International trade rules have significant impacts on environmental law and policy, at the domestic, regional and global levels. At the World Trade Organization (WTO), dispute settlement tribunals are increasingly called to decide on environment- and health-related questions. Can governments treat products differently based on environmental considerations? Can they block the import of highly carcinogenic asbestos-containing products or genetically modified crops? Does the WTO allow governments to protect dolphins or endangered sea turtles through the use of import restrictions on certain products? How can civil society participate in WTO dispute settlement? This Guide, authored by five world leaders on international environmental and trade law at the Center for International Environmental Law (CIEL), is an accessible, comprehensive, one-of-a-kind compendium of environment and trade jurisprudence under the WTO. Providing an overview for both experts and non-experts of the major themes relevant to environment and trade, it also analyses how WTO tribunals have approached these themes in concrete disputes and provides selected excerpts of the most significant cases.

The essays in this volume appeared in slightly different versions in the *Emory Law Journal*, volume 42, number 2, pages 433-560. The edited and revised versions of those essays are published with the consent of the editors of the *Emory Law Journal* to whom grateful acknowledgment is given.

Jurisprudence: Themes and Concepts offers an original introduction to, and critical analysis of, the central themes studied in jurisprudence courses. The book is presented in three parts each of which contains General Themes, Advanced Topics, tutorial questions and guidance on further reading: Law and Politics, locating the place of law within the study of institutions of government Legal Reasoning, examining the contested nature of the application of law Law in Modernity, exploring the social forces that shape legal development. This second edition includes enhanced discussion of the rise of legal positivism within the context of the rise of the modern state, the changing role of natural and human rights discourse, concepts of justice in and beyond the nation state, the impact of emergency doctrines in contemporary legal regulation, and challenges to the rule of law in light of shifting and competing demands for new types of social solidarity. Accessible, interdisciplinary, and socially informed this book has been revised to take into account the latest developments in jurisprudential scholarship.

Money laundering is a global issue and there is evidence that the services provided by the legal profession may be misused to launder the proceeds of crime. This book explores the experiences of professionals within Top 50 law firms when seeking to comply with the UK's anti-money laundering (AML) regime. The book draws upon empirical evidence from 40 in-depth interviews with solicitors and compliance personnel from 20 Top 50 law firms. Access to this section of the legal profession is challenging in the context of academic research, and the research provides an account, seldom heard in academic literature, directly from practitioners. The book uses these research findings to explore and discuss the AML compliance issues faced by this section of the profession. It highlights the challenges presented by the legislative architecture of the Proceeds of Crime Act 2002, and considers compliance issues relating to customer due diligence, AML training, the client account and the suspicious activity reporting regime. It also considers participants' perceptions of the regime, their role within it, and their own assessment of money laundering risk. It concludes by using this evidence to recommend amendments to current AML policy and legislation. This book will be of interest to students and researchers studying Financial Crime Law, Business and Company Law, and White Collar Crime, as well as policy makers in the areas of money laundering, compliance, and corruption.

Designed around the real-world legal applications of reading comprehension, the Manhattan Prep Reading Comprehension LSAT Strategy Guide is an essential tool for a surprisingly tricky part of the LSAT. Containing the best of Manhattan Prep's expert strategies, this book will train you to approach the LSAT as a law student would approach a legal text—actively and with a purpose. The Reading Comprehension LSAT Strategy Guide teaches you how to recognize the core argument and then use it as a framework on which to organize the entire passage, improving the speed and clarity with which you read. To further improve your reading, it walks you through the process of annotation, discussing where and how to take notes in order to maximize your comprehension without eating up precious time. It also looks at what types of questions the LSAT asks and then arms you with the skills you need to spot issues and identify correct answers. Each chapter in the Reading Comprehension LSAT Strategy Guide features drills and full practice sets—made up of real LSAT questions—to help you absorb and apply what you've learned, while numerous, in-depth solutions walk you through the process of selecting the right answer and help you to achieve mastery. Further practice sets and other additional resources are included online and can be accessed through the Manhattan Prep website. Used by itself or with other Manhattan Prep materials, the Reading Comprehension LSAT Strategy Guide will push you to your top score.

This book draws upon domestication science to undertake a radical reappraisal of the jurisprudence of property and intellectual property. Bringing together animal studies and legal philosophy, it articulates a critique of dominant property models and

relationships from the perspective of cognitive ethology, domestication science and animal behaviour. In doing so, a radical new picture of property emerges. Focusing on the emergence of property models through prevailing ideas of human domestication and settlement, the book challenges the anthropocentrism that informs standard approaches to ownership and to authorship. Utilising a wide range of examples from ethology and animal studies, the book thus rethinks the very nature of property as uniquely human. This highly original contribution to the fields of property and intellectual property will appeal not only to legal scholars in these areas, as well as in animal law, but also to legal theorists and others working in the social sciences with interests in posthumanism and animal studies.

More than twenty-five years after the collapse of the Socialist bloc, the nature of the regimes in Eastern Europe between 1945 and 1989 continues to evade the attempts of political theorists and scholars of post-communism to define and classify them. Drawing on philosophical inquiry, jurisprudential analysis and intellectual history, this book traces the impact of communist ideology and practice on legal thought: from its critical roots in the midst of the nineteenth century to its reactionary stand in the later years of the twentieth. Exploring how the communist experience – both in its revolutionary and authoritarian guises – has been articulated within the legal theoretical field, the book addresses two central theoretical lacunae fostered by the historiography of authoritarianism in Central and Eastern Europe: the status of law, and its relationship to the broader ideological framework legitimising authoritarian regimes. Moving beyond the limits of the contemporary discourse on communism – particularly as it is channelled through transitional justice and memory studies – Cosmin Cercel develops a theoretical framework that is able to uncover law's complicity with the extreme ideologies that dominated Central and Eastern Europe. For it is, he argues, in its recourse to legal concepts that the communist experience raises important jurisprudential questions for our contemporary understanding of law, the limits of state sovereignty, and law's relationship to historical violence.

Law students rarely have experience answering problem questions before university, and lecturers concentrate on teaching content rather than the exam skills needed. This book bridges the gap on how to transpose knowledge and research into structured and coherent answers to problem questions while earning a law degree. Aimed at undergraduates, international students, and foundation and SQE candidates, the book gives a step-by-step study guide on how to navigate what a problem question is asking you to do. It deconstructs the process using examples from a range of different fields of law, providing essential guidance from research and critical thinking to style and tone. Including a range of examples to test yourself against, this is an indispensable resource for any law student who wants to tackle problem questions with confidence.

In order to make the criminal court system more effective there has been a growing trend to have courts participate in what is essentially a rehabilitation strategy. Such courts are often referred to as "problem-solving" because they are working on root causes of criminal behavior as part of the dispensation of justice. This major shift in the role of the courts means that the court works closely with prosecutors, public defenders, probation officers, social workers, and other justice system partners to develop a strategy that pressures offenders to complete a treatment program which will ultimately, hopefully prevent recidivism. Research has shown that this kind of strategy has a two-fold benefit. It has been successful in helping offenders turn their lives around which leads to improved public safety and the ultimate saving of public funds. This book is the first to focus exclusively on problem solving courts, and as such it presents an overview of the rationale and scientific evidence for such courts as well as individual sections on the key areas in which these courts are active. Thus there is specific attention paid to domestic violence, juvenile criminality, mental health, and more. Throughout, research findings are incorporated into general discussions of these courts operate and ideally what they are trying to accomplish. There is also discussion of how such courts should evolve in the future and the directions that further research should take.

First published in 1998, this text is the prefatory first part of Austin's Lectures on Jurisprudence or the Philosophy of Positive Laws and first appeared separately from the Lectures in 1832. This volume reproduces the standard text of The Province from Robert Campbell's fifth edition, published in 1885, and clarifies the structure and readability of the text, retaining Austin's 'Analysis' as a whole at the start of the book. John Austin (1790-1859) was the first professor of jurisprudence at the University of London, which is now University College. His classic, The Province of Jurisprudence Determined, was derived from his course lectures. Austin took great pride in his ability to clearly delineate the study of law. Austin took a surgical approach and created a stripped down view of material central to the study of law. While this approach overlooks the ambiguity inherent in interpretations of law, it nevertheless stands as a landmark work and provides an excellent starting point for any deeper inquiry into the subject of jurisprudence.

'Transgender Jurisprudence: Dysphoric Bodies of Law is an important book. ... Sharpe's discussion [of transgender jurisprudence]... is convincing and thought-provoking, ... his observations incisive and legally persuasive ... [and] his examination of the fundamental heterosexism and phallogocentricity of "reform" jurisprudence is brilliant.' -Queen's Law Journal (Vol 28(1) 2002 pp 363-369 at pp 365, 366, 368 and 369), Professor Bruce MacDougall of the Faculty of Law, University of British Columbia, Vancouver 'Transgender Jurisprudence is a work of the most careful and comprehensive scholarship ... [and] ... will, I have no doubt, be a standard resource to all those who have reason to work in the area, both as practicing lawyers, activists, or academics, in years to come.' -Sydney Law Review (Vol 24 2002 pp 442-448 at p 443), Professor Desmond Manderson, Canada Research Chair in Law & Discourse, McGill University, Montreal 'Transgender Jurisprudence provides an excellent, well-researched contribution to the fields of transgender studies and jurisprudence concerning gender and sexuality. ... It is also a valuable contribution to wider discussions concerning feminism, poststructuralism and queer studies.' -Res Publica (Vol 8(3) 2002 pp 275-283 at pp 282-283), Dr Surya Munro of the Department of Law, Keele University '[Sharpe] expresses the hope that the book has made an important contribution ... That it has done so is beyond doubt. Indeed more than a contribution, Sharpe has comprehensively reshaped and redefined the field of transgender jurisprudence. ... [T]he end result is a book which is not only sustained, integrated and comparative, but which introduces a set of original and sophisticated arguments that will provide an indispensable grounding for subsequent work in the field for some time to come.' -Griffith Law Review (Vol 12(2) 2003 pp 387-390 at p 390), Professor Rosemary Hunter, Dean of the Faculty of Law, Griffith University '[Transgender Jurisprudence] has already become a foundational work by which others will be measured. ... [It] sets a high bar ... As one who litigates cases on behalf of transgender people as well as those involving same-sex couples seeking marriage rights, I think Sharpe has done an incredible job identifying [homophobia as] the source of the tension in such cases.' - Adelaide Law Review Vol 24(2) 2003 pp 99-104 at 104.

Revealing the role of discrimination in disasters challenges received wisdom about who is a refugee.

This book draws on the analytic and political dimensions of queer, alongside the analytic and political usefulness of emotion, to navigate legal interventions aimed at progressing the rights of LGBT people. Scholars, activists, lawyers, and judges concerned with eliminating violence and discrimination against LGBT people have generated passionate conversations about pursuing law reform to make LGBT injuries, intimacies, and identities visible, while some challenge the ways legal systems marginalise queer minorities. Senthoran Sunil Raj powerfully

contributes to these ongoing conversations by using emotion as an analytic frame to reflect on the ways case law seeks to progress the intimacies and identities of LGBT people from positions of injury. This book catalogues a range of cases from Australia, the United States, and the United Kingdom to unpack how emotion shapes the decriminalisation of homosexuality, hate crime interventions, anti-discrimination measures, refugee protection, and marriage equality. While emotional enactments in pro-LGBT jurisprudence enable new forms of recognition and visibility, they can also work, paradoxically, to cover over queer intimacies and identities. Raj innovatively shows that reading jurisprudence through emotions can make space in law to affirm, rather than disavow, intimacies and identities that queer conventional ideas about LGBT progress, without having to abandon legal pursuits to protect LGBT people. This book will be of interest to students and scholars of human rights law, gender and sexuality studies, and socio-legal theory.

What are the requirements for a just response to criminal wrongdoing? Drawing on comparative and empirical analysis of existing models of global practice, this book offers an approach aimed at restricting the current limitations of criminal justice process and addressing the current deficiencies. Putting restoration squarely alongside other aims of justice responses, the author argues that only when restorative questions are taken into account can institutional responses be truly said to be just. Using the three primary jurisdictions of Australia, New Zealand and Canada, the book presents the leading examples of restorative justice practices incorporated in mainstream criminal justice systems from around the world. In conclusion, the work provides a fresh insight into how today's criminal law might develop in order to bring restoration directly into the mix for tomorrow. This book will be of interest to undergraduates, postgraduate researchers and lecturers, as well as lawyers who work in the field of criminal law, criminologists, social scientists and philosophers interested in ideas of wrongdoing and criminal justice responses to criminal offending.

As planet Earth continues to absorb unprecedented levels of anthropogenically induced environmental and climatic change, two similar academic schools of thought have emerged in recent years, both making sustained efforts to explain how and why this state of affairs has evolved. These two disciplines are known as green criminology and earth jurisprudence. Whilst these areas of study can be seen as sub-disciplines of their parent subjects, law and criminology, this book proposes that much can be achieved by authors uniting and collaborating on their academic work. By doing this, it is argued that green criminology stands to benefit from a discipline that places mother nature at the heart of lawmaking and therefore providing a solution to the environmental harms identified by green criminologists. Furthermore, earth jurisprudence will profit from utilising the breadth of academic work produced within the green criminology academic arena. Therefore, this book seeks to unite green criminology and earth jurisprudence in an effort to find solutions to the extraordinary environmental problems that the world now faces.

Textbook provides a current overview of the field and features a detailed discussion of common ethical situations and practice management. Focuses on technology in the workplace. Chapter activities and exercises are included.

This challenging book on jurisprudence begins by posing questions in the post-modern context, and then seeks to bridge the gap between our traditions and contemporary situation. It offers a narrative encompassing the birth of western philosophy in the Greeks and moves through medieval Christendom, Hobbes, the defence of the common law with David Hume, the beginnings of utilitarianism in Adam Smith, Bentham and John Stuart Mill, the hope for enlightenment with Kant, Rousseau, Hegel and Marx, onto the more pessimistic warnings of Weber and Nietzsche. It defends the work of Austin against the reductionism of HLA Hart, analyses the period of high modernity in the writings of Kelsen, Hart and Fuller, and compares the different approaches to justice of Rawls and Nozick. The liberal defence of legality in Ronald Dworkin is contrasted with the more disillusioned accounts of the critical legal studies movement and the personalised accounts of prominent feminist writers.

The most efficient, readable, and reasonable option for preparing for the Texas Medical Jurisprudence Examination, a required test for physician licensure in Texas. The goal of this study guide is to hit the sweet spot between concise and terse, between reasonably inclusive and needlessly thorough. This short book is intended to be something that you can read over a few times for a few hours before your test and easily pass for a reasonable price, with enough context to make it informative and professionally meaningful without being a \$200 video course or a 300-page legal treatise. After all, the Texas JP exam isn't Step 1-it's a \$58 pass/fail test!

This book brings the insights of theatre theory to law, legal interpretation and the jurisprudential to reshape law as a practice of response and responsibility. Confronting a Baconian antitheatrical legality embedded in its jurisprudences and interpretative practices, the book turns to theatre theory and practice to ground a theatrical jurisprudence, taking its cues from Han-Thies Lehmann's conception of the post-dramatic theatre and the early work of theatre visionary Jerzy Grotowski. It asks law to move beyond an imagined ideal grounded in Aristotelian drama and tragedy, and turns to the formation of the legal interpreter - lawyer, judge, jurisperdent - as fundamental to understanding what is noticed or not noticed in law. We notice most easily through that which is written into the body of the legal interpreter, in a way that can't be replicated through law's standard practices of thinking and reasoning. Without more, thinking and reasoning are the epitome of antitheatricality legality; a set of theatrical antonyms, including transgression and instinct, offer instead a set of possibilities through which to reconceive assumptions and foundational concepts etched into the legal imaginary. And by turning to the critical dramaturgy, the book reveals that the liveliness that sits behind theatrical jurisprudence isn't a new concept in law at all, but has a long pedigree and lineage that had been lost and hidden. Theatrical jurisprudence, which demands an awareness of self and beyond self, grounds a responsiveness that can't be found within doctrine, principle, or the technocratic, but also challenges us to notice what it is we think we know as well as what we know of lives that aren't our own. The book will be of interest to scholars and students in the field of jurisprudence, legal theory, theatre and performance studies, cultural studies and philosophy.

This book offers a critical examination of the jurisprudence of the World Trade Organization (WTO) as an emancipatory international social contract on trade. The book suggests that the WTO is an international organization built and operating on member states' attribution of authority through consent with legislative, administrative, and adjudicative functions - three functions in one triune personality. With a solid constitutional continuity building on GATT experiences, the WTO has successfully made governments accountable to foreign individuals in various capacities either as traders of goods, providers of services, or holders of intellectual property rights within the global marketplace. With a triune personality, the WTO operates within the reign of state primacy - the force - ultimately for the benefits of individuals - the ends - in the global marketplace, and gains a soul of its own in the institutional evolution - the means - of the global trading regime. Although the tripartite dynamics between states, international institutions, and individuals in the global marketplace are unprecedentedly complex, the WTO's ends of benefiting individuals in the global marketplace has no end. Beyond the critical analysis of WTO's decision-making by consensus, the book critically examines GATT's "common intention" treaty interpretation, Antidumping's NME methodology, TRIPS' public health concerns,

and IP-competition trade policy dynamics. A unified WTO jurisprudence looking at the WTO as an international social contract on trade is therefore proposed to allow a fresh look at the force, the means, and the ends of the constitutional evolution of the global trading regime.

This book investigates the difference that jurisdiction continues to make to the ordering of normative existence. It also follows the speculation that without an account of jurisdiction, jurisprudence would be left with no power to address the conditions of attachment to legal and political order.--Provided by publisher.

The idea of human dominion over nature has become entrenched by the dominant rights-based interpretation of private property.

Accordingly, nature is not attributed any inherent value and becomes merely the matter of a human property relationship. Earth Jurisprudence: Private Property and the Environment explores how an alternative conception of property might be instead grounded in the ecocentric concept of an Earth community. Recognising that human beings are deeply interconnected with and dependent on nature, this concept is proposed as a standard and measure for human law. This book argues that the anthropocentric institution of private property needs to be reconceived; drawing on international case law, indigenous views of property and the land use practices of agrarian communities, Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature. Using the theory of earth jurisprudence as a guide, he outlines an alternative ecocentric description of private property as a relationship between and among members of the Earth community. This book will appeal to those researching in law, justice and ecology, as well as anyone pursuing an interest more particularly in earth jurisprudence.
