Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade PK provides an overview of all of the Pre-Kindergarten modules, including Counting to 5; Shapes; Counting to 10; Comparison of Length, Weight, Capacity, and Numbers to 5; and Addition and Subtraction Stories and Counting to 20.

Concise and focused, the Wonders Reading/Writing Workshop is a powerful instructional tool that provides students with systematic support for the close reading of complex text. Introduce the week's concept with video, photograph, interactive graphic organizers, and more Teach through mini lessons that reinforce comprehension strategies and skills, genre, and vocabulary Model elements of close reading with shared, short-text reads of high interest and grade-level rigor

Inspire students to develop as writers in the kindergarten classroom with these engaging and creative writing lessons. This classroom-tested resource shows positive results in students' writing and simplifies the planning of writing instruction. It contains detailed information on how to establish and manage daily Writer's Workshop and includes consistent, structured instruction to encourage students to actively participate in the writing process. Specific lessons to help students develop the traits of quality writing are also included. This resource develops college and career readiness skills and is aligned to today's standards.

Dave Stuart Jr.'s work is centered on a simple belief: all students and teachers can flourish. These 6 Things is all about streamlining your practice so that you're teaching smarter, not harder, and kids are learning, doing, and flourishing in ELA and content-area classrooms. In this essential resource, teachers will receive: Proven, classroom-tested advice delivered in an approachable, teacher-to-teacher style that builds confidence Practical strategies for streamlining instruction in order to focus on key beliefs and literacy-building activities Solutions and suggestions for the most common teacher and student "hang-ups" Numerous recommendations for deeper reading on key topics Sourcebook contains End-of-the-Unit Assessment Tasks for each Curriculum Unit along with suggestions of what the teacher should look for when evaluating student work.* Contains both English and Spanish blackline masters.

This book is a manifesto for change to a system that allows students to fall in love with learning and stay in the growth mindset for life. It offers an inspired vision of what schools could be, with clear action steps for your school and your community.

The professional development for online teaching and learning that you've been asking for An unprecedented pandemic may take the teacher out of the classroom, but it doesn't take the classroom out of the teacher! Now that you're making the shift to online teaching, it's time to answer your biggest questions about remote, digitally based instruction: How do I build and nurture relationships with students and their at-home adults from afar? How do I adapt my best teaching to an online setting? How do I keep a focus on students and their needs when they aren't in front of me? Jennifer Serravallo's Connecting with Students Online gives you concise, doable answers based on her own experiences and those of the teachers, administrators, and coaches she has communicated with during the pandemic. Focusing on the vital importance of the teacher-student connection, Jen guides you to: effectively prioritize what matters most during remote, online instruction schedule your day and your students' to maximize teaching and learning (and avoid burnout) streamline curricular units and roll them out digitally record highly engaging short lessons that students will enjoy and learn from confer, working with small groups, and drive learning through independent practice partner with the adults in a student's home to support your work with their child. Featuring simplified, commonsense suggestions, 55 step-by-step teaching strategies, and video examples of Jen conferring and working with small groups, Connecting with Students Online helps new teachers, teachers new to technology, or anyone who wants to better understand the essence of effective online instruction. Along the way Jen addresses crucial topics including assessment and progress monitoring, student engagement and accountability, using anchor charts and visuals, getting books into students' hands, teaching subject-area content, and avoiding teacher burnout. During this pandemic crisis turn to one of education's most trusted teaching voices to help you restart or maintain students' progress. Jennifer Serravallo's Connecting with Students Online is of-the-moment, grounded in important research, informed by experience, and designed to get you teaching well-and confidently-as quickly as possible. Jen will be donating a portion of the proceeds from Connecting with Students Online to organizations that help children directly impacted by COVID-19.

This set provides the consumable Student Edition, Volume 2, which contains everything students need to build conceptual understanding, application, and procedural skill and fluency with math content organized to address CCSS. Students engage in learning with write-in text on vocabulary support and homework pages, and real-world problem-solving investigations.

This is book 12 of 18 in the series of "Learn your ABC's, please"; it's for children aged 5 to 7 years old who are learning how to read and write in English. Each page teaches 1 word and this book contains 100 words for your child to learn. Only the most frequently used words starting with the letters 'n, o' were selected. The words start off with 3 letters and then progress up to 11 letters. The child must do the following exercises for each word this includes; connect the dots, fill in the missing letters, write out the word, read out the word 6 times, find the word in the crossword, outline the word, color in the word, color in the picture that explains the word & have somebody read out the meaning of the word to them. All these tasks are completed inside this activity book. It is recommended an adult sits with them during these exercises to read out the explanation of the words at the bottom of the page. After every 10 words there is a small test which needs an adult to support them. The US English format was used in this book series so there will be a slight variation in spelling of some words if this is different to your local English language. Once your child has mastered all 100 words starting with letters 'n, o', then it's recommended they start book 13 in this series, Letter 'p'.

This State-specific summary report serves as an assessment of Tennessee's Year 1 Race to the Top implementation, highlighting successes and accomplishments, identifying challenges, and providing lessons learned from implementation to date. Tennessee

received its Race to the Top grant in July 2010 as part of the first round of the competition. Since receiving the award, the State has made progress implementing several initiatives, including integrating the First to the Top (FTTT) Act goals and objectives into daily operations, aiding the LEAs' transition to new Common Core State Standards (CCSS), and designing and implementing a new educator evaluation system. The State is supporting LEAs in their transition to the CCSS by providing trainings, a crosswalk between the existing State standards and the CCSS, and pacing guides to help connect the new standards to professional growth. Over the past year, TDOE provided introductory training to more than 4,000 educators statewide on the CCSS. Additionally, most of the State's LEAs are voluntarily implementing the CCSS standards in kindergarten through second grade in school year (SY) 2011-2012. Tennessee encountered some impediments to the implementation of its Race to the Top plan during the first year of the grant. After winning its Race to the Top award, Tennessee elected a new Governor who then appointed a new Commissioner of Education. Although the new Governor collaborated with TDOE staff prior to taking office, and both he and his new Commissioner are committed to education reform, the transition to new leadership was not seamless. The time required to fill key leadership positions impacted both TDOE's project timelines and its capacity to support LEAs. TDOE also experienced turnover within the assessment, data systems, and educator evaluation offices. During the summer of 2011, the Commissioner engaged in a strategic planning process and is considering how to fill vacancies and hire additional staff at TDOE in alignment with the agency's key priorities needed to drive student achievement at the classroom level. Tennessee learned valuable lessons during the first year of Race to the Top that will inform TDOE as it continues to foster supportive relationships with LEAs and schools. In Year 1, the State offered guidance, trainings, and in-person support to LEAs and schools on several Race to the Top initiatives, including TVAAS, the CCSS, and the TAP observation rubric. The guidance and resources provided by the State built stronger relationships with LEAs to ensure successful implementation of many foundational Race to the Top initiatives in Year 1. A Glossary is included. (Contains 13 footnotes.) [For the parent report, "Race to the Top Annual Performance Report," see ED529267. For the full report, "Race to the Top. Tennessee. A comprehensive, activity-based program that uses the pedagogical principles of the Singapore Math approach to help kindergarten students build a strong foundation in mathematics through fun-filled lessons and activities. Aligned with the Mathematics Framework for California Public Schools, the program aims to prepare young students for subsequent stages of mathematical thinking. Designed to form the foundation level for the Primary Mathematics standards Edition series.

The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explaining appropriate practice.

This resource helps teachers to incorporate writing instruction in the kindergarten classroom as an essential element of literacy development while implementing best practices. As a classroom-tested resource, Getting to the Core of Writing shows positive results in students' writing and simplifies the planning of writing instruction. It assists teachers in becoming familiar with the Common Core State Standards of Writing and provides resources to support the implementation of these standards. The included ZIP file contains information on how to establish a daily writing workshop that includes consistent, structured instruction to engage students in the writing process. This resource was developed with Common Core State Standards as its foundation and is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills.

This is a methods book for elementary majors and preservice/beginning elementary teachers. It takes a very practical approach to learning to teach elementary school mathematics in an emerging Age of the Common Core State Standards. The Common Core State Standards in Mathematics (CCSSM) is not meant to be "the" official mathematics curriculum; it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace. A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the kindergarten through grade 5 portions of the CCSSM first, with issues in content-practice assessment, learning, teaching, and classroom management pursued next and in that order. In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content-practice learning, teaching, and assessment. The CCSSM content standards, which pertain to mathematical knowledge, skills, and applications, have been carefully crafted so that they are teachable, learnable, coherent, fewer, clearer, and higher. The practice standards, which refer to institutionally valued mathematical actions, processes, and habits, have been conceptualized in ways that will hopefully encourage all elementary students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation. Thus, in the CCSSM, proficiency in content alone is not sufficient, and so does practice without content, which is limited. Content and practice are both equally important and, thus, must come together in teaching, learning, and assessment in order to support authentic mathematical understanding. This blended, multisourced text is a "getting smart" book. It helps elementary majors and preservice/beginning elementary teachers work within the realities of accountable pedagogy and develop a proactive disposition that is capable of supporting all elementary students in order for them to experience growth in mathematical understanding necessary for middle school and beyond, including future careers.

Apply the "science" of reading to students with moderate-to-severe developmental disabilities, including autism. The Early Literacy Skills Builder program incorporates systematic instruction to teach both print and phonemic awareness. ELSB is a multi-year program with seven distinct levels and ongoing assessments so students progress at their own pace. Five years of solid research have been completed through the University of North Carolina at Charlotte, proving ELSB to be a highly effective literacy program and more effective than a sight-word only program. ELSB is based upon the principles of systematic and direct instruction. It incorporates scripted lessons, least-prompt strategies, teachable objectives, built-in lesson repetition, and ongoing assessments. The seven ELSB levels contain five structured lessons each. All students begin at Level 1. If a student struggles here, go back and administer Level A. Instruction is one-on-one or in small groups. Teach scripted lessons daily in two 30-minute sessions. On the completion of each level, formal assessments are given. ELSB includes everything you need to implement a multi-year literacy curriculum.

Common Core's English resources empower educators to meet the expectations of the Common Core State Standards (CCSS) for English Language Arts (ELA) and build essential content knowledge for students in grades K-5. Each grade in The Wheatley Portfolio features a comprehensive, coherent sequence of thematic units that engage students in deep study of worthwhile texts and topics. Features of this book include: Six thematic units for each grade, each centered on a curated collection of literary and informational texts Focus standards for each unit that complement the topic and promote student mastery of essential literacy skills Suggested texts and activities to incorporate science, art, and history into English instruction This revised second edition includes a sample text study that guides students through a close read of an exemplary text, updated web resources, and refreshed suggested works. Educators who create their curriculum based on Common Core's Wheatley Portfolioguarantee that students are exposed to content-rich instruction and have ample opportunity to master the reading, writing, speaking, listening, and language skills articulated in the CCSS for ELA.

Your blueprint to planning K-2 math lessons for maximum impact and understanding Not sure of tomorrow's lesson plan? Your blueprint for designing K-2 math lessons for maximum student learning is here. This indispensable handbook guides you decision-by-decision through the planning of lessons that are purposeful, rigorous, and coherent. Clarify learning intentions and connect goals to success criteria.

Distinguishing between conceptual understanding, procedural fluency, and transfer. Select the formats and tasks that facilitate questioning and encourage productive struggle. Includes a lesson-planning template and examples from Kindergarten, first, and second grade classrooms. Empower yourself to plan lessons strategically, teach with intention and confidence, and build an exceptional foundation in math for your students.

Provide your 4th graders with rigorous reading comprehension practice! Close reading, vocabulary, comprehension, and writing activities support Common Core learning paths. Plus, downloadable home-school connection activities extend learning at home.

Reading Street - Elementary Reading Comprehension Program Scott Foresman Reading Street (c) 2008 is an all-new reading instruction program for Grades PreK-6. Reading Street is designed to help teachers build readers through motivating and engaging literature,

scientifically research-based instruction, and a wealth of reliable teaching tools. The reading program takes the guesswork out of differentiating instruction with a strong emphasis on ongoing progress-monitoring and an explicit plan to help with managing small groups of students. In addition, Reading Street prioritizes skill instruction at each grade level, so teachers can be assured they will focus on the right reading skill, at the right time, and for every student.

A unique blend of age-appropriate tracing and writing activities are combined with puzzles to make learning fun while helping kindergarteners build alphabet and handwriting skills and develop lifelong learning confidence. Identifying letters and learning to write letters and words are important steps toward reading readiness, and Highlights (TM) infuses Fun with a Purpose® into these essential learning activities. With vibrant art and engaging prompts, Writing exposes kindergarteners to letters and words through tracing and writing practice and the fun of puzzles and other activities, including Hidden Pictures® puzzles and mazes.

"Why should I read?" Can your students answer that question? Do they have trouble seeing the importance that reading may have in their lives? Are they lacking motivation, both in academic and recreational reading? Do you think you can effectively teach reading strategies if students don't understand the benefits of literacy? In Reading Reasons, Kelly Gallagher offers a series of mini-lessons specifically tailored to motivate middle and high school students to read, and in doing so, to help them understand the importance and relevance reading will take in their lives. This book introduces and explains in detail nine specific "real-world" reasons why students should be readers. The book contains forty practical, classroom-tested and reproducible mini-lessons that get to the heart of reading motivation and that can be used immediately in English (as well as other content-area) classrooms. These easy-to-use motivational lessons serve as weekly reading "boostershots" that help maintain reading enthusiasm in your classroom from September through June. The mini-lessons, ranging from five to twenty minutes in length, hit home with adolescents, and in turn, enable them to internalize the importance reading will play in their lives. Rather than telling students reading is good for them, the lessons in this book show them the benefits of reading.
