While activities were restricted for children, parents and grandparents found ways to keep going. Pandemic Adventures with Pop Pop follows the unique way Pop Pop found to entertain his Grandmen Dean and Levi. During the pandemic, or as Grandman Dean called it, "The Sickness," Pop Pop found fun ways to keep his Grandmen safe, educating them while also creating positive and fun memories. The Adventures with Pop Pop series of children's books covers adventures with Pop Pop and his Grandmen. "Something really bad happened here." So begins Army interrogator Tony Lagouranis's first briefing at Abu Ghraib. While Lagouranis's training stressed the rules of the Geneva Conventions, once in Iraq, he discovered that pushing the legal limits of interrogation was encouraged. Under orders, he-along with numerous other soldiers-abused and terrorized Iraqis by adding "enhancements" like dogs, hypothermia, and other techniques to "Fear Up Harsh"-the official tactic designed to frighten prisoners into revealing information. And he saw others do far worse. The first Army interrogator to publicly step forward and break the silence surrounding these tactics, Lagouranis reveals what went on in Iraqi prisons- raising crucial questions about American conduct abroad.

This book is essential for audio power amplifier designers and engineers for one simple reason...it enables you as a professional to develop reliable, high-performance circuits. The Author Douglas Self covers the major issues of distortion and linearity, power supplies, overload, DC-protection and reactive loading. He also tackles unusual forms of compensation and distortion produced by capacitors and fuses. This completely updated fifth edition includes four NEW chapters including one on The XD Principle, invented by the author, and used by Cambridge Audio. Crosstalk, power amplifier input systems, and microcontrollers in amplifiers are also now discussed in this fifth edition, making this book a must-have for audio power amplifier professionals and audiophiles.

The Manual Arts. PREFACE The greatest present, problems affecting the manual arts in education, whether that education be vocational or cultural in its aim, are centered around the selection and organization of subject matter and methods of teaching. Believing this to be true, the author contributes the following chapters to the discussion of these problems, hoping that they may be of some service to his fellow workers. Several of the chapters have previously appeared as articles in magazines. When brought together, however, they have a significance which they did not possess as isolated articles appearing from time to time over a period of several years.

Antistatic sprays from several different manufacturers are examined. The sprays are

examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. WINNER OF THE FLETCHER PRATT AWARD FOR BEST NON-FICTION BOOK OF 2016 In a single definitive narrative, CITY OF SEDITION tells the spellbinding story of the huge-and hugely conflicted-role New York City played in the Civil War. No city was more of a help to Abraham Lincoln and the Union war effort, or more of a hindrance. No city raised more men, money, and materiel for the war, and no city raised more hell

against it. It was a city of patriots, war heroes, and abolitionists, but simultaneously a city of antiwar protest, draft resistance, and sedition. Without his New York supporters, it's highly unlikely Lincoln would have made it to the White House. Yet, because of the city's vital and intimate business ties to the Cotton South, the majority of New Yorkers never voted for him and were openly hostile to him and his politics. Throughout the war New York City was a nest of antiwar "Copperheads" and a haven for deserters and draft dodgers. New Yorkers would react to Lincoln's wartime policies with the deadliest rioting in American history. The city's political leaders would create a bureaucracy solely devoted to helping New Yorkers evade service in Lincoln's army. Rampant war profiteering would create an entirely new class of New York millionaires, the "shoddy aristocracy." New York newspapers would be among the most vilely racist and vehemently antiwar in the country. Some editors would call on their readers to revolt and commit treason; a few New Yorkers would answer that call. They would assist Confederate terrorists in an attempt to burn their own city down, and collude with Lincoln's assassin. Here in CITY OF SEDITION, a gallery of fascinating New Yorkers comes to life, the likes of Horace Greeley, Walt Whitman, Julia Ward Howe, Boss Tweed, Thomas Nast, Matthew Brady, and Herman Melville. This book follows the fortunes of these figures and chronicles how many New Yorkers seized the opportunities the conflict presented to amass capital, create new industries, and expand their markets, laying the foundation for the city's-and the nation's-growth.

Acclaimed entertainer Hans Schneir collapses when his beloved Marie leaves him because he won't marry her within the Catholic Church. The desertion triggers a searing re-examination of his life—the loss of his sister during the war, the demands of his millionaire father and the hypocrisies of his mother, who first fought to “save” Germany from the Jews, then worked for “reconciliation” afterwards. Heinrich Böll's gripping consideration of how to overcome guilt and live up to idealism—how to find something to believe in—gives stirring evidence of why he was such an unwelcome presence in post-War German consciousness . . . and why he was such a necessary one.
