My Travel Journal Lonely Planet Kids

Modern kids and adults take pictures with their phones, text their friends and post on social media. But in the future, where will those images and messages be? The formats we use for communicating today will almost certainly be outdated and no longer in use. Travelers will want to have a record of where they went on vacation, the vehicle they were in, what their parents and grandparents were like. Even more important, it will benefit kids to learn how to write about their experiences. Designed for 8-to-12 year-olds, but suitable for any age, this book provides a place to document experiences on a vacation or road trip, and to preserve those memories for future generations. The first three pages have simple instructions and suggestions for what to write about. Following the instructions is a page to list the details of the trip such as who is traveling, the destination, etc. There are over 40 pages that are to be filled in with observations and pictures for each trip. The book has enough pages for two separate trips. It's a hands-on book that encourages development of writing skills and so much more.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

This short story is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the

summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression – a slight hysterical tendency", a diagnosis common to women during that period.
