There are millions of new motorcyclists hitting the blacktop every year. But being part of the American motorcycle culture takes more than just wanting to be cool. It takes a passion for the open road, freedom, and a lifestyle that even the best financing cant buy. This book, by someone who knows motorcycles as few do, provides a road map to biker culture for anyone new to the experience. Jay Barbieri explains everything a new rider needs to know to become a real biker. He begins with a brief history of motorcycles, and draws on his twenty-five years of riding experience for examples of what

works and doesn't in this heady world. Most of all, he aims to spare new bikers the bad decisions neophytes typically make. With hundreds of motorcycle trips under his belt, there is not a mistake Barbieri hasn't made or a situation he hasn't encountered. By sharing the sometimes comical outcomes, he gives the new biker a head start to become more comfortable, credible, and knowledgeable about joining a community that is as much a part of American culture as baseball, hotdogs and apple pie.

This book discusses professional issues which examine the current affairs of therapeutic recreation. Topics covered include accreditation; curriculum standards; technology issues; assessment; clinical practice; theory, practice and research; charging for services; and much more. Recreation Business: Strategies for Success is a conversation about leisure-based businesses for classroom and online courses. From the point of view of a senior scholar who has studied leisure and its social contexts for 5 decades, Kelly begins by

introducing the scope and variety of recreation businesses and discusses major issues in the field. Then he turns toward social and behavioral science research about recreation and leisure that has been developed since 1970, answering the question, how does this research guide and direct the beginning and operation of a recreation business? Throughout the book, Kelly encourages dialogue and learning through questions, cases, research ideas, debates, online resources, and more. The beginning is that leisure is different. The focus is on what a recreation business sells or rents: an experience. The crucial element is quality. And decades of study have yielded a lot of insight into how leisure experiences can be raised to a level that will attract and retain clients. John R. (Jack) Kelly

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
