be able to distinguish good evidence from bad. It will be an invaluable resource for university course and GP tutors, family doctors, hospital consultants involved in research, pharmacists, and anyone interested in evidence-based health care.

Mint green and palm trees - what's not to love! This journal features a photograph on the cover which the artist has captured for you to enjoy. There's 150 blank pages for you to fill with your dreams, doodles and everything else - it's great for your desk at

home, work or on the go. This beautifully designed 6" x 9" notebook will fit right into your lifestyle!
DETAILS: 150 Blank Sheets Crisp White Pages with a Thick Cardstock Cover Simple, Stylish, Elegant Cover Art Dimensions: 6" x 9"

At last, the first systematic guide to the growing jungle of citation indices and other bibliometric indicators. Written with the aim of providing a complete and unbiased overview of all available statistical measures for scientific productivity, the core of this reference is an alphabetical dictionary of indices and other algorithms used to evaluate the importance and impact of researchers and their institutions. In 150 major articles, the authors describe all indices in strictly mathematical terms without passing judgement on their relative merit. From widely used measures, such as the journal impact factor or the h-index, to highly specialized indices, all indicators currently in use in the sciences and humanities are described, and their application explained. The introductory section and the appendix contain a wealth of valuable supporting information on data sources, tools and techniques for bibliometric and scientometric analysis - for individual researchers as well as their funders and publishers.

Although international trade has been much studied by both economists and regional scientists, the nature, causes, and the consequences of

interregional trade, i.e., trade between regions within countries has received far less attention. In addition, given recent advances in new economic geography on the theoretical front and in the development of both input-output and computable general equilibrium models on the empirical front, the important subject of interregional trade is now open to study using these theoretical and empirical methodologies. Given this state of affairs, this book aims to present chapters written by a carefully selected group of experts in the field and thereby shed valuable light on key outstanding questions concerning the region and trade. These questions include, but are not limited to, the role of external economies in shaping the pattern of interregional trade, the role of natural resources versus traditional factors of production such as labor and capital in driving interregional trade, the relationship between transport and interregional trade, "high value" interregional trade in services, and the role of interregional trade estimation in the construction of a multi-regional, input-output system.

Contents: Introduction: Introduction to "The Region and Trade: New Analytical Directions" (Amitrajeet A Batabyal and Peter Nijkamp) Theory: Statistical Discrimination, Endogenous Quality, and North-South Trade (Arnab K Basu) Regional Trade in a Three Country Model (Henry Thompson) Voluntary Formation of Free Trade Area in a Third Country

Market Model (Ryoichi Nomura, Takao Ohkawa, Makoto Okamura and Makoto Tawada)Empirics:Exploring the Spatial Connectivity of US States, 1993–2007 (Jee-Sun Lee and Geoffrey J D Hewings)Manufacturing Fetishism: The Neo-Mercantilist Preoccupation with Protecting Manufacturing (Alecia Waite Cassidy, Edward Tower and Xiaolu Wang)The Evolution of Freight Movement and Associated Non-Point-Source Emissions in the Midwest–Northeast Transportation Corridor of the United States, 1977–2007 (Benjamin Brown-Steiner, Jialie Chen and Kieran Donaghy)Multipliers in an Island Economy: The Case of the Azores Eduardo Haddad, Vasco Silva, Alexandre Porsse and Tomaz Dentinho)Inter-Regional Trade in Research-Based Knowledge: The Case of the EISCAT Radar System (Folke Snickars and Simon Falck)Theory and Empirics:Trade Openness and City Interaction (Mauricio Ramírez Grajeda and Ian M Sheldon)Infrastructure and the International Export Performance of Turkish Regions (Mehmet Guney Celbis, Peter Nijkamp and Jacques Poot)Trade in Services and Regional Specialization: Evidence and Theory (Hamid Beladi and Saibal Kar)

Readership: Graduate and research level individuals interested in regional economics and interregional trade issues. Keywords:Interregional Trade;Input-Output System;Economics;Regional Economics;Region and Trade;Natural

Resources; Labor; Capital; Computational
Methods
Key Features: Sheds new light on important and hitherto unstudied questions concerning interregional trade
Collects the results of frontier level research regarding many different questions in interregional trade
Shows how recent advances in theoretical and empirical modeling can be gainfully utilized to shed new light on research questions in interregional trade

Intended to bridge the gap between the latest methodological developments and cross-cultural research, this interdisciplinary resource presents the latest strategies for analyzing cross-cultural data. Techniques are demonstrated through the use of applications that employ cross-national data sets such as the latest European Social Survey. With an emphasis on the generalized latent variable approach, internationally prominent researchers from a variety of fields explain how the methods work, how to apply them, and how they relate to other methods presented in the book. Syntax and graphical and verbal explanations of the techniques are included. Online resources, available at www.routledge.com/9781138690271, include some of the data sets and syntax commands used in the book. Applications from the behavioral and social sciences that use real data-sets demonstrate: The use of samples from 17 countries to validate the resistance to change scale across these nations

How to test the cross-national invariance properties of social trust The interplay between social structure, religiosity, values, and social attitudes A comparison of anti-immigrant attitudes and patterns of religious orientations across European countries. The second edition includes six new chapters and two revised ones presenting exciting developments in the literature of cross-cultural analysis including topics such as approximate measurement invariance, alignment optimization, sensitivity analyses, a mixed-methods approach to test for measurement invariance, and a multilevel structural equation modeling approach to explain noninvariance. This book is intended for researchers, practitioners, and advanced students interested in cross-cultural research. Because the applications span a variety of disciplines, the book will appeal to researchers and students in: psychology, political science, sociology, education, marketing and economics, geography, criminology, psychometrics, epidemiology, and public health, as well as those interested in methodology. It is also appropriate for an advanced methods course in cross-cultural analysis.

The Routledge Handbook of European Sociology explores the main aspects of the work and scholarship of European sociologists during the last sixty years (1950-2010), a period that has shaped the methods and identity of the sociological craft. European social theory has produced a vast constellation of theoretical

landscapes with a far reaching impact. At the same time there has been diversity and fragmentation, the influence of American sociology, and the effect of social practice and transformations. The guiding question is: does European Sociology really exist today, and if the answer is positive, what does this really mean? Divided into four parts, the Handbook investigates: intellectual and institutional settings regional variations thematic variations European concerns. The Handbook will provides a set of state-of-the-art accounts that break new ground, each contribution teasing out the distinctively European features of the sociological theme it explores. It will be of interest to students and scholars across the social sciences and humanities.

The performance of the International Food Policy Research Institute's (IFPRI's) research program that focuses on water resource issues is reviewed for the period 1994–2010 around the three themes that constitute the program: global modeling, river basin modeling, and institutions. The IFPRI water team has been involved in leading-edge research in a number of dimensions: it has focused on analysis at varying geographic scales; the work has been truly interdisciplinary by engaging economics with biophysical science and other social sciences; and research outputs have been innovative in advancing institutional analysis and water pricing and in policy measures addressing the complexities of water supply management. In the research tasks, IFPRI's water team actively collaborated with a wide range of researchers from within the CGIAR network, national research institutes, and universities.

Within the team, a largely stable group of leaders has been responsible for the professional development of a substantial cohort of junior staff who have moved onto successful careers elsewhere. The output of the program has been prolific and prominent in academic, policy, and development communities. The approach taken is to review selected publications from the themes; assess the quality of the journals in which papers have been published; and evaluate the performance, on average, of researchers in the program. In addition, surveys of stakeholders were carried out, and three specific projects were subjected to detailed review. The assessment demonstrated the high regard in which the program research outputs and researchers are held. The IFPRI water team has been remarkably productive throughout the 16 years considered, working on issues that are of high relevance to policy and producing work that has largely been cutting edge. However, impacts generated by individual projects were not consistently or readily identifiable. To maximize the benefits of this performance and to overcome challenges associated with securing more outcomes, this report recommends that a more coordinated approach be taken to develop the research project portfolio. This would involve better targeting of projects to policy objectives through a more systematic review of research demand forces and improved integration of research work with policy development processes. The latter in particular requires the development of a sense of research project “ownership” within the policy circles the research is designed to influence. More effort in the development of in-country

research partnerships can aid this process as local researchers can act as “champions” within local policy circles. Where government agencies have a research function, their integration into the partnerships is recommended. Avoidance of completing research projects in a “policy vacuum” is critical but requires both advanced planning of each research project as well as constant adaptation of the work plan to (often rapidly) evolving policy contexts. To achieve project impacts beyond the immediacy of the specific case study context, a more targeted and coordinated publication strategy should be developed in light of changing publication technology. Project webpages within the IFPRI website, with readily downloadable reports, are useful during the implementation of each project and more formal papers should be targeted for publication in high-impact factor technical journals with parallel papers prepared for more policy-oriented journals that have high circulations.

This Pink Truth 5.5 x 8.5 soft cover journal notebook diary has 240 lightly lined white pages with a beautifully colored cover displaying an inspirational word. Words can make you feel something you wish to remember, help you see things you don't wish to forget or they make you do something to push you forward. 5.5 x 8.5 240 pages Color: Pink Word: Truth Lightly Lined White Paper Softcover / paperback 10 Colors: Aqua, Blue, Dark Blue, Green, Orange, Pink, Purple, Red, Teal and Yellow 36 Words: Abundance, Action, Attitude, Authentic, Believe, Blessings, Courage, Create, Dedicated, Disciplined, Dreams, Encourage, Faith, Focus, Goals, Grace, Gratitude, Honor, Hope, Inspire, Joy, Kindness, Love,

Motivate, Opportunity, Overcome, Peace, Positive, Purpose, Rejoice, Strategic, Strength, Success, Truth, Vision and Wisdom A journal is a great tool for any of the following: a day timer, diary, notebook, travel journal, health journal, idea book, thoughts and dreams, successes, failures, blessings, wish lists, habit tracking, bullet journaling, things grateful for, prayer lists, to write thoughts and letters to your family, record medical information, a password notebook, express your feelings, to-do lists, resolve problems, reduce stress, record events, track your bucket list, keep your deepest secrets, song lyrics, track projects, write poetry, positive quotes, bible verses, bible study notes, work through heartache or painful memories, or use it for things that enhance your creativity and inspire you along with a lot more. An easy way to search is type in Elf Owl Publishing, the word and color to get the complete listing of what is available to show up. Example: Elf Owl Publishing Love Orange - The words and colors available are listed above in the bullet point section.

Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions, which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

Journals are great for writing down ideas, taking notes,

writing about travels and adventures, describing good and bad times. Writing down your thoughts and ideas is a great way to relieve stress. Journals are good for the soul!

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological

indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

Interdisciplinary research centers are blooming in almost every university, and interdisciplinary research is expected to be a cure-all for the ills of academic science.

Do disciplines still matter? To what extent are interdisciplinary problem-solving approaches driven by socioeconomic stakeholders and policymakers rather than by academics? And how is interdisciplinarity organized? Through an in-depth sociological study of the development of nanomedicine in France and in the United States – an area that combines nanotechnology and biomedical research – this book challenges two conventional views of interdisciplinary research and academic disciplines. First, disciplines do not merely form separate "siloes" which hinder the development of interdisciplinary research: rather, they are flexible entities whose evolution supports the long-term

institutionalization of interdisciplinary science in French and US academia. Secondly, interdisciplinary research has no intrinsic virtue: its ability to respond to societal issues and advance knowledge depends on continued political support and long-term cooperation between stakeholders. Interdisciplinarity might also be threatened by oversold promises and struggles for recognition. A study of the many challenges facing the formation of creative and sustainable interdisciplinary scientific

communities, The Policies and Politics of Interdisciplinary Research tackles vivid debates among academics and research managers and will appeal to scholars of sociology, science and technology studies and science policy.

KEEP CALM AND BE A PRINCESS! Do you enjoy writing in old fashion notebooks and journals? Then you need the Keep Calm and Be A Princess Notebook Laptop Or Paper Notebook? Technology promises to make our lives more productive. Indeed, some things are faster and easier than ever. Unfortunately, a lot of technology is designed for the task, not for the user. As a result, people are able to take more notes, yet understand less. Have you ever taken copious notes in a class or meeting using your computer only to realize afterwards you still didn't understand? Taking notes on paper forces you to synthesize rather than merely transcribe. Imagine you were wrongly accused of a crime and the world's most experienced court stenographer offered to represent you for free. Would you try to save a buck or shell out the money on an experienced attorney? The stenographer has heard as many court arguments, been in as many trials, listened to as many verdicts as most attorneys. However, their experience has primarily been that of transcription, not of comprehension and understanding. Because you desire comprehension and understanding rather than simple transcription, the Keep Calm and Be A Princess Notebook is a must. Studies About Benefits of Paper Notebooks Don't just take my

Bookmark File PDF Journals Impact Factor Above 10

word, based on a study conducted at UCLA, the Association for Psychological Science indicated that "taking notes by hand is better than taking notes on a laptop for remembering". Will you take advantage of this knowledge to gain an edge on your competition at school, work, or business? How will better understanding make things help you achieve your goals? Organize Your Life Get rid of little scraps of paper you use to capture inspirations and ideas, daily tasks, notes, and phone numbers. Use the Keep Calm and Be A Princess Notebook to neatly organize your life. Feel Better By Logging Your Progress In my corporate days, I'd instruct employees to write down accomplishments as they happened. During annual reviews, we are bogged down with current issues and activities and it's hard to remember the great things we did 9, 6, or even 3 months ago. Write down your accomplishments with your hobbies, weight loss, and other life goals. Use the Keep Calm and Be A Princess Notebook notebook to look back feel good about yourself and the things you've done! FREE BONUS INSIDE Included inside is a link to download a free copy or an amazing adult coloring book featuring mandalas, animals and butterflies. Aside from enjoying your Keep Calm and Be A Princess Notebook, enjoy hours of enjoyment and relaxation with beautiful adult coloring pages. Inside, you'll find: 100 pages for writing A link to download a FREE adult coloring book What Really Matters? Think about the importance of your birth certificate, marriage certificate, property deeds, or even the laws that govern our society...the stuff that really matters goes onto paper! Make what you do

matter! Buy the Keep Calm and Be A Princess Notebook today, make what you write matter! ! Click the Buy button at the top of the page to begin.

The leading papers from the leading authorities in library serials Over the past few years electronic journals have flourished to become an integral part of a modern library system. The challenges of licensing, financing, developing, managing, and delivering seamless and integrated access are topics of crucial importance.

Growth, Creativity, and Collaboration: Great Visions on a Great Lake tackles these issues through this compilation of thought-provoking papers on the future of serial publications from the 2004 North American Serials Interest Group (NASIG)'s nineteenth annual conference, which took place on the shore of Lake Michigan in Milwaukee, Wisconsin. *Growth, Creativity, and Collaboration* presents visionary experts who analyze the past, present, and promising future of library serials. The wide variety of stimulating topics include various aspects of electronic resources, financial issues facing the publication of serials, collaboration with vendors to assist in the development of new products and services, and the challenges and successes of librarians dealing with serial collection development and management. Tables and figures enhance the clarity of ideas, and the chapters are impeccably referenced. *Growth, Creativity, and Collaboration: Great Visions on a Great Lake* discusses: the role of libraries in the world the Big Deal the evolution of alternative publishing the economics of scholarly publishing the specifics of making journals print versus electronic publishing economics strategies to

support Tier 3 publishers systems and standards in electronic resource management licensing issues for electronic products pricing models the hidden costs of e-journals the Hofstra University serial review process changes and access problems with e-journals vendor collaboration to create the products you want faculty collaboration in serials collections development and management understanding and implementing context-sensitive linking services understanding and using your usage statistics creative strategies to cope with your subscription agent's bankruptcy resolution of license breaches Growth, Creativity, and Collaboration: Great Visions on a Great Lake creatively addresses the many issues involving any library's handling of electronic resources. This eye-opening resource is perfect for librarians, publishers, and commercial vendors interested in the future of serial publication.

She Believed She Could So She Did Journal - Unlined Blank Paper . Get an extra kick at something you pursue. Keep up your motivation with this journal. Gorgeous quote cover Empty, blank interior - write, sketch or plan in this notebook Numbered pages 8.5 x 11 inches in size - it's plenty of space for your writing 110 pages - decent thickness, can be used as a 90 day journal. Use it as a habit fix tracker, self help journal, or an idea journal. Perfect as a gift for girls and women. Give it to your coworkers, family, and girlfriends. Discover many gorgeous journals with inspirational quotes, just search for "new day journals she believed she could" or "new day journals quote" in the Books section. Browse our author page for many bright and colorful journals and

notebooks with different layouts.

Hans Eysenck is one of the world's leading psychologists and undoubtedly the most controversial. Throughout a long and illustrious career his work on personality and intelligence has aroused impassioned debate and attacks, both verbal and physical, on Eysenck himself. In his compelling and absorbing autobiography, Eysenck recounts in some detail the battles he had to fight in order to establish his major conclusions, as well as the reasons why he investigated these subjects. He also discusses his work on such topics as the health hazards of smoking, the prophylactic effects of behavior therapy on cancer and coronary heart disease, parapsychology, astrology, and other matters. In a new foreword, written for this edition, Eysenck expresses his pleasure regarding the fact that his autobiography is now being published in the United States. He discusses how much of his scientific life has been bound up with American psychology. Also new to this American edition is a chapter titled "Genius, Creativity, and Vitamins," in which Eysenck talks about the research he has worked on since his retirement in 1983. *Rebel with a Cause* is an intriguing autobiography and will be of paramount interest to psychologists, sociologists, and genetic scientists.

"Perez Velazquez has written a little gem that I advise reading to anyone pursuing a scientific career, as well as for the general public interested in the sociological aspects of science. It alerts the reader about the rise of a new type of scientist, buried in bureaucracy and financial issues. In contrast to past generations, this "new scientist" is sadly left

with minimal time to dedicate to creative work. It studies the consequences of this state of affairs, the problems associated with peer reviewing, the dilemma of funding innovative research, the nature of corporate academic culture and the trivialization of scientific achievement by grant agencies and universities. It also provides possible solutions for these problems. All this is magnificently exemplified and documented, including personal experiences from the author and a touch of humor illustrated in the accompanying cartoons. Despite the humor, it is a serious piece of work that would also be useful for the conscientious academic worried about the difficulties of the current research scene." Marina Frantseva, MD, PhD Jose Luis Perez Velazquez is a Spanish biochemist/biophysicist. He has a degree in Biochemistry and a PhD in Molecular Physiology & Biophysics. His research activities are mainly in the fields of the brain-behaviour relation at a high level of description, seeking principles of biological organisation. He worked as a senior scientist at the Hospital for Sick Children in Toronto and was Professor at the University of Toronto, where he taught a graduate course on consciousness and self-awareness, which derived in part from his book *The Brain-Behaviour Continuum* (World Scientific). He also edited the book *Coordinated Activity in the Brain* (Springer), and edited special issues for *The Journal of Biological Physics*, *Frontiers in Integrative Neuroscience* and *Frontiers in Computational Neuroscience*. Currently he is a Research Scholar at the Ronin Institute, where he continues to investigate a possible global principle, a scheme that combines theoretical studies and experimental observations, aimed at conceptualizing how consciousness arises from the organization of matter.

‘Represents the culmination of an 18-month-long project that aims to be the definitive review of this important topic.

Accompanied by a scholarly literature review, some new

analysis, and a wealth of evidence and insight... the report is a tour de force; a once-in-a-generation opportunity to take stock.’ – Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog ‘A must-read if you are interested in having a deeper understanding of research culture, management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration.’ – Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London, LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic, even enthusiastic, about the prospect of granular, real-time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power: they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence-gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems. Finally, they consider the negative or unintended effects of metrics on various aspects of research culture. Including an updated introduction from James Wilsdon, the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management, by funders, and in the next cycle of the Research Excellence

Bookmark File PDF Journals Impact Factor Above 10

Framework. The metric tide is certainly rising. Unlike King Canute, we have the agency and opportunity – and in this book, a serious body of evidence – to influence how it washes through higher education and research.

Examines current issues in journals publishing and reviews how the industry will develop over the next few years. With contributions from leading academics and industry professionals, the book provides an authoritative and balanced view of this fast-changing area. There are a variety of views surrounding the future of journals and these are covered using a range of contributors. Online access is now taken for granted - 90 per cent of journals published are now available online, an increase from 75 per cent in 2003. Looks at a fast moving and vital area for academics and publishers. Contains contributions from leading international figures from universities and publishers.

This book offers helpful insight and advice on how doctoral students and junior faculty can succeed as an entrepreneurship scholar. It invites them to think entrepreneurially to identify research opportunities, manage the publication process, achieve excellence in the classroom, secure a faculty position, and build a research record worthy of promotion and tenure. Drawing from his experience as a research scholar, editor, review board member, mentor, and reviewer of many promotion and tenure cases, author Dean Shepherd offers strategies and other pieces of advice for navigating the obstacles that can prevent a successful scholarly career. This book provides an overview and roadmap to help entrepreneurship scholars achieve success, and stimulates thought and discussion for doctoral students and junior and senior faculty to consider as they look to develop the next generation in academia.

"This resource will educate students and pharmacists on traditional drug information topics while providing an

extensive background on more recent practice areas. This is a user-friendly text with multiple examples that can be used in education and training, as well as clinical practice. Each chapter includes learning objectives, key terms, examples and cases, and review questions"--

This Book Is The First Comprehensive, Authoritative And Highly Readable Account Of Science And Technology In Independent India.

This book explores the weak explanatory and predictive power of theories across disciplines, explains reasons for limited expertise after centuries of scientific effort, and sets forth strategies to accelerate knowledge and manage a future we can only dimly comprehend. Gaps in knowledge arose because common, natural and artificial phenomena are fundamentally hard to understand, and in expertise persists because research is unproductive. This book argues that weak research comes with huge opportunity cost because it stymies optimum decision making by government, corporations and individuals. Research needs restructuring which must come from governments' top down requirement that funding bodies foster applied research with real-world impact, and that universities influence scientific publishers to improve their publications' integrity. This book seeks to catalyse extinction events for theories in most disciplines, which would clear a path for solving multiple crises in research. The author cautions that this process would be disruptive, unpopular and painful.

A good research paper is more than just a clear, concise, scientific expose. It is a document that needs to go beyond the science to attract attention. There are both strict and less definable norms for doing this, but many authors are unaware as to what they are or their use. Publishing is rapidly changing, and needs to be explained with a fresh perspective. Simply writing good, clear, concise, science is no

Bookmark File PDF Journals Impact Factor Above 10

longer enough-there is a different mind-set now required that students need to adopt if they are to succeed. The purpose of this book is to provide the foundations of this new approach for both young scientists at the start of their careers, as well as for more experienced scientists to teach the younger generation. Most importantly, the book will make the reader think in a fresh, creative, and novel way about writing and publishing science. This is an introductory guide suitable for advanced undergraduates, graduate students, and professional researchers in both the life and physical sciences.

Great for Journaling and Writing - Makes the Perfect Gift This Writing Journal is a 8 x 10 soft cover journal notebook diary it has 126 lightly lined white pages with a beautifully colored cover displaying an inspirational word. Words can make you feel something you wish to remember, help you see things you don't wish to forget or they make you do something to push you forward. Pick the word that inspires you!

Dimensions: 8 by 10 inches 126 Lightly Lined Pages (128 total pages) Makes the Perfect Gift White Paper Matte Cover Softcover / Paperback / Notebook 10 Colors: Aqua, Blue, Dark Blue, Green, Orange, Pink, Purple, Red, Teal and Yellow 36 Words: Abundance, Action, Attitude, Authentic, Believe, Blessings, Courage, Create, Dedicated, Disciplined, Dreams, Encourage, Faith, Focus, Goals, Grace, Gratitude, Honor, Hope, Inspire, Joy, Kindness, Love, Motivate, Opportunity, Overcome, Peace, Positive, Purpose, Rejoice, Strategic, Strength, Success, Truth, Vision and Wisdom A journal is a great tool for any of the following: a day timer, diary, notebook, travel journal, health journal, idea book, thoughts and dreams, successes, failures, blessings, wish lists, lists, habit tracking, bullet journaling, things grateful for, prayer lists, to write thoughts and letters to your family, record medical information, a password notebook, express your

Management science in engineering (MSE) is playing an increasingly important role in modern society. In particular, the development of efficient and innovative managerial tools has significantly influenced the research progress of management science. As research is vital for the propagation of leading-edge methods, journal evaluation and classification are critical for scientists, researchers, engineers, practitioners, and graduate students. This book identifies the main research categories of MSE, and evaluates and classifies each MSE journal. It represents the outcome of joint efforts from scientific board members, research fellows, and members of various professional societies. It is ideal for scientists, researchers, practitioners, engineers, graduate students and upper-level undergraduates in engineering management, civil engineering, industrial engineering, environmental engineering, energy engineering, information engineering, and agricultural engineering.

This book shows scientists how to apply their analysis and synthesis skills to overcoming the challenge of how to write,

as well as what to write, to maximise their chances of publishing in international scientific journals. The book uses analysis of the scientific article genre to provide clear processes for writing each section of a manuscript, starting with clear 'story' construction and packaging of results. Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well-written example papers. Strategies are presented for responding to referee comments, and for developing discipline-specific English language skills for manuscript writing and polishing. The book is designed for scientists who use English as a first or an additional language, and for individual scientists or mentors or a class setting. In response to reader requests, the new edition includes review articles and the full range of research article formats, as well as applying the book's principles to writing funding applications. Web support for this book is available at www.writeresearch.com.au

The Brain Korea 21 Program (BK21), which seeks to make Korean research universities globally competitive and to produce more high-quality researchers in Korea, provides funding to graduate students and professors who belong to research groups at top universities. The authors develop quantitative and qualitative models to evaluate how well BK21 is fulfilling its goals and make suggestions for further stimulating Korean university research.
