Written by a high schooler for a high schooler, you will find the voice both authentic and relevant. Whether you are trying to improve your school English grades, make a lasting impression through your writing, or write application essays that the college admission offices will sit up and take notice of - this book is for you. The book starts with key fundamentals that are pivotal - 3 key principles of writing, followed by 13 easy-to-implement tips that will help make your writing stand out. The book then moves on to developing your writing style, helping it become more distinct. As an add-on to the chapter, to make your writing more memorable, I share with you the pretense of perfection and the reality of beauty in writing. Memorable writing needs to avoid stupid distractions; those that occur in the form of silly punctuation and grammatical errors. That's why I have broken it down with easy-to-understand examples that will help you master punctuation and avoid grammatical errors. Literary devices are employed by the authors to not just achieve artistic ends but also offer the readers a greater understanding of their style. When used correctly, these could be game-changers in making your writing leap from the average to the extraordinary. While there are dozens of literary devices, I have focused on the ones that I believe are the most important. The final part of the book teaches you how to write stories and essays, two fundamentals that you will need to master as you embark on your academic journey. Finally, to wrap it all up, we enter the home stretch with editing. Even the best writing can look average if not edited for content, flow,

punctuation, and grammar. Multiple examples are included in each chapter and after most of them, I have included exercises to strengthen the new concepts. These examples and exercises make understanding and implementing the concepts a cinch. I truly believe that writing is part science and part art. Even the 'art' part of writing is not some trait that you either have or don't have. In my opinion, it can be taught and it can be learned. This book is focused on improving both the science and the art of writing, to help you become a complete writer.

Decorated US Navy SEAL lieutenant Jason Redman served his country courageously and with distinction in Colombia, Peru, Afghanistan, and Iraq, where he commanded mobility and assault forces. He conducted over forty capture/kill missions with his men in Iraq, locating more than 120 al-Qaida insurgents. But his journey was not without supreme challenges—both emotional and physical. Redman is brutally honest about his struggles to learn how to be an effective leader, yet that effort pales beside the story of his critical wounding in 2007 while leading a mission against a key al-Qaida commander. On that mission his team was ambushed and he was struck by machine-gun fire at point-blank range. During the intense recovery period that followed, Redman gained national attention when he posted a sign on his door at the National Naval Medical Center in Bethesda, warning all who entered not to "feel sorry for [his] wounds." His sign became both a statement and a symbol for wounded warriors everywhere. From his grueling SEAL training to his search for a balance between arrogance and humility, Redman shares it all in this inspiring and unforgettable account. He speaks candidly of the grit that sustained him despite grievous wounds, and of the extraordinary love and devotion of his wife, Erica, and his family, without whom he would not have survived. Vivid and powerful, emotionally resonant and illuminating, *The Trident* traces the evolution of a modern warrior,

husband, and father, a man who has come to embody the never-say-die spirit that defines the SEALs, one of America's elite fighting forces.
