Maybe you've had a moment when God did something radical in your heart. Putting your faith and trust in Him certainly feels like taking a giant leap, but really it's just the beginning of the exciting, and—yes—radical journey that comes with agreeing to live as God calls you to. What does being radical look like? In the Bible, the common characteristics of "radicals" are: They trusted God. They listened to God's voice and then obeyed—even when it cost them. Because of their faith, they lived lives that looked different from everyone else's. That's a short list and a tall order, but basically it means you can be a radical, too. There's nothing on that list that is impossible for you. There's nothing on that list that requires you to be older, or more financially stable, or to have a college degree. No matter who you are or where you live, you can live a radical faith. Meet Erin, who has learned practical ways to do just that. She'll help you be radical, too. My Name is Erin: One Girl's Plan for Radical Faith is one in a series of four books, which can be read in any order. The other titles are: My Name is Erin: One Girl's Journey to Discover Truth My name is Erin: One Girl's Journey to Discover Who She Is My Name is Erin: One Girl's Mission to Make a Difference

Our food experiences can be significantly influenced by both intrinsic and extrinsic multisensory information. Therefore, it is crucial to understand and apply the principles that govern the systematic connections that exist between the senses in the context of Human-Food Interaction (HFI). In our Research Topic, namely Multisensory Human-Food Interaction (MHFI), several studies that consider such connections in the context of HFI are presented. We also have contributions that focus on multisensory technologies that can be used to share and reproduce specific HFIs. This eBook, which resulted from the Research Topic, presents some of the most recent developments in the field of MHFI. In particular, it consists of two main sections and corresponding articles. The eBook begins with the Editorial, which provides an overview of MHFI. Then, it includes six articles that relate to principles in MHFI and three on technologies in MHFI. We hope that the different contributions featured here will support future developments in MHFI research.

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. After tragic turns in their lives, two boys find themselves at one of the last schools teaching the ancient craft of the ninja. As they endure the cut-throat training of Master Uncle, they struggle to make sense of what brought them to seek this new way of life in the first place. There is treachery, heartache, ultra-violence, and magical aspects that are totally not lame. Friends become

enemies. Enemies become dead. Kids eat rats. Blades get thrust through faces. And a question lurks: Will the boys succumb to the evil ways of a dark master or follow the pure chaotic arts of Master Uncle who desperately tries to keep them on the right path? There's also some poetry at the end. And a fable somewhere in the middle. And there is a magnificent battle between young, clueless ninjas in a bordello. But most importantly, the book is filled with VIOLENT yet PHILOSOPHICAL iterations of KA-POW.

In recent years-especially the past decade, in sharp contrast to preceding decades-knowledge in the field of emotions has been steadily increasing. This knowledge comes from many different specialties: Emotion is a truly interdisciplinary subject. Workers in the fields of physiology, neurology, ethology, physiological psychology, personality and social psychology, clinical psychology and psychiatry, medicine, nursing, social work, and the clergy are all directly concerned with emotion. Professions such as law and architecture have an obvious concern with emotions as they affect human motives and needs. The various branches of art, especially the performing arts, certainly deal with the emotions, especially with the expression of emotions. Constantine Stanislavsky, the Russian theatrical genius, revolutionized modern theater by developing a training method for actors and actresses that emphasized creating genuine emotion on the stage, the emotion appropriate to the character and the life situation being depicted. Indeed, one can hardly think of any human activity that is not related in some way to the field of emotion. Since the contributions to the subject of emotions come from so many different disciplines, it is difficult to find the important common themes that can yield an understanding of the field as a whole. This volume will attempt to make that task easier, but I recognize that no one can treat all of the diverse material expertly and in detail. My aim will be to represent all important types of contributions and perhaps point the way for further and more intensive study of special topics.
